2.1. Procedure

Titel: Framework agreement digital development

Beskrivelse: The contracting authority currently has a framework agreement for development services, but the financial limit will be exhausted in the transition between the 1st and 2nd quarter of 2027. The call-offs on the contract have been significantly higher than originally expected. This is because the contract was established before the preliminary project for Digital grant management and before the extent of the further digitalisation commitment was clear. The aim of the new framework agreement is to ensure the Customer access to the necessary competence and/or capacity throughout the entire contract period. The tenderers shall be strategic cooperation partners and pro-active consultants, support the further digitalisation and contribute to solve the Contracting Authority's social assignment. The contract shall particularly support: The implementation of the commitment to Digital Grant Management and the development of Norad's digital platform. Development, further development and management of the Contracting Authority's data platform, including data integrations, data modelling, data quality, management information and analysis capability. • Establishment and further development of knowledge products, such as dashboards, reporting systems, insight and analysis tools, visualisations and other user interface, which makes management, case officers and other users more knowledge driven. • Reuse of data across systems and processes so that information can be used efficiently in grant management and the Contracting Authority's other management and reporting processes. • digitalisation of administrative services. • Use of digitalisation to strengthen the effect of Norwegian development cooperation, i.a. through better use of data, analysis and digital services for partners and other target groups. • establishment of a modern development factory where the Contracting Authority itself is in control of the deliveries. • strategic consultancy for the use of digital joint goods in the digitalisation of Norwegian assistance work.

Tildelingskriterium talværdi: 70

Kriterium:

Type: Kvalitet

Navn: Miljø

Beskrivelse: Justification that climate and environmental considerations are not an award criteria The procurement concerns a framework agreement for consultancy services, where the delivery mainly consists of knowledge based consulting, analysis, project assistance and the preparation of digital deliveries. The procurement does not include the purchase of goods, building and construction works, transport services or other deliveries that involve considerable use of resources, emissions or environmental impact. The contracting authority has assessed the nature, expected scope and delivery form of the procurement. The deliveries will mainly be carried out digitally and/or in the contracting authority's premises and are expected to have a limited need for materials, packaging, energy intensive equipment and travel activities. The climate footprint and the environmental impact of the procurement are therefore assessed together as immaterial. Based on this, the contracting authority uses the exception in the procurement regulations § 7-9 fifth paragraph. Climate and environmental considerations are therefore not weighted with a minimum of 30 percent as the award criteria. The contracting authority will, however, where relevant, facilitate digital meetings and deliveries and limit unnecessary travel activities in the execution of the contract.

Beskrivelse

:

Clarification of the assignment comprehension and the language need in the relevant call-offs.

This does not lead to other changes in the tender documentation.

10.1. **Ændring**

Afsnitsidentifikator: PROCEDURE

Beskrivelse af ændringer: Norad refers to the announced tender documentation for a framework agreement for development services. Emphasis is put on the fact that for the call-offs that are included in the competition, the offered consultant shall be able to communicate well in Norwegian, both orally and in writing, to the extent this is necessary for the execution of the assignment. This particularly applies to participation in multi-disciplinary teams, dialogue with business and users, as well as documentation and ongoing interaction in the assignment.

The clarification applies to the following call-offs: Annex 1-2 Call-offs full-stack developer

Annex 1-3 Call-off product designer Annex 1-4 Call-off data Annex 1-5 Call-off data
