Число, свързано с критерия за възлагане: 30

Критерий:

Вид: Качество

Описание: The contracting authority believes that combining requirements in the requirement specifications and award criteria will give better climate and environmental effect in this competition. We require that all transport must have zero emissions for small and medium sized, and at least emission class Euro 6 for large vehicles, as well as requirements for chemical content in the products. The contracting authority also has requirements for lifetime and guarantee period, use of environmental labels and access to spare parts under the award criteria 'climate, environment and quality', which is weighted with 30%. Prolonged lifetime will be a central measure to reduce the environmental impact of the procurement. There are minimum requirements where we believe the market is ripe for this, while through an environmental criterion we reward market participants who will go further. We believe that the combination of minimum requirements and criteria in sum gives better environmental effect than just using criteria by ensuring a certain environmental standard while allowing tenderers to compete on measures that extend the lifetime of the products.
