Kritérium: Zabezpečení dodávek

Popis výběrového kritéria: Support from other entities for fulfilment of the qualification requirements. The tenderer can, if necessary, rely on other companies' capacity to fulfil the requirements for economic and financial capacity and/or the requirements for technical and professional qualifications. Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity that the tenderer will use to submit a separate ESPD form when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • Documentation that shows that the tenderer can use the necessary resources for the entities that they will use, for example, a commitment statement from these businesses. The template for the commitment statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. • Documentation that shows that the company(s), that the tenderer will use, fulfil the qualification requirement 'the tenderer's organisational and legal position'. • Documentation that shows that the company(s), that the tenderer will use, fulfil the relevant qualification requirements. • If a tenderer will use the capacity of other companies to fulfil the requirements for economic and financial capacity, a signed joint and several liability statement must be enclosed. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. If a tenderer will use the capacity of other companies to fulfil the requirements of relevant experience, these entities shall carry out the services or the building and construction work that requires such qualifications.

Kritérium: Potřeba povolení nebo členství v určité organizaci pro smlouvy o službách

Popis výběrového kritéria: Suppliers who participate in a working partnership Several tenderers can participate in the competition jointly. The community must see to the necessary documentation that all the qualification requirements are met. The contracting authority will assess each individual supplier in the community against the provisions on rejection, cf. § 9-5 and § 24-2, this except the provision in § 9-5 (1) letter a) and § 24-2 (1) letter a) fulfilment of the qualification requirements, which will be applied to the jointly combined set. Tenderers who participate as a working partnership will be assessed collectively for the qualification requirements, with the exception of the requirements for the tenderer's organisational and legal position, documentation for absence of rejection reasons, tax certificates and authority for information on tax and duties (OSA). Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity in the (work) group shall submit separate ESPD forms when submitting a tender. Tenderers

shall, upon request from the contracting authority, present the following documentation proof: • An account of the group (including each participant's role), each participant's organisation number, address and nationality. • The same documentation as individual tenderers shall be provided for each individual tenderer who participate in the group. • Declaration of joint and several liability to the contracting authority. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. The community of suppliers can, if necessary, rely on other entities to fulfil the qualification requirements, see the point on support from other companies to fulfil the qualification requirements. The contracting authority requires that the tenderer who fulfils the requirements for relevant experience shall carry out the services or the building and construction work that requires such qualifications.

Kritérium: Zápis do relevantního profesního rejstříku

Popis výběrového kritéria: Particularly on newly established tenderers A tenderer who is newly established and cannot present all the required documentation must be particularly careful to document and substantiate that they still have the prerequisites required to fulfil the contract. It is particularly important that such tenderers can document a sufficiently large workforce for the execution of the contract, including technical and professional qualifications. Newly established tenderers emphasise that it is the tenderer's ability as such to carry out the contract that is assessed, not individual persons' competence in isolation. If a newly established tenderer has experience from contracts, the most relevant contracts from which the tenderer has experience must be completed in accordance with the documentation requirements regarding relevant experience. This is even if the contracts are of such a nature that they do not fulfil the specified requirements. Missing or inadequate documentation in one or more of the requirements can result in the tenderer being rejected. Insufficient or incorrect completed response form can also lead to rejection. Tenderers who have established themselves within a new discipline can also be seen as newly established.

5.1.10. Kritéria pro zadání

Kritérium:

Typ: Cena

Jméno/název: Lowest price

Popis: The contracting authority will choose tenders on the basis of the lowest price.

Kategorie kritéria pro zadání s váhou: Váha (procenta, přesně)

Číslo spojené s kritériem pro zadání zakázky: 100

Kritérium:

Typ: Kvalita

Jméno/název: Justification for the use of climate and environmental requirements in the requirement specifications.

Popis: Climate and environment has not been used as the award criterium in this procurement. In accordance with the Public Procurement Regulations (FOA) § 7-9 fourth paragraph, award criteria can be replaced with requirements if this gives a clearly better climate and environmental effect. It has been considered for this procurement that climate and environmental considerations are taken care of through concrete minimum requirements in the tender documentation and contract. The procurement is for a framework agreement where the work is ordered through call-offs. The extent, location and character of the individual works will vary and are to a limited degree known at the time of publication. This means that tenderers will, to a small degree, have sufficient basis for preparing and competing on relevant climate and environmental measures in the tender phase. The climate and environment as the award criterion is therefore assessed to have a limited effect. The largest climate and environmental

impacts in the contract are related to transport of personnel, emissions from machines and vehicles, rock protection work as well as waste management. The transport of personnel with light vehicles in particular makes up a significant part of the climate footprint. In order to ensure real climate and environmental effect, there are therefore concrete requirements in the contract, including:

- The requirement that the shotcrete shall have a maximum documented GWP-total value (A1-A3) that is not higher than 280 kg CO₂-ekv. /m³ for concrete specified in class M45 and 300 kg CO₂-ekv/m³ for concrete, specified in classification M40.
- Concrete and concrete elements are required to be cast on site as a minimum to have low carbon class 20 (NB37).
- A maximum emission factor of 1.4 kgCO₂e/kg will be required for rock bolts.
- Maximum emission factor of 2 kgCO₂e/kg will be required for the rock protection network.
- EPD shall be delivered and reports with added amounts for all input factors included in the contract work. Contract specific EPDs shall be provided for products covered by the minimum requirements.
- Requirement that 100% of light vehicles shall be carried out with zero emission vehicles or biogas.
- Requirement for an environmental management system (ISO 14001 or equivalent)
- Requirements regarding emission standards for vehicles and machines (minimum Euro 6 and Step 4).
- Requirement for contingency for handling pollution, including available absorption agent.
- Requirement for covering asphalt at risk of fallout to prevent replacement

During mini-competitions, the builder can set stricter environment and climate requirements than what applies to the contract and processes today. There will be separate processes on this in a mini competition where relevant. A major focus here will be the transition to electricity or biogas for call-offs where suitable.

Contractor shall at all times strive for further improvement influences on greenhouse gas emissions where this does not have a significant negative effect on price, progress and quality. Possibilities for this shall be lifted for the builder.

Materials/matter shall as far as possible be reused in the project in cases where suitable. By setting these requirements, we ensure that all tenderers fulfil a defined level for climate and environmental performance, independent of variations in each call-off. This is considered to have a greater total climate and environmental effect than the use of award criteria in this procurement. Based on this, the exclusion provision is used in the Public Procurement Regulations § 7-9 fourth paragraph.

Tenderers shall have an equity percentage of at least 10%. 3. The average annual turnover in the last three years shall as a minimum correspond to annual turnover for the contract.

Documentation requirement Tenderers shall, upon request from the contracting authority or together with the request for participation in the competition, present the following

documentation: 1. The tenderer's annual financial statement, annual report and auditor's report

for the last three years and recent information (quarterly accounts) that is of importance to the tenderer's fiscal numbers. 2. A brief account of information about economic conditions or losses that are not documented elsewhere, and which is required to be documented in accordance with Norwegian and/or international accounting standards. 3. An overview of any recently executed, ongoing or pending tax or public reviews of the tenderer's activities. 4. An overview of any events of significance that have taken place after the publication of the last revised annual accounts. If a tenderer has a justifiable reason for not submitting the documentation that the contracting authority has required, he can document his economic and financial capacity by presenting any other document of relevance to the company's fiscal figures/economy. Tenderers shall justify why they cannot submit the documentation required by the contracting authority.

Kritérium: Technici nebo technické orgány pro kontrolu kvality

Popis výběrového kritéria: The tenderer's technical and professional qualifications. Relevant experience: Tenderers shall have sufficient experience of a relevant nature and degree of difficulty from: • Work on ropes • Work connected to water-frost protection in the tunnel • Rock protection in tunnels and cutting/open air zones. Documentation requirement Tenderers shall present the following documentation if requested by the contracting authority: An overview of 3-5 contracts that the tenderer has carried out or executes during the last five years calculated from the tender deadline. The overview shall, cf. the form "Response Document for assessment of the tenderer's technical and professional qualifications - Operation and maintenance" (See "General contract documents the Norwegian Public Roads Administration, Various documents), including, among other things, the following for each of the contracts: • Name of the recipient (contracting authority). • Contact person/reference person at the contracting authority with contact data (telephone number and email address) and a statement of the person's role at the contracting authority during the contract. • Date of the delivery. • The contract's value. • What work was carried out by the tenderer, including as the main contractor or sub-contractor, and what work was carried out by sub-contractors. • A description of what the contractual works were about, including relevance to the qualification requirement.

Kritérium: Relevantní vzdělání a profesní kvalifikace

Popis výběrového kritéria: The tenderer shall: 1. Have technical and professional competence and relevant experience with the key personnel offered for fulfilling the contract. Documentation requirement Tenderers shall present the following documentation if requested by the contracting authority: CVs and job descriptions for key personnel, c.f. chapter C, including the following resources: - Project Manager -Site manager - Quality management manager HSE manager Bas

Kritérium: Zabezpečení dodávek

Popis výběrového kritéria: Support from other entities for fulfilment of the qualification requirements. The tenderer can, if necessary, rely on other companies' capacity to fulfil the requirements for economic and financial capacity and/or the requirements for technical and professional qualifications. Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity that the tenderer will use to submit a separate ESPD form when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • Documentation that shows that the tenderer can use the necessary resources for the entities that they will use, for example, a commitment statement from these businesses. The template for the commitment statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranser-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. • Documentation that

shows that the company(s), that the tenderer will use, fulfil the qualification requirement 'the tenderer's organisational and legal position'. • Documentation that shows that the company(s), that the tenderer will use, fulfil the relevant qualification requirements. • If a tenderer will use the capacity of other companies to fulfil the requirements for economic and financial capacity, a signed joint and several liability statement must be enclosed. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. If a tenderer will use the capacity of other companies to fulfil the requirements of relevant experience, these entities shall carry out the services or the building and construction work that requires such qualifications.

Kritérium: Potřeba povolení nebo členství v určité organizaci pro smlouvy o službách
Popis výběrového kritéria: Suppliers who participate in a working partnership Several tenderers can participate in the competition jointly. The community must see to the necessary documentation that all the qualification requirements are met. The contracting authority will assess each individual supplier in the community against the provisions on rejection, cf. § 9-5 and § 24-2, this except the provision in § 9-5 (1) letter a) and § 24-2 (1) letter a) fulfilment of the qualification requirements, which will be applied to the jointly combined set. Tenderers who participate as a working partnership will be assessed collectively for the qualification requirements, with the exception of the requirements for the tenderer's organisational and legal position, documentation for absence of rejection reasons, tax certificates and authority for information on tax and duties (OSA). Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity in the (work) group shall submit separate ESPD forms when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • An account of the group (including each participant's role), each participant's organisation number, address and nationality. • The same documentation as individual tenderers shall be provided for each individual tenderer who participate in the group. • Declaration of joint and several liability to the contracting authority. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. The community of suppliers can, if necessary, rely on other entities to fulfil the qualification requirements, see the point on support from other companies to fulfil the qualification requirements. The contracting authority requires that the tenderer who fulfils the requirements for relevant experience shall carry out the services or the building and construction work that requires such qualifications.

Kritérium: Zápis do relevantního profesního rejstříku

Popis výběrového kritéria: Particularly on newly established tenderers A tenderer who is newly established and cannot present all the required documentation must be particularly careful to document and substantiate that they still have the prerequisites required to fulfil the contract. It is particularly important that such tenderers can document a sufficiently large workforce for the execution of the contract, including technical and professional qualifications. Newly established tenderers emphasise that it is the tenderer's ability as such to carry out the contract that is assessed, not individual persons' competence in isolation. If a newly established tenderer has experience from contracts, the most relevant contracts from which the tenderer has experience must be completed in accordance with the documentation requirements regarding relevant experience. This is even if the contracts are of such a nature that they do not fulfil the specified requirements. Missing or inadequate documentation in one

or more of the requirements can result in the tenderer being rejected. Insufficient or incorrect completed response form can also lead to rejection. Tenderers who have established themselves within a new discipline can also be seen as newly established.

5.1.10. Kritéria pro zadání

Kritérium:

Typ: Cena

Jméno/název: Lowest price

Popis: The contracting authority will choose tenders on the basis of the lowest price.

Kategorie kritéria pro zadání s váhou: Váha (body, přesně)

Číslo spojené s kritériem pro zadání zakázky: 100

Kritérium:

Typ: Kvalita

Jméno/název: Justification for the use of climate and environmental requirements in the requirement specifications.

Popis: Climate and environment has not been used as the award criterium in this procurement. In accordance with the Public Procurement Regulations (FOA) § 7-9 fourth paragraph, award criteria can be replaced with requirements if this gives a clearly better climate and environmental effect. It has been considered for this procurement that climate and environmental considerations are taken care of through concrete minimum requirements in the tender documentation and contract. The procurement is for a framework agreement where the work is ordered through call-offs. The extent, location and character of the individual works will vary and are to a limited degree known at the time of publication. This means that tenderers will, to a small degree, have sufficient basis for preparing and competing on relevant climate and environmental measures in the tender phase. The climate and environment as the award criterion is therefore assessed to have a limited effect. The largest climate and environmental impacts in the contract are related to transport of personnel, emissions from machines and vehicles, rock protection work as well as waste management. The transport of personnel with light vehicles in particular makes up a significant part of the climate footprint. In order to ensure real climate and environmental effect, there are therefore concrete requirements in the contract, including:

- The requirement that the shotcrete shall have a maximum documented GWP-total value (A1-A3) that is not higher than 280 kg CO₂-ekv. /m³ for concrete specified in class M45 and 300 kg CO₂-ekv/m³ for concrete, specified in classification M40.
- Concrete and concrete elements are required to be cast on site as a minimum to have low carbon class 20 (NB37).
- A maximum emission factor of 1.4 kgCO₂e/kg will be required for rock bolts.
- Maximum emission factor of 2 kgCO₂e/kg will be required for the rock protection network.
- EPD shall be delivered and reports with added amounts for all input factors included in the contract work. Contract specific EPDs shall be provided for products covered by the minimum requirements.
- Requirement that 100% of light vehicles shall be carried out with zero emission vehicles or biogas.
- Requirement for an environmental management system (ISO 14001 or equivalent)
- Requirements regarding emission standards for vehicles and machines (minimum Euro 6 and Step 4).
- Requirement for contingency for handling pollution, including available absorption agent.
- Requirement for covering asphalt at risk of fallout to prevent replacement
- During mini-competitions, the builder can set stricter environment and climate requirements than what applies to the contract and processes today. There will be separate processes on this in a mini competition where relevant. A major focus here will be the transition to electricity or biogas for call-offs where suitable.
- Contractor shall at all times strive for further improvement influences on greenhouse gas emissions where this does not have a significant negative effect on price, progress and quality. Possibilities for this shall be lifted for the builder.
- Materials/matter shall as far as possible be reused in the project in cases where

suitable. By setting these requirements, we ensure that all tenderers fulfil a defined level for climate and environmental performance, independent of variations in each call-off. This is considered to have a greater total climate and environmental effect than the use of award criteria in this procurement. Based on this, the exclusion provision is used in the Public Procurement Regulations § 7-9 fourth paragraph.
