Критерий:

Вид: Качество

Наименование: Best price-quality ratio

Описание: The criteria for evaluating offers (hereinafter referred to as the "Criteria") established for the purpose of selecting the best price-quality ratio

Категория на критерия за възлагане с фиксирана стойност: Фиксирана стойност (общо)

Число, свързано с критерия за възлагане: 100

Описание на метода, който трябва да се използва, ако претеглянето не може да бъде изразено по критерий: Participants will get points based on concept value for money. Points will be awarded as a function of proposed technical parameters and offered price. Each increase in Round Trip Efficiency will add points. One percent of RTE efficiency increase corresponds to revenues in the NPV calculation equal to 213k EUR per year, over a time period of 25 years. RTE efficiency increase will be automatically calculated based on inputs of expected weighted efficiency of motor generators TG1&TG2 by Participant. Each increase of offered price will lower points obtained. Participants will have to offer only solution within the range of required technical parameters and offered price. The ranking of Participants will be set based on the highest number of received points. The ranking of Participants will be determined based on the points obtained from the criteria equation by filling in the data in the excel sheet and table (Evaluation score).
