Критерий:

Вид: Качество

Наименование: Justification for the use of climate and environmental requirements in the requirement specifications.

Описание: According to the Public Procurement Regulations § 7-9 (4), the award criterion in accordance with PPR § 7-9 (2) and (3) can be replaced with climate and environmental requirements if it is clear that this provides a better climate and environmental effect. The climate and environmental impact of this procurement is mainly related to concrete, steel (cable gate and bolts), water and frost mats, lighting and asphalt. All asphalt works shall go through the asphalt contract which has good routines on quality and climate footprint as well as follow-up of this. EPD is requested in connection with concrete and steel. The existing lighting will be replaced with new lighting 1:1 (not in accordance with N600) Led lights. The masses that will be surplus will be awarded to the contractor. BH has had a dialogue with Suldal municipality regarding planned works/improvements where there will be a need for future matter with negative feedback. The bra requires that the matter shall be transported to the nearest approved landfill (with a receipt to the gross health system). The project believes that we can better achieve a climate effect in the project by, among other things, setting requirements for (KGL): -concrete (Low carbon A) heavy vehicle Euro 6 step 4 -re-use of cables to lights -replacement to Led lights. -follow-up of greenhouse gas emissions. -100% zero emission on vehicles under 3.5 tons. -requirements for the delivery of EPD forms. By setting minimum requirements in the contract, we are largely ensured a climate and environmental effect and we therefore consider the climate and environmental gains in this procurement to be better safeguarded through such a requirement position rather than the use of climate and environment as the award criteria.
