Relevant and comparable assignments means experience with engineering design services, construction and delivery of professional boats or work boats with catamaran interceptors and. Tenderers must also prove that they possess, or have contractual access to, the necessary technical competence for the delivery and integration of both electric and petrol driven propulsion systems. Documentation requirements:

Критерий: Мерки за гарантиране на качеството

Описание на критерия за подбор: Tenderers shall have a relevant quality assurance system for the content of the contract. Documentation requirements: A description of the tenderer's quality assurance system. This can possibly be documented by a certificate issued by independent bodies as documentation that the tenderer fulfils quality assurance standards, for example ISO 9001:2015. The contracting authority will also accept other documentation of equivalent quality assurance measures if the tenderer does not have access to such certificates, provided that the tenderer proves that the proposed measures ensure equivalent quality.

Критерий: Мерки за управление на околната среда

Описание на критерия за подбор: Tenderers shall be suitable to fulfil contract requirements for due diligence assessments for responsible businesses, cf. The contract formula's point 12.1. Описание: Climate and environmental considerations are not included as a separate award criterion in this competition, as it is considered that the climate and environmental effect is safeguarded more efficiently through absolute minimum requirements in the Contracting

Authority's requirement specifications (Annexes 1 A and 1B), cf. the procurement regulation § 7-9 (4). · For the electric operating boat: There is an absolute minimum requirement of 100% emission free electrical propulsion. It is clear that such an absolute requirement gives a significantly better climate and environmental effect than weighting the environment as an award criterion. · For the petrol-driven operational boat: Due to a lack of infrastructure at the location (Håøya), fossile propulsion system is allowed. In order to ensure the lowest possible environmental impact, the requirement specifications set absolute minimum requirements for engine technology. This means that the engine must fulfil the strictest current emission requirements for professional boats, and be fully compatible with and factory certified for the use of standard E10 petrol (with up to 10% bioethanol) without this affecting or limiting the engine guarantee.
