2. Procedure

2.1. Procedure

Titel: Tender for Contract on subsidy for negative emissions carbon capture, transport and storage

Beskrivelse: The Agreement on the Danish Financial Act for 2022 introduced a new market based subsidy fund (the "NECCS Fund") to achieve negative CO2 emissions by permanently and geologically storing biogenic or atmospheric CO2 (NECCS). The total maximum available subsidy of the NECCS Fund is DKK 2,559,200,000 (2023-prices) excl. VAT. The fund is scheduled for disbursement between 2025-2032. The granting of subsidy under the NECCS Fund is encompassed by the European Commission's Guidelines on State aid for climate, environmental protection and energy 2022. The designation of the Contract(s) as a service contract in the contract notice, section II.1.3), etc. does not change this. The competitive bidding process was conducted as a procedure where all economic operators were invited to submit an offer, i.e. as an open procedure, and in accordance with the general principles of the Danish Public Procurement Act. Subsequently, the DEA cancelled the open procedure and transitioned to a negotiated procedure, see further below. The aim of the NECCS Fund is to contribute to the realization of Denmark's climate targets as outlined in the Danish Climate Act (Danish: "Klimaloven"). The NECCS scheme is intended as a multi-technology tender, covering all technologies that can provide negative CO2 emissions obtained through technological capture and permanent geological storage of biogenic or atmospheric CO2. By biogenic CO2, the DEA refers to CO2 created through the combustion, digestion, fermentation, decomposition or processing of non-fossil fuels or feedstock. By atmospheric CO2, the DEA refers to CO2 from the ambient air, not the emissions from energy or industrial plants. The NECCS Fund is not intended to provide subsidy for the capture and geological storage of CO2 from the combustion or processing of fossil-based fuels or feedstock. Negative emissions based on biochar created through pyrolysis of biomass, as well as other non-technological means of capturing and storing CO2, such as afforestation will also not be applicable for financial support under the NECCS scheme. The DEA wished to enter into one or more contract(s) pursuant to which the recipient(s) of the subsidies (each recipient "the Operator") shall ensure and be responsible for capturing, transportation and permanent, geological storage of biogenic or atmospheric CO2 ("the Contract"). As described in the tender documents the Operator shall every year from 2026 until (and including) 2032 capture and

permanently, geologically store a fixed quantity of biogenic or atmospheric CO₂ ("Annual Quantity"). The Operator may also offer to capture and permanently, geologically store CO₂ from start of operating until 31 December 2025 ("2025-Quantity"). These quantities are to be specified by the tenderer in the offer. The tender documents allowed for award of one or several Contract(s) dependent on the available funds based on the received offers. The subsidy will be paid per tonne of biogenic or atmospheric CO₂ captured and permanently stored. The DEA has notified the fund to the European Commission as an aid scheme in accordance with the procedure prescribed by Article 108 of the Treaty on the Functioning of the European Union and has received the European Commission's prior approval. The Contracts have been subject to a prior publication of call for competition in the Official Journal of the European Union, see contract notice no. 2023/S 165-521925 (521925-2023), published 29 August 2023, as amended by notice no. 692458-2023. Prior to the deadline for submission of offers in the open procedure the DEA made changes and clarifications to the tender documents. The changes and clarifications are described in notice no. 692458-2023 and the voluntary ex ante transparency notice no. 164771-2024, and the revised documents are also publicly available on the DEA's website stated in the contract notice and this notice. After the deadline for submission of offers on 15 January 2024, the DEA assessed that all received offers received in the open procedure were non-compliant. This entailed that the DEA could not award and conclude Contract(s) based on the offers received in the open procedure. With the aim of ensuring the necessary basis for an early award of one or more Contract(s), the DEA cancelled the open procedure and proceeded to a negotiated procedure on 5 February 2024 in accordance with the Danish Public Procurement Act section 61(1), para 2, as only non-compliant offers had been submitted, see the Danish Public Procurement Act section 61(2), para 1. The DEA did not publish a new contract notice, see the Danish Public Procurement Act section 61(4). The DEA's cancellation of the open procedure and transition to a negotiated procedure is further described in notice no. 79591-2024 and the voluntary ex ante transparency notice no. 164771-2024. The DEA's justification for the abovementioned matters is stated in the voluntary ex ante transparency notice and also included in this notice. The DEA chose to publish the voluntary ex ante transparency notice in connection with the decision to award the Contracts with the wish to promote transparency regarding the changes and clarifications made to the tender documents in the open procedure and the DEA's subsequent cancellation of the open procedure and transition to a negotiated procedure without publication of a new contract notice. This contract award notice concerns the result of the tender procedure and sets out that the DEA has entered into Contracts with BioCirc CO₂ ApS, Bioman ApS and Carbon Capture Scotland Limited.

Identifikator for proceduren: 5f44d05f-e074-4cab-b347-14eba403239f

Udbudsprocedure: Udbud med forhandling uden forudgående offentliggørelse

2.1.1. Formål

Kontraktens hovedformål: Tjenesteydelser

Primær klassifikation (cpv): 90700000 Tjenester på miljøområdet

Supplerende klassifikation (cpv): 90720000 Miljøbeskyttelse

2.1.2. Udførelsessted

Land: Danmark

Hvor som helst i det pågældende land

2.1.3. Værdi

Anslået værdi eksklusiv moms: 2 559 200 000,00 DKK

2.1.4. Generelle oplysninger

Yderligere oplysninger: The NECCS Fund is fully financed in 2025, and partially financed in 2026 by REPower EU. REPower EU is the European Commission's plan to make Europe independent from Russian fossil fuels well before 2023. Despite the procedure being indicated as "Negotiated without prior call for competition" it is noted that – as also described in this notice – the Contracts have been subject to a prior publication of call for competition in the Official Journal of the European Union. The total maximum available subsidy of the NECCS Fund is DKK 2,559,200,000 (2023-prices) excl. VAT, covering the period from (and including) 2025 – 2032. The value of each contract is calculated based on the duration of the contract and the subsidy per tonne CO₂ in 2023-prices and excl. VAT. The value of all contracts awarded in this procedure is the sum of the value of the contracts.

Organisation med ansvar for klager: Klagenævnet for Udbud

Oplysninger om klagefrister: Pursuant to the Danish Act on the Complaints Board for Public Procurement, etc. (lov om Klagenævnet for Udbud m.v.) (the Act is available (in Danish) at <http://www.retsinformation.dk/>), the following dead-lines apply to the lodging of complaints:

Pursuant to the Danish Act on the Complaints Board for Public Procurement, etc. (lov om Klagenævnet for Udbud m.v.) (the Act is available (in Danish) at www.retsinformation.dk), the following deadlines apply to the lodging of complaints: Complaints of award procedures, see section 7(2) of the Act, must be lodged with the Danish Complaints Board for Public Procurement before the expiry of: 1) 45 calendar days after the contracting entity has published a notice in the Official Journal of the European Union that the contracting entity has entered into a contract. The deadline is calculated from the day after the day when the notice (i. e. this contract award notice) was published. 2) 20 calendar days calculated from the day after

the contracting entity has submitted notification of its decision, see section 185(2) of the Danish Public Procurement Act. Furthermore, pursuant to section 7(3) of the Act, in the case where the contracting authority has followed the procedure in section 4, complaints regarding that the contracting authority in conflict with Directive 2014/24/EU has entered into a contract without prior publication of a contract notice in the Official Journal of the European Union, must be filed with Danish Complaints Board for Public Procurement within 30 calendar days calculated from the day after the day when the contracting entity has published a notice in the Official Journal of the European Union regarding that the contracting entity has entered into a contract(i.e. this contract award notice), provided that the notice includes the reasons for the contracting entity's decision to award the contract without prior publication of a contract notice in the Official Journal of the European Union. Not later than at the time of lodging a complaint with the Danish Complaints Board for Public Procurement, the complainant must notify the contracting entity in writing that a complaint has been lodged with the Danish Complaints Board for Public Procurement and whether the appeal was lodged during the standstill period, see section 6(4) of the Act. In cases where the complaint was not lodged within the standstill period, the complainant must furthermore indicate whether a suspensory effect of the complaint has been requested, see section 12(1) of the Act. The e-mail address of the Complaints Board for Public Procurement is set out in this notice. The Complaints Board's own complaints procedure is available at <https://naevneneshus.dk/start-din-klage/klagenaevnet-for-udbud/vejledning/>

Organisation, der leverer yderligere oplysninger om klageprocedurerne: Konkurrence- og Forbrugerstyrelsen

TED eSender: Mercell Holding ASA

6. Resultater

Værdien af alle kontrakter tildelt i denne bekendtgørelse: 1 166 273 150,00 DKK

Direkte tildeling

:

Begrundelse for direkte tildeling: Der er kun modtaget uregelmæssige eller uantagelige tilbud som svar på en foregående bekendtgørelse. Alle og kun de tilbud i den foregående procedure, som opfylder udvælgelseskriterierne, som ikke er omfattet af udelukkelsesgrundene og som opfylder de formelle krav, blev inkluderet i forhandlingerne

Anden begrundelse: As stated in this notice, the voluntary ex ante transparency notice no. 164771-2024 and the contract notice no. 521925-2023, the Contracts have been subject to a prior publication of call for competition in the Official Journal of the European Union, where all economic operators were invited to submit an offer, i.e. an open procedure. The voluntary ex ante transparency notice concerned both the changes and clarifications to the tender documents made in the open procedure, and the DEA's transition from the open procedure to a negotiated procedure. Prior to the deadline for submission of offer in the open procedure the DEA made changes and clarifications to the tender documents. The changes and clarifications are described in notice no. 692458-2023 and the voluntary ex ante transparency notice no. 164771-2024. The DEA considers the changes and clarifications to be in accordance with the public procurement rules as the changes and clarifications are made within the confines of the tender material and do not include changes to Minimum Requirements or fundamental elements. The DEA considers the transition from the open procedure to a negotiated procedure to be in accordance with the public procurement rules as all received offers received in the open procedure were non-compliant. Furthermore, the DEA considers the carrying out of the negotiated procedure without publication of a new contract notice to be in accordance with the public procurement rules, as all tenderers – and only these

tenderers – who submitted offers in the open procedure in accordance with the formal requirements of the procurement procedure and met the requirements of the Danish Public Procurement Act section 159(2), 2nd sentence, para 1-3, were invited to submit revised offers, see the Danish Public Procurement Act section 61(4). The negotiated procedure was conducted in writing (without conducting negotiation meetings), and with the purpose of the non-compliant offers being amended so that the offers became compliant. The DEA did not make any changes to Minimum Requirements or fundamental elements of the initial tender documents in connection with the transition to the negotiated procedure, nor any change to commercial terms of the contract. The DEA only made minor adjustments regarding the procedure as a consequence of the transition to a negotiated procedure and therefore made in accordance with principles of the public procurement rules.
