2.1. Procedure

Titel: Framework agreement for pest control

Beskrivelse: Background Randaberg municipality and Sola municipality (henceforth referred to as the Contracting Authority) have a continual need for pest control services in municipal buildings, outside areas and sewage installations. The contract shall ensure legal execution, good follow-up, fixed reporting and relevant documentation throughout the entire contract period. The contracting authority places particular emphasis on the tenderer working systematically and preventively, using appropriate methods for mapping, preventing and controlling, and choosing systems that give the desired result with as few adverse effects as possible for health and the environment. Furthermore, it is important that the tenderer contributes with good guidance, close follow-up and continual improvement work. Description of the assignment The procurement is for a framework agreement for pest control and associated material for the Contracting Authority. The delivery shall cover the needs of municipal buildings and properties, water and sewage facilities as well as parks and public recreation areas. The assignment includes mapping, planned and routine preventive and controlling measures, targeted commitments, urgent calls for acute needs and the necessary advice and follow-up. It shall also be possible to order separate development packages for water and sewage redevelopment. The assignments shall be carried out by a certified pest control system and in accordance with the current rules.

Tildelingskriterium talværdi: 60

Kriterium:

Type: Kvalitet

Navn: Climate and environment

Beskrivelse: An assessment is made as to what degree the tenderer's offered systems and ways of working contribute to reduce the environmental impact of pest control. Tenderers shall describe: Limiting chemical pesticides How the need for chemical pesticides is assessed and what measures are used to limit its use. Alternative methods Which non-poisonous or other less environmentally depending methods are offered and in what situations these can be used. Equipment and technology The types of equipment, traps, monitoring and control tools that are used to reduce the impact of the environment and improve targeting. Follow-up and adaptation How the effect of the measures are followed up and how measures are adapted or terminated in order to avoid unnecessary use of combat agents. The evaluation will emphasise: Limiting chemical pesticides To what degree the tenderer's described procedure and measures help limit the use of chemical pest control agents without sacrificing effective pest control.

Alternative methods To what degree the tenderer offers and can use non-poisonous or other less environmentally appropriate methods when it is professionally suitable and how specific it is described when and how the methods are used. Equipment and technology To what degree the offered equipment, traps, monitoring and control tools contribute to more targeted pest control and reduced environmental impact. Follow-up and adaptation To what degree the tenderer's routines for follow-up contribute to the fact that measures can be adapted or ended on the basis of registered activity and effect, so that unnecessary use of combat agents is limited. The better the tenderer's described systems in total document concrete and efficient measures to reduce the impact of the environment, at the same time as the aim of the pest control is safeguarded.
