Název: ESM platform with a system for user enquiries - Stage 1 - Qualification

Popis: The Norwegian Parliament's current system for handling user enquiries, Footprints, is nearing the end of its technological lifetime and it no longer fulfils the requirements for modern, secure and effective case handling. For the users, the current situation means that enquiries need to be directed through several different channels – such as Footprints, email, telephone, SMS and physical attendance – which creates uncertainty as to where to address, who is following up, and what the status of the case is. In order to meet these challenges, the project New System for User Enquiries was established with the aim of acquiring and introducing a modern ESM platform (Enterprise Service Management), in which a new system for user enquiries is established as the first system on the platform. An ESM platform will not only replace Footprints, but at the same time give the Norwegian Parliament a common technological foundation for several types of work processes in the long term. Thus, the project addresses both the need for a new user enquiry system and the strategic need to ensure growth when the organisation is ready for it. The aim is to use a system that is secure, scalable and based on standardised processes and integrations. The platform approach facilitates further digitalisation, better data quality and more fact-based decisions. It also supports the Norwegian Parliament's need for efficiency, automation and overall management information. Future situation When the system is implemented, the Norwegian Parliament has adopted a flexible and scaleable platform that supports user enquiries as the first process, but which is also rigged to handle several work processes over time. The platform enables gradual development where the Norwegian Parliament itself manages the tempo, at the same time that the tenderer contributes with the necessary competence for configuration, development and implementation and its best practice and experience from other customers. The system is integrated with other systems through standard APIs/connectors and it provides a joint framework for processes and data basis. This provides consistent information across your organisation, improved data quality and management information, as well as support for fact-based priorities and strategic planning. Stortingets administrasjon gets a modern, comprehensive and user friendly platform that improves both internal work flow and the experience for the users. Unified processes and a common user interface contribute to fewer errors, better experiences and more efficient work flow. The system also facilitates increased

automation and digitalisation, and over time cost reductions are achieved by having several processes gathered in one platform, as well as security and privacy strengthened and the Starting now has a strong technological foundation that can be further developed gradually, scaled as needed and used across the organisation to support future digital needs and innovation. The procurement will be carried out with SSA-Sky as the contract basis and it is assumed that the system is delivered as a standardised cloud system (SaaS). This means that functionality, further development, security and operation are mainly safeguarded through the tenderer's established service model and standard updates. The described needs are based on experiences with the current Footprints system and the established ITSM processes, while also reflecting the Norwegian Parliament's need and ambition for further development within a modern cloud based service model. The requirement descriptions cover both direct support for established ITSM processes, such as Incident, Request, Change and Problem Management, as well as transverse needs such as joint entrance, dialogue, notifications, search, reporting, security, compliance and management. Combined, the needs shall provide a flexible possibility room where processes, services and applications can be configured, combined and further developed over time, also for new needs and services that are not currently fully known. The needs are formulated as business and functional needs, and not as detailed technical specifications. This has been done so that the Tenderer can offer systems that are primarily based on standard functionality in the cloud platform, in accordance with the principles in SSA-Sky. Both the current need and new or changed needs arising in the contract period The service provider shall, in their tender, describe how the system supports the needs within the framework of an SSA-Sky delivery, including how management, security, availability and further development are safeguarded throughout the contract period. The Norwegian Parliament sees a need for a solution that also allows for development and adaptation in the contract period. The descriptions of the needs are therefore formulated technology neutral and process independent, so that they can be covered through the tenderer's standard functionality, configuration and further development - both for the current use and for new needs that may arise. Tenderers shall describe in their tender how their solution: covers the Norwegian Parliament's need in a comprehensive manner supports established ITSM processes that provide low risk, high management friendly and good further development possibilities in accordance with SSA-Sky

Identifikátor řízení: ef0e33d8-fa8b-42fb-a506-463926cc7e16

Interní identifikátor: 2025/8901

Typ řízení: Jednací řízení s uveřejněním / jednací řízení

Řízení se zrychlí: ne

Hlavní prvky řízení: ESM platform with a system for user enquiries.

5.1.1. Účel

Charakter smlouvy: Služby

Hlavní klasifikace (cpv): 72000000 Informační technologie: poradenství, vývoj programového vybavení, internet a podpora

Další klasifikace (cpv): 48000000 Balíky programů a informační systémy, 48517000 Balík programů pro IT, 72200000 Programování programového vybavení a poradenské služby, 72260000 Služby programového vybavení

5.1.2. Místo plnění

Nižší územní jednotka země (NUTS): Oslo (NO081)

Země: Norsko

5.1.3. Odhadovaná doba trvání

Datum zahájení: 30/10/2026

Datum konce trvání: 31/10/2036

5.1.6. Obecné informace

Vyhrazená účast:

Účast není vyhrazena.

Projekt veřejných zakázek, který není financován z prostředků EU

Na zakázku se vztahuje Dohoda o vládních zakázkách: ano

5.1.9. Kritéria pro výběr

Zdroje výběrových kritérií: Jednotné evropské osvědčení pro veřejné zakázky (ESPD)

Informace o druhé fázi dvoufázového řízení:

Minimální počet uchazečů, kteří budou pozváni do druhé fáze řízení: 3

Maximální počet uchazečů, kteří budou pozváni do druhé fáze řízení: 4

Řízení proběhne v několika na sebe navazujících fázích. V každé fázi mohou být určiti účastníci vyřazení
Kupující si vyhrazuje právo zadat zakázku na základě původních nabídek bez dalších jednání

5.1.11. **Zadávací dokumentace**

Jazyky, v nichž je oficiálně k dispozici zadávací dokumentace: norština
Adresa zadávací dokumentace: <https://permalink.mercell.com/281577992.aspx>

5.1.12. **Podmínky zadávání zakázek**

Podmínky podání:

Elektronické podání: Požadována
Adresa pro podání: <https://permalink.mercell.com/281577992.aspx>
Jazyky, v nichž lze podávat nabídky nebo žádosti o účast: norština
Elektronický katalog: Nepovolena
Požaduje se zaručený nebo kvalifikovaný elektronický podpis nebo pečeť (podle definice v nařízení (EU) č 910/2014)
Varianty: Nepovolena
Lhůta pro doručení žádostí o účast: 22/06/2026 10:00:00 (UTC+00:00) západoevropský čas

Smluvní podmínky:

Plnění zakázky musí být provedeno v rámci programů chráněného zaměstnání: Ne
Elektronická fakturace: Požadována
Bude použito elektronické objednávání: ano
Bude použita elektronická platba: ano

5.1.15. **Techniky**

Rámcová dohoda:

Žádná rámcová dohoda

Informace o dynamickém nákupním systému:

Žádný dynamický nákupní systém

5.1.16. **Další informace, mediace a přezkum**

Organizace příslušná pro přezkum: Oslo tingrett
Informace o lhůtách pro přezkum: See the tender documentation and loa/FOA
Organizace poskytující další informace o podání návrhů na přezkum: Oslo tingrett
