Beschreibung: Quality • Implementation ability • Functionality and user friendliness When evaluating the tenders, both fulfilment and fulfilment of A* and B requirements will be assessed positively. B requirements allow for additional points without non-fulfilment, whilst the A* requirements reward solutions that go beyond the minimum. The assessment will therefore emphasise how well the tenderer describes an implementation model that ensures safe and effective implementation, including clear roles, good organisation and a take-over process that enables the municipality to operate the system itself. Systems that offer more and more flexible notification methods, better digital supervision, more precise positioning, wider sensor support or a more intuitive administration interface will be considered more values. Tenders that provide increased security, simple operation and better adaptation to the users' needs will therefore be able to achieve a higher score. Beschreibung: • Fulfilment of service and support. When evaluating the tenders, fulfilment and fulfilment of A* requirements within service and maintenance will be assessed positively. A* requirement rewards suppliers who offer more than a minimum. Systems that provide increased operational security, high availability in the event of errors, proactive notification or follow-up mechanisms, or clear processes for reporting and quality control can achieve a higher score.
