Kriterium:

Type: Kvalitet

Beskrivelse: The evaluation of the sub-criterion is described in the procurement documents.

Beskrivelse af den metode, der skal anvendes, hvis vægtningen ikke kan udtrykkes ved hjælp af kriterier: The evaluation model is of the type price models. This implies that for each tender a total evaluation price is calculated, which consists of the tender price adjusted with a fictitious addition or deduction for each of the qualitative sub criteria. These additions/ deductions are determined from the quality of the Tender in such a way that at an average quality no correction of the Tender price takes place, at a quality above average a deduction is granted in the Tender price and, at a quality below average an addition is provided of the Tender price. The total evaluation price is fictitious and is only for use for the evaluation, and thus it does not reflect the Contract price. The Contract will be awarded to the tenderer who has obtained the lowest total price of evaluation. The model is further described in the procurement documents.
