2.1. Процедура

Заглавие: 26/00896 Cell microscope

Описание: This competition is for the procurement of an inverted microscope that can run routine analyses of cultivated cells. This particularly applies to automatic counting of cells, the proportion of dead cells and morphological changes of cells. An inverted microscope is therefore necessary. There will be many users of the instrument, with different uses and expertise. It is important that the user interface is educational and that the system has KI functions that facilitate the analyses. It is also important that larger objects such as fish larvae (up to 2.5 cm) can be analysed, as well as histological slides. Therefore, we need to have connectivity options to the extra colour camera. We plan to replace the current confocal scanner for use on this instrument at a later date.
