Наименование: Quality

Описание: Quality • Implementation ability • Functionality and user friendliness When evaluating the tenders, both fulfilment and fulfilment of A* and B requirements will be assessed positively. B requirements allow for additional points without non-fulfilment, whilst the A* requirements reward solutions that go beyond the minimum. Описание: • Fulfilment of service and support. When evaluating the tenders, fulfilment and fulfilment of A* requirements within service and maintenance will be assessed positively. A* requirement rewards suppliers who offer more than a minimum. The evaluation will particularly emphasise the tenderer's ability to provide stable and predictable support, including a quick and measurable response time in accordance with SLA, good documentation of routines, and a dedicated customer responsible who ensures continuity of dialogue and follow-up. Systems that provide increased operational security, high availability in the event of errors, proactive notification or follow-up mechanisms, or clear processes for reporting and quality control can achieve a higher score. The aim is to identify tenderers who not only meet the minimum requirements, but who give the municipality security for stable operation and quick help when needed.
