5.1.10. Kritéria pro zadání

Kritérium:

Typ: Náklady

Jméno/název: Co2 Weighting

Popis: Co2 Weighting Award Criteria The builder in this contract will take CO₂eq emissions into consideration in addition to price. This will help reduce the environmental consequences of production and paving of asphalt. See chapter D1.3 for information on any contract points not covered by the CO₂eq weighting. The contract will be awarded the tender with the lowest tender sum. Lowest tender sum: The tender sum will be calculated by a mark-up based on the amount of CO₂eq emissions. The tenderer with the lowest combined CO₂eq emission will not receive any mark-up in the tender sum. The difference in emissions between your tender and the tender with the lowest emissions is calculated for the other tenderers. This difference is priced at 7.5 KR/kg CO₂eq. The estimate in the tender sum will thus be the difference given in kg CO₂eq multiplied by 7.5 NOK/kg CO₂eq. Example point x: 10,000 tons asphalt Supplier A delivers an EPD that shows a discharge of 50 kg CO₂eq/tonne of asphalt; i.e. emissions in total 500,000 kg CO₂eq. Supplier A has the lowest emissions and receives no mark-up in the tender sum. Supplier B delivers an EPD showing a discharge of 60 kg CO₂eq/tonne asphalt; i.

e. emissions in total 600,000 kg CO₂eq. The difference in relation to the lowest emission is (600,000-500,000) kg/CO₂eq and the estimate for tenderer B will be 100,000 kg/CO₂eq * 7.50 KR/kg CO₂eq = 750,000 NOK Documentation requirement: EPD shall be delivered in accordance with EN 15804 +A2: 2019 and approved by one or several members of the type «Established ECO EPD Programme Operator» in eco-platform (i.a. EPD-Norway, Environdec and IBU) for each mass type at the points described in D1.3. This shall include the modules A1-A5 and C1-C3. It will be sufficient to deliver an EPD that includes modules A1-A3 and C1-C3 for each type of mass. In addition a set-up/spreadsheet must be delivered that shows the emissions in the modules A4 and A5 for each point. Contractors must document the prerequisites and measures that are the basis for calculating their EPDs. (e.g. heating medium, use of LTA, reuse, biogenic binder etc.). The additional information form shall be completed and enclosed with the tender. The requested information in the annex "Additional Information FOR EPD Weighting of CO₂" can be stated in a separate annex. All requested information shall be provided. The proposal's CO₂ contribution shall be production specific; i. e. a separate EPD shall be available from each production location. If there are no separate EPDs, default values can be used for awarding contracts. When default values are used, real and documented values shall be included in the CO₂ accounts when the contract is completed. When calculating the bonus/malus, the default values stated in the tender shall be used. Project specific EPDs that refer to approved reference EPDs shall be available at the tender deadline and enclosed with the tender. Requirement to submit EPDs with the tender as stated above is for the points where emission ceilings are set If EPDs are submitted or budgets that state the value that exceeds the stated roof for CO₂eq, it is not assessed as a condition and the tenderer must deal with the ceiling stated in the contract and the provisions on malus.
