Číslo spojené s kritériem pro zadání zakázky: 50

Kritérium:

Popis: Quality

Kategorie kritéria pro zadání s váhou: Váha (procenta, přesně)

Číslo spojené s kritériem pro zadání zakázky: 50

Kritérium:

Typ: Kvalita

Popis: The starting point in accordance with the Supply Regulations (FFO) is that the contracting authority shall emphasise climate and environmental considerations with a minimum of 30 percent in the award criteria. There is, however, an opportunity to deviate from this main rule if the award criteria are replaced with climate and environmental requirements in the requirement specifications, provided that this clearly gives a better climate and environmental effect. It is not appropriate in this procurement to evaluate the service element on environment as a part of the award criteria. The actual maintenance work and replacement

of parts will not have any direct environmental impact. The actual climate impact is mainly related to transport of personnel to the work place and to the transport and production of spare parts that shall be used. In order to reduce this influence, the contract will include a binding requirement that all transport of both personnel and parts shall be carried out emission-free. Tenderers shall document how this requirement is fulfilled, so that the environmental consideration is taken care of in an effective and verifiable way. By placing concrete and binding requirements on emission-free transport in the requirement specifications, a clearly better climate and environmental effect is achieved than by weighting environmental considerations in the award criteria. This is in accordance with FFO's right to deviate from the main rule and ensure that environmental considerations are safeguarded in a purposeful and effective way.
