Køberens retlige status: Offentligretligt organ

Den ordregivende myndigheds aktivitet: Uddannelse

2. Procedure

2.1. Procedure

Titel: 2025-0818352 - Purchase of CE/MS

Beskrivelse: The Department of Animal and Veterinary Sciences, Aarhus University working with biomarkers for health, metabolic and nutritional status in farm and companion animals. Increasing focus on non-invasive methods in animal science increases the demand for analytical techniques dedicated to urine metabolomics and to this end the Department intends to buy a CE/MC. Especially bovine urine poses analytical challenges, and the purchase will have to meet several criteria enabling longitudinal studies on urine and other biofluids from multiple animal species. Robustness is mandatory in longitudinal studies, and is challenged in complex matrices like bovine urine. The CE/MS must enable large versatility (operation in different modes), high selectivity, and high throughput (short run times). The analytical platform must enable analysis of carbohydrates, amino acids, peptides, proteins, organic acids, and lipids (e.g. steroids) in complex matrices.

Identifikator for proceduren: b8027312-77a4-4678-a6a4-0d7cbe673191

Tidligere bekendtgørelse: 5ddaa37a-fa3b-4764-916a-69cad47d224b-01

Intern ID: 2025-0818352

Udbudsprocedure: Anden procedure, der afvikles i to faser

2.1.1. Formål

Kontraktens hovedformål: Varer

Primær klassifikation (cpv): 38000000 Laboratorieudstyr, optisk udstyr og præcisionsudstyr (ikke briller)

2.1.2. Udførelsessted

Postadresse: Blichers Allé 20

By: Tjele

Postnummer: 8830

Landsdel (NUTS): Østjylland (DK042)

Land: Danmark

2.1.4. Generelle oplysninger

Retsgrundlag:

5. Delkontrakt

5.1. Delkontrakt: LOT-0000

Titel: 2025-0818352 - Purchase of CE/MS

Beskrivelse: The Department of Animal and Veterinary Sciences, Aarhus University working with biomarkers for health, metabolic and nutritional status in farm and companion animals. Increasing focus on non-invasive methods in animal science increases the demand for analytical techniques dedicated to urine metabolomics and to this end the Department intends to buy a CE/MC. Especially bovine urine poses analytical challenges, and the purchase will have to meet several criteria enabling longitudinal studies on urine and other biofluids from multiple animal species. Robustness is mandatory in longitudinal studies, and is challenged in complex matrices like bovine urine. The CE/MS must enable large versatility (operation in different modes), high selectivity, and high throughput (short run times). The analytical platform must enable analysis of carbohydrates, amino acids, peptides, proteins, organic acids, and lipids (e.g. steroids) in complex matrices.

5.1.6. Generelle oplysninger

Indkøbsprojekt, der ikke finansieres med EU-midler

Udbuddet er omfattet af aftalen om offentlige udbud (GPA): ja

5.1.10. Tildelingskriterier

Kriterium:

Type: Kvalitet

Navn: Quality

Beskrivelse: Specific requirements: 1. To ensure effective communication and support from supplier the CE/MS must be a single-vendor solution for best possible support, ease-of-use, robustness, reliability and full software compatibility for CE, HPLC and MS. 2. To ensure and facilitate long time stability and reliable operation, for the use of a wide range of buffers and operating conditions, the interface must be designed with a coaxial solvent sheath flow or triple tube CE/MS interface. The interface design and use of sheath liquid acts essentially as the outlet buffer for the CE and maintains a spray independent of the magnitude of the flow rate or electro-osmotic flow (EOF). 3. To allow for greatest flexibility and control when working with negative as well as positively charged compounds the nebulizer in the CE-MS interface must operate at ground potential, which decouple the CE separation conditions from the MS operation conditions. 4. The CE-MS system must be flexible and use a standard ESI flow system to allow for robust and easy connectivity with an LCMS system and allowing direct

switching between UHPLC, HPLC and CE flows and connections. 5. To identify analytes in complex matrices it is important that the MS has a high mass accuracy, and MS must have mass accuracy of <2 ppm RMS (negative) and <2 ppm RMS (positive). 6. Quadrupole isolation mass range m/z 20-4,000 and TOF range of m/z 20-10,000. 7. For long term stability of analyses the CE-MS nebulizer MUST enable large droplets and neutral mobile phase additives to pass by the MS inlet capillary minimizing contamination of the inlet. 8. To prevent MS contamination from large droplets and neutral mobile phase additives passing into the MS the CE-MS sprayer MUST be spraying orthogonal, at 90 degrees, to the MS source opening. 9. To ensure durability the temperature in the capillary cassette MUST be controlled and must be air cooled.

Kategori for tildelingskriteriet vægt: Vægtning (procentdel, præcis)

Intet dynamisk indkøbssystem

5.1.16. Yderligere oplysninger, mægling og gennemgang

Organisation med ansvar for klager: Klagenævnet for udbud

Oplysninger om klagefrister: Following the notification, a standstill period of 10 calendar days will be held in accordance to paragraph 3 of Act No. 593 of 2 June 2016 on the Danish Act on the Complaints Board for public Procurement. This implies that the Contracting Authority cannot sign the Contract with the winning Tenderer before the standstill period has expired. In case of complaints about tenders or decisions, e.g. award of contracts covered by Section II or III in the Danish Public Procurement Act must be submitted to the Complaints Board for Public Procurement (Klagenævnet for udbud) within 45 calendar days from the day after the contractor published a notice in the Official Journal on the conclusion of a contract. At the latest concurrently with submission of an appeal to the Complaints Board for Public Procurement, the complainant must inform the Contracting Authority of the alleged infringement, and whether the appeal is to be referred to the board.

Organisation, der leverer yderligere oplysninger om klageprocedurerne: Konkurrence- og Forbrugerstyrelsen

6. Resultater

Værdien af alle kontrakter tildelt i denne bekendtgørelse: 2 877 585,00 DKK

6.1. Resultat delkontrakt-ID: LOT-0000

Status for udvælgelse af vinder: Der er udvalgt mindst én vinder.

6.1.2. Oplysninger om vinderne

Vinder:

Officielt navn: Agilent Technologies Denmark

Tilbud:

Tilbud – Identifikator: 2025-0818352 - Purchase of CE/MS(Agilent Technologies)

ID for delkontrakt eller gruppe af delkontrakter: LOT-0000

Værdien af tilbuddet: 2 877 585,00 DKK

Kontraktoplysninger:

6.1.4. Statistiske oplysninger

Modtagne tilbud og ansøgninger om deltagelse:

Type modtagne indgivelser: Tilbud fra mikrovirksomheder samt små eller mellemstore virksomheder

Antal modtagne tilbud og ansøgninger om deltagelse: 1
