Titel: 104-BYM-2025 Framework agreement for counts on the municipal road network 2026-2030.

Beschreibung: The aim of the procurement is to enter into framework agreement(s) for traffic registrations on the municipal road network in Oslo in the period 2026-2030, so that the municipality has obtained, quality assured and communicated the necessary traffic data in accordance with the road data regulations and internal/external needs. The scope is for the delivery of traffic data that covers both established needs (i.a. traffic volume, speed and longitudinal class) and new/expanded needs (i.a. counts for walking and cycling and more detailed data such as turning movements and driving patterns). In the work of facilitating a climate, environment and health-friendly transport system, good knowledge of high data quality on the existing traffic picture in the city, as well as consequences of changes, is very important. The agency thus needs to obtain traffic data for different road user groups and is hereby publishing traffic registrations on the municipal road network. There is continual development in methods for registering traffic and road user groups. As a result, the procurement is divided into two parts: Part A deals with the current situation and the need to operate and manage the current systems, including fixed counting points for vehicles and bicycles and temporary registrations in accordance with radar technology. Part B includes the agency's need for expanded insights into driving patterns, swing movements, road user shares, events and near-conflicts, liquidation, etc. The procurement is divided into two sub-contracts, sub-contract A covers the basic need and sub-contract B is open to systems that can provide more detailed traffic data, with separate award per sub-contract. Separate framework agreements will be signed per sub-contract (one tenderer per sub-contract). This framework agreement is valid for up to a maximum value of NOK 16 million. The estimate is only a guideline and is without obligation for the Contracting Authority. Sub-contract 1: * Periodical traffic registrations with radar and other counting equipment * Periodical cycling measurements with bicycle tubes * Operation and maintenance of traffic registration stations for vehicles. * Operation and maintenance of traffic registration stations for bicycles. Sub-contract 2: In addition to the needs mentioned in sub-contract A, the Agency for Urban Environment has traffic data needs that go beyond what we get from radar registrations and

fixed counting points. Some of these needs are currently solved in part by radar measurements (sub-contract A), whilst others do not. * Case 1 – Cross sectioning two lanes * Case 2 – Cross sectioning four to six lanes * Case 3 – Junction count 35 x 35 m * Case 4 – Junction count 50 x 50 m

2.1.6. Ausschlussgründe

Quellen der Ausschlussgründe: Bekanntmachung

Der Zahlungsunfähigkeit vergleichbare Lage gemäß nationaler Rechtsvorschriften: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Konkurs: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions

and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Korruption: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a enforceable verdict has been convicted of corruption by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Corruption as defined in Article 3 of the Convention on Combating Corruption, Involving European Communities or European Union Member States (EUT C 195 of 25.6.1997, s. 1), and in Article 2, point 1, in the Council's framework decision 2003/568/RIA of 22 July 2003 on combating corruption in the private sector (EUT L 192 of 31.7.2003, p. 54). This rejection reason also includes corruption as defined in national law for the contracting authority or supplier.

Vergleichsverfahren: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Beteiligung an einer kriminellen Vereinigung: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted verdict of participation in a criminal organisation by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Participation in a criminal organisation as defined in Article 2 of the Council's framework decision 2008/841/RIA of 24 October 2008 on combating organised crime (EUT L 300 of 11.11.2008, p. 42).

Vereinbarungen mit anderen Wirtschaftsteilnehmern zur Verzerrung des Wettbewerbs: Has the tenderer entered into agreement(s) with other tenderers with the intention of turning the competition?

Verstoß gegen umweltrechtliche Verpflichtungen: Is the tenderer aware of breaches of environmental provisions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Geldwäsche oder Terrorismusfinanzierung: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of money laundering or financing terrorism by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Money laundering or financing terrorism As defined in Article 1 of the European Parliament and Council Directive 2005/60/EF of 26 October 2005 on preventive measures against the use of the financial system for money laundering and financing terrorism (EUT L 309 of 25.11.2005, p. 15).

Betrug: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted of fraud has been convicted of fraud by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Fraud included in Article 1 of the Convention on protection of the Financial Interests of the European Communities (EFT C 316 of 27.11.1995, p. 48).

Kinderarbeit und andere Formen des Menschenhandels: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of child labour and other forms of human trafficking by a verdict handed down no more than five years ago, or a rejection period determined directly in the judgement that still applies? Child labour and other forms of human trafficking as defined in Article 2 of the European Parliament and council directive 2011/36/EU of 5. 1 April 2011 on the prevention and control of human trafficking and the protection of its victims and for compensation of the Council's framework decision 2002/629/RIA (EUT L 101 of 15.4.2011, p. 1).

Zahlungsunfähigkeit: Is the tenderer in an insolvency situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Verstoß gegen arbeitsrechtliche Verpflichtungen: Is the tenderer aware of breaches of provisions on working conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Verwaltung der Vermögenswerte durch einen Insolvenzverwalter: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Täuschung, Zurückhaltung von Informationen, Unfähigkeit zur Vorlage erforderlicher Unterlagen oder Erlangung vertraulicher Informationen zu dem Verfahren: Has the tenderer: a) given grossly incorrect information with the notification of the information required to verify that there is no basis for rejection, or of the qualification requirements being fulfilled, b) failed to provide such information, c) made reservations immediately to present the supporting documents requested by the contracting authority, or d) improperly affected the contracting authority's decision process to acquire confidential information that could give this an unlawful advantage in connection with competition, or negligently has given misleading information that can have a significant influence on decisions on rejection, selection or award?

Interessenkonflikt aufgrund seiner Teilnahme an dem Vergabeverfahren: Is the tenderer aware of a conflict of interest as stated in national law, the relevant notice or procurement documents?

Direkte oder indirekte Beteiligung an der Vorbereitung des Vergabeverfahrens: Has the tenderer or an entity associated with the supplier advised the contracting authority or in another way been involved in the planning of the competition?

Schwerwiegendes berufliches Fehlverhalten: Has the tenderer committed serious errors in professional practice? If relevant, see the definitions in national law, the relevant notice or procurement documents.

Vorzeitige Beendigung, Schadensersatz oder andere vergleichbare Sanktionen: Has the tenderer committed significant breaches of contract in connection with the fulfilment of a previous public contract, a previous contract with a public contracting authority or a previous concession contract, where the breach has led to the cancellation of the contract, compensation or other similar sanctions?

Verstoß gegen sozialrechtliche Verpflichtungen: Is the tenderer aware of breaches of provisions on social conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Verstoß gegen die Verpflichtung zur Entrichtung von Sozialversicherungsbeiträgen: Have tenderers failed to fulfil all their social security obligations in the country where they are established and in their member state, if this is a different country than what he is established in?

Einstellung der gewerblichen Tätigkeit: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Verstoß gegen die Verpflichtung zur Entrichtung von Steuern: Has the tenderer not fulfilled all of his tax and duty obligations in both the country where he is established and in the contracting authority's member state, if this is a different country than what he is established in?

Terroristische Straftaten oder Straftaten im Zusammenhang mit terroristischen Aktivitäten: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of acts of terrorism or criminal acts connected to terrorist activities by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Acts of terrorism or criminal acts relating to terrorist activity as defined in Article 1 and 3 of the Council's framework decision 2002/475/RIA of 13 June 2002 on combating terrorism (EFT L 164, af 22.6.2002, p. 3). This rejection reason also includes incitement to, participation or attempts to commit such actions as included in Article 4 in the mentioned framework decision.

Delikt im Zusammenhang mit seinem beruflichen Verhalten im Bereich der Beschaffung von Verteidigungsgütern: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, have been legally convicted of offences regarding professional behaviour in defence procurements?

Mangelnde Vertrauenswürdigkeit im Hinblick auf den Ausschluss von Risiken für die Sicherheit des Landes: Is the tenderer assessed to lack reliability that is necessary to exclude the risk of national security?

Verstoß gegen die in den rein innerstaatlichen Ausschlussgründen verankerten Verpflichtungen: The contracting authority shall state that in Norway there are national rejection reasons. These shall be described in the procurement documents. Tenderers must respond to whether they are in one or more of the situations described in the national rejection reasons.

5. Los

5.1. Los: LOT-0001

Titel: Sub-contract A: Traffic registrations - basic need

Beschreibung: Periodical traffic registrations with radar and other counting equipment. The aim is to register the number of vehicles and the speed of an average along the road with the use of its own current radar equipment and any future counting equipment that the Agency for Urban Environment can procure, such as future procurement of video recording equipment. This is both to use the rest of the life cycle of the equipment and to be able to carry out comparable measurements that have been previously carried out. The registrations are carried

out year round, with minor activity during school holidays (winter and autumn holidays, weeks 8 and 40 respectively), July/communal holidays and winter months December-February, depending on snow amounts. The standard length of the radar measurements is 7 full days, i. e. at least 168 hours. Tasks: * Assemble/disassemble radar/other counting equipment in accordance with orders * Report to the contracting authority when the radar is mounted * Sending raw data files from the measurements to the contracting authority * Storage and maintenance of radars (charging batteries, cleaning, etc.) Periodical cycling measurements with bicycle tubes The aim is to register the number of cyclists who pass a count section by using eco-tubes. Normally executed outside winter season. The standard length of the cycle measurements is 7 full days, i.e. at least 168 hours. Tasks: * The hoses are fastened in asphalt in accordance with the procedure and connected to a computer unit that is stuck on the pavement. * Device connects to the Eco-Visio cloud service, which logs data from recordings * Disassembly of measuring equipment * Storage and maintenance of equipment (including cleaning etc.) Operation and maintenance of traffic registration stations for vehicles. The contracting authority owns 13 traffic registration stations where measuring equipment is connected to inductive loops that are milled down in the roadway. The measuring equipment (Datarec Loop monitor) communicates with the "Traffic Data Portal" (trafikdata.no) to the Norwegian Public Roads Administration. Tasks: * Locate errors and report to the contracting authority (breaches of counting loops, electricity supply, damage to control cabinets, cables, etc.) * Does not include troubleshooting of measuring equipment and laying of inductive loops on asphalt * Annual audit of counters * Revision of equipment in accordance with the agreed checkpoints, includes all external and internal equipment such as locks, fasteners, batteries, connections, electricity supply, cables, modems, insulation, cleaning, lubrication, etc. See the assignment description for a list of the counting points. Operation and maintenance of traffic registration stations for bicycles. The Agency for Urban Environment owns 36 bicycle registration stations that register bicycles on the municipal road network in Oslo. The equipment consists of inductive loops milled down in the asphalt that are connected to a cycle counter/controller (Eco-Counter UZelt as of November 2025). The control unit is located together with the battery mainly in a manhole. It is generally not relevant to connect a counting point to fixed current. Sensors are installed in both roadways, cycle lanes and on cycle paths. The drives are connected to the Eco-Visio cloud service, which the Contracting Authority can download traffic data. Eco-Visio also enables operational monitoring. Tasks * Monitoring the counters and updating the status of the counters to the Contracting Authority. * Troubleshooting, including replacing the battery, re-establishment of counting stations etc. * Establishment of inductive loops is not included in the assignments * Annual audits in accordance with the agreed checkpoints. See the assignment description for a list of the counting points. Accessibility Requirements BYM orders counts throughout the entire year, with lower activity in case of heavy snowfall or in periods with staff holidays (weeks 8 and 40, Easter, July/August, Christmas holidays, holiday days in May), and higher in normal months such as March/April/June/September/October (except week 40)/November. Describe which resources you have available to carry out counts and possibly how you ensure deliveries to orders during periods of high activity despite any absence from key resources at your home (e. g. sickness).

Teilnahme ist nicht vorbehalten.

Auftragsvergabeprojekt nicht aus EU-Mitteln finanziert

Die Beschaffung fällt unter das Übereinkommen über das öffentliche Beschaffungswesen: ja

5.1.9. Eignungskriterien

Quellen der Auswahlkriterien: Bekanntmachung

Kriterium: Eintragung in das Handelsregister

Beschreibung des Auswahlkriteriums: The tenderer shall be a legally established company.

Documentation requirements: Norwegian companies: Company Registration Certificate.

Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the company is established.

Kriterium: Andere wirtschaftliche oder finanzielle Anforderungen

Beschreibung des Auswahlkriteriums: Tenderers must have sufficient economic and financial capacity to be able to fulfil the contract. Documentation requirements: The company's last Annual Financial Statements including notes, the Board's Annual Report and Audit Report, as well as new information of relevance to the company's fiscal numbers. The contracting authority reserves the right to obtain credit appraisal on its own initiative. If the tenderer has a justifiable reason (e.g. a recently started company) for not submitting the documentation required by the Contracting Authority, he can document his economic and financial capacity with any other document that the Contracting Authority deems suitable.

Kriterium: Umweltmanagementmaßnahmen

Beschreibung des Auswahlkriteriums: Tenderers are required to have implemented environmental management measures that ensure that the tenderer is suitable to fulfil the contract's environmental provisions. This means that the tenderer has methods for working actively and systematically to reduce negative environmental impact from activities connected to the execution of this Contract. Documentation requirements: A description of the tenderer's environmental management measures. If a tenderer has certificates from independent bodies that document the environmental management system, they can be presented as

documentation. Refer to the EU Scheme for Environmental Management and Environmental Audit (EMAS), other recognised environmental management systems in Regulation (EF) no. 1221/2009 article 45, or equivalent, and other environmental management standards based on relevant European or international standards from accredited bodies such as ISO 14001 or equivalent.

Kriterium: Maßnahmen zur Sicherstellung der Qualität

Beschreibung des Auswahlkriteriums: Tenderers shall have a relevant quality assurance system for the content of the contract. **Documentation requirements:** A description of the tenderer's quality assurance methods. Alternatively: Certificate for the company's quality assurance system issued by independent bodies that confirms the tenderer fulfils certain quality assurance standards, for example ISO 9001:2015.

Kriterium: Supply-Chain-Management

Beschreibung des Auswahlkriteriums: Tenderers shall be suitable for fulfilment of contractual requirements for due diligence assessments for responsible businesses. This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as to prevent environmental degradation and corruption. **Documentation requirements:** A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall include: * Formal policies/policies that cover an obligation to comply with the requirements of responsible businesses.

Kriterium: Referenzen zu bestimmten Lieferungen

Beschreibung des Auswahlkriteriums: Tenderers shall have good experience from equivalent assignments. By equivalent assignments we mean the execution of traffic registrations along the road for other private or public actors. **Documentation requirements:** Short description of the tenderer's three most relevant assignments during the last three years, including information on the contract's value, date of delivery as well as the name of the contracting authority and a description of the assignment's content.

Kriterium: Durchschnittliche jährliche Belegschaft

Beschreibung des Auswahlkriteriums: The tenderer shall have sufficient capacity to fulfil the contract. **Documentation requirements:** A description of the tenderer's overall organisation and the number of employees with core competence with connection to the delivery.

Zuschlagskriterium — Zahl: 60

Kriterium:

Art: Qualität

Beschreibung: Both climate footprint and environmental impact are considered to be limited in this procurement. The contract is for the execution of traffic registrations on the municipal road network, and the largest climate and environmental impact will be assessed for transport in connection with deployment, operation, moving and rigging down of registration equipment, as well as any site inspections and service assignments. Oslo municipality has implemented a standard requirement for the use of zero emission vehicles from 01.01.2025. As this will be an absolute requirement for the tenderers, and in addition there are qualification requirements that are related to climate and the environment, our assessment is that the use of these requirements actually contributes to reducing environmental risk to a greater degree compared to setting an award criterion on climate and the environment. By setting environmental requirements for the delivery and the tenderer, incentives are given to deliver as binding and environmentally friendly tender as possible within the framework for this service. This is considered to ensure the best climate footprint and environmental impact of the procurement. Setting such requirements as a minimum requirement will, according to the contracting authority's assessment, clearly give a better climate and environmental effect than considering other climate and environmental considerations in this procurement. Based on the above assessment, the contracting authority will use the exclusion provisions in the procurement regulations §7-9 fourth paragraph. The contracting authority is exempt from the obligations to weight the environment 30% or to prioritise the environment among the three highest prioritised award criteria in this procurement.

5.1. Los: LOT-0002

Titel: Sub-contract B: Traffic registrations - extended/detailed data (case based ordering).

Beschreibung: In addition to the needs mentioned in sub-contract A, the Agency for Urban Environment has traffic data needs that go beyond what we get from radar registrations and fixed counting points. Some of these needs are currently solved in part by radar measurements (sub-contract A), whilst others do not. We have described some typical cases we would like to resolve. For each case, we have described some data we need to obtain (equivalent "must-requirement") and some we would like to get out (equivalent "ought-requirement"). These are the points we evaluate. The ought requirements are divided into two importance categories, where category 1 is more important need than category 2 and therefore weighs heavier in the evaluation of the tender offer. The agency invites tenderers to submit a tender describing how they would solve the needs in each case and what such an implementation would cost. This part B does not include the procurement of equipment, and it is therefore a prerequisite that the tender includes the use of the tenderer's own equipment. As in sub-contract A, we need the tenderer to assemble and disassemble the equipment itself and provide the necessary guidance for use on assignments from the Agency for Urban Environment. Assembly/disassembly and any post-work (e.g. extractions and sending of data files, video analysis, other quality assurance, etc.) is therefore requested to be included in the tender. We have tried to take into account that different equipment has different marginal costs per day. For each case we have therefore estimated the number of identical orders for different periods: 24 hours, 72 hours, 1 week and 2 weeks. Some registrations may be relevant to carry out in shorter periods, without us asking for tender offers on it specifically. About subscriptions If any of the equipment or analyses require subscriptions, or would like to be less expensive when purchasing a subscription, the annual price for this is added to a separate column in the price form. The subscription price will only be added once per subscription; If the same subscription is used to solve multiple cases, do not type the same price for multiple cases, then the subscription cost will be summed up several times. However, if the subscription is offered at multiple levels, any additional costs required to reach the correct level to resolve a case must be included. For example, if step 1 holds to resolve case 1, the cost of step 1 is included in case 1. If you need step 2 to solve case 2, the additional cost for acquiring step 2 is to be added to the tender offer on case 2. If step 1 can be used to solve both cases, the entire cost will be added to case 1 and nothing on case 2. The offered prices per duration are to be filled in the attached price form sub-contract B. It will be the sum of the orders that will be seen as the offered price for sub-contract B. Case 1 - Cross sectioning two lanes We need to register traffic at Jens Bjelkes gate 35, in front of Vahl School. The road has two lanes with two-sided cycle lanes and two-sided pavements. There are torch and sign posts along the stretch. Westwards there is a short distance to a signal

regulated junction, and the queue must be expected to stretch from the junction past the registration section for parts of the period. The number of vehicles in each direction- Vehicle distribution in the categories light/heavy or short/long Speed of vehicles in each direction, preferably per vehicle, possibly averages/median/85 percentile per aggregated ten-minutes /quarters/hour. See the assignment description for categories. Estimated number of orders per annum: 24 hours: 10, 72 hours: 25, 7 days: 40, 2 weeks: 5. Case 2 - Cross sectioning four to six lanes We need to carry out an average of approx. at Økernveien 97, along with Hasle T. The road has five lanes with a mid-discount and a two-sided pavement. There are lampposts on the inside of the pavement. The average is approx. between two signal regulated junctions, and some queue past the registration section must be expected. With the exception of registrations in cycle lanes, our registration requirements are the same as in case 1. Estimated number of orders per annum: 24 hours: 10, 72 hours: 10, 7 days: 15, 2 weeks: 5. Case 3 - Junction count 35 x 35 m The Agency for Urban Environment needs to carry out a crossing count at the junction of Grenseveien x Økernveien. The crossing is asymmetrical, and the longest distance required (between the pedestrian crossings that cross økernveien) is measured at approx. 35 metres. See the assignment description for categories. Estimated number of orders per annum: 24 hours: 15, 72 hours: 20, 7 days: 5, 2 weeks: 3. Case 4 - Junction count 50 x 50 m The Agency for Urban Environment needs to register traffic in the roundabout in Ytre Ringvei x Strømsveien at Alna centre. In order to include all pedestrian crossings, we need to cover an area of approx. 50 x 50 m. With the exception of the size and lack of cycle lanes, we have the same requirements as in Case 3. Estimated number of orders per annum: 24 hours: 5, 72 hours: 10, 7 days 3 2 weeks: 0.
Interne Kennung: 5956

5.1.1. Zweck

Art des Auftrags: Dienstleistungen

Haupteinstufung (cpv): 79330000 Statistische Dienstleistungen

Zusätzliche Einstufung (cpv): 71311220 Dienstleistungen im Straßenbau, 63712700

Verkehrsregelung, 71311200 Beratung für Transportsysteme, 71311210 Beratung im Bereich Straßenbau, 71311300 Beratung im Bereich Infrastrukturen, 71318000 Beratungsdienste von Ingenieurbüros, 79300000 Markt- und Wirtschaftsforschung; Umfragen und Statistiken, 72000000 IT-Dienste: Beratung, Software-Entwicklung, Internet und Hilfestellung, 72300000 Datendienste, 72310000 Datenverarbeitung, 72320000 Datenbankdienste, 72330000 Inhalte- oder Datenstandardisierung und -Klassifizierung, 72900000 Computer-Backup-Dienste und Katalogkonvertierung, 45310000 Installation von elektrischen Leitungen, 45200000 Komplett- oder Teilbauleistungen im Hochbau sowie Tiefbauarbeiten

Optionen:

Beschreibung der Optionen: The contracting authority has an option to extend the contract for up to 1+1 years on unchanged terms. The option will be taken up automatically, unless the contracting authority notifies the tenderer that the option should not be taken up.

5.1.2. Erfüllungsort

Land, Gliederung (NUTS): Oslo (NO081)

Land: Norwegen

5.1.3. Geschätzte Dauer

Laufzeit: 48 Monate

5.1.6. Allgemeine Informationen

Vorbehaltene Teilnahme:

Teilnahme ist nicht vorbehalten.

Auftragsvergabeprojekt nicht aus EU-Mitteln finanziert

Die Beschaffung fällt unter das Übereinkommen über das öffentliche Beschaffungswesen: ja

5.1.9. Eignungskriterien

Quellen der Auswahlkriterien: Bekanntmachung

Kriterium: Eintragung in das Handelsregister

Beschreibung des Auswahlkriteriums: The tenderer shall be a legally established company.

Documentation requirements: Norwegian companies: Company Registration Certificate.

Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the company is established.

Kriterium: Andere wirtschaftliche oder finanzielle Anforderungen

Beschreibung des Auswahlkriteriums: Tenderers must have sufficient economic and financial capacity to be able to fulfil the contract. Documentation requirements: The company's last Annual Financial Statements including notes, the Board's Annual Report and Audit Report, as well as new information of relevance to the company's fiscal numbers. The contracting authority reserves the right to obtain credit appraisal on its own initiative. If the tenderer has a justifiable reason (e.g. a recently started company) for not submitting the documentation required by the Contracting Authority, he can document his economic and financial capacity with any other document that the Contracting Authority deems suitable.

Kriterium: Umweltmanagementmaßnahmen

Beschreibung des Auswahlkriteriums: Tenderers are required to have implemented environmental management measures that ensure that the tenderer is suitable to fulfil the contract's environmental provisions. This means that the tenderer has methods for working actively and systematically to reduce negative environmental impact from activities connected to the execution of this contract. Documentation requirements: A description of the tenderer's environmental management measures. If a tenderer has certificates from independent bodies that document the environmental management system, they can be presented as documentation. Refer to the EU Scheme for Environmental Management and Environmental Audit (EMAS), other recognised environmental management systems in Regulation (EF) no. 1221/2009 article 45, or equivalent, and other environmental management standards based on relevant European or international standards from accredited bodies such as ISO 14001 or equivalent.

Kriterium: Maßnahmen zur Sicherstellung der Qualität

Beschreibung des Auswahlkriteriums: Tenderers shall have a relevant quality assurance system for the content of the contract. Documentation requirements: A description of the tenderer's quality assurance methods. Alternatively: Certificate for the company's quality assurance system issued by independent bodies that confirms the tenderer fulfils certain quality assurance standards, for example ISO 9001:2015.

Kriterium: Supply-Chain-Management

Beschreibung des Auswahlkriteriums: Tenderers shall be suitable for fulfilment of contractual requirements for due diligence assessments for responsible businesses. This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as to prevent environmental degradation and corruption. Documentation requirements: A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for

multinational companies. The documentation shall include: * Formal policies/policies that cover an obligation to comply with the requirements of responsible businesses.

Kriterium: Referenzen zu bestimmten Lieferungen

Beschreibung des Auswahlkriteriums: Tenderers shall have good experience from equivalent assignments. By equivalent assignments we mean the execution of traffic registrations along the road for other private or public actors. Documentation requirements: Short description of the tenderer's three most relevant assignments during the last three years, including information on the contract's value, date of delivery as well as the name of the contracting authority and a description of the assignment's content.

Kriterium: Durchschnittliche jährliche Belegschaft

Beschreibung des Auswahlkriteriums: Tenderers must have sufficient capacity to fulfil the contract. Documentation requirements: A description of the tenderer's overall organisation and the number of employees with core competence with connection to the delivery.

Zuschlagskriterium — Zahl: 60

Kriterium:

Art: Qualität

Beschreibung: Both climate footprint and environmental impact are considered to be limited in this procurement. The contract is for the execution of traffic registrations on the municipal road network, and the largest climate and environmental impact will be assessed for transport in connection with deployment, operation, moving and rigging down of registration equipment, as well as any site inspections and service assignments. Oslo municipality has implemented a standard requirement for the use of zero emission vehicles from 01.01.2025. As this will be an absolute requirement for the tenderers, and in addition there are qualification requirements that are related to climate and the environment, our assessment is that the use of these requirements actually contributes to reducing environmental risk to a greater degree compared to setting an award criterion on climate and the environment. By setting environmental requirements for the delivery and the tenderer, incentives are given to deliver as binding and environmentally friendly tender as possible within the framework for this service. This is considered to ensure the best climate footprint and environmental impact of the procurement. Setting such requirements as a minimum requirement will, according to the contracting authority's assessment, clearly give a better climate and environmental effect than considering other climate and environmental considerations in this procurement. Based on the above assessment, the contracting authority will use the exclusion provisions in the procurement regulations §7-9 fourth paragraph. The contracting authority is exempt from the obligations to weight the environment 30% or to prioritise the environment among the three highest prioritised award criteria in this procurement.
