Titel: ESM platform with a system for user enquiries - Stage 1 - Qualification

Beschreibung: The Norwegian Parliament's current system for handling user enquiries, Footprints, is nearing the end of its technological lifetime and it no longer fulfils the requirements for modern, secure and effective case handling. For the users, the current situation means that enquiries need to be directed through several different channels – such as Footprints, email, telephone, SMS and physical attendance – which creates uncertainty as to where to address, who is following up, and what the status of the case is. In order to meet these challenges, the project New System for User Enquiries was established with the aim of acquiring and introducing a modern ESM platform (Enterprise Service Management), in which a new system for user enquiries is established as the first system on the platform. An ESM platform will not only replace Footprints, but at the same time give the Norwegian Parliament a common technological foundation for several types of work processes in the long term. Thus, the project addresses both the need for a new user enquiry system and the strategic need to ensure growth when the organisation is ready for it. The aim is to use a system that is secure, scalable and based on standardised processes and integrations. The platform approach facilitates further digitalisation, better data quality and more fact-based decisions. It also supports the Norwegian Parliament's need for efficiency, automation and overall management information. Future situation When the system is implemented, the Norwegian Parliament has adopted a flexible and scaleable platform that supports user enquiries as the first process, but which is also rigged to handle several work processes over time. The platform enables gradual development where the Norwegian Parliament itself manages the tempo, at the same time that the tenderer contributes with the necessary competence for configuration, development and implementation and its best practice and experience from other customers. The system is integrated with other systems through standard APIs/connectors and it provides a joint framework for processes and data basis. This provides consistent information across your organisation, improved data quality and management information, as well as support for fact-based priorities and strategic planning. Stortingets administrasjon gets a modern, comprehensive and user friendly platform that improves both internal work flow and the experience for the users. Unified processes and a common user interface contribute to fewer errors, better experiences and more efficient work flow. The system also facilitates increased

automation and digitalisation, and over time cost reductions are achieved by having several processes gathered in one platform, as well as security and privacy strengthened and the Starting now has a strong technological foundation that can be further developed gradually, scaled as needed and used across the organisation to support future digital needs and innovation. The procurement will be carried out with SSA-Sky as the contract basis and it is assumed that the system is delivered as a standardised cloud system (SaaS). This means that functionality, further development, security and operation are mainly safeguarded through the tenderer's established service model and standard updates. The described needs are based on experiences with the current Footprints system and the established ITSM processes, while also reflecting the Norwegian Parliament's need and ambition for further development within a modern cloud based service model. The requirement descriptions cover both direct support for established ITSM processes, such as Incident, Request, Change and Problem Management, as well as transverse needs such as joint entrance, dialogue, notifications, search, reporting, security, compliance and management. Combined, the needs shall provide a flexible possibility room where processes, services and applications can be configured, combined and further developed over time, also for new needs and services that are not currently fully known. The needs are formulated as business and functional needs, and not as detailed technical specifications. This has been done so that the Tenderer can offer systems that are primarily based on standard functionality in the cloud platform, in accordance with the principles in SSA-Sky. Both the current need and new or changed needs arising in the contract period The service provider shall, in their tender, describe how the system supports the needs within the framework of an SSA-Sky delivery, including how management, security, availability and further development are safeguarded throughout the contract period. The Norwegian Parliament sees a need for a solution that also allows for development and adaptation in the contract period. The descriptions of the needs are therefore formulated technology neutral and process independent, so that they can be covered through the tenderer's standard functionality, configuration and further development - both for the current use and for new needs that may arise. Tenderers shall describe in their tender how their solution: covers the Norwegian Parliament's need in a comprehensive manner supports established ITSM processes that provide low risk, high management friendly and good further development possibilities in accordance with SSA-Sky

Kennung des Verfahrens: ef0e33d8-fa8b-42fb-a506-463926cc7e16

Interne Kennung: 2025/8901

Verfahrensart: Verhandlungsverfahren mit vorheriger Veröffentlichung eines Aufrufs zum Wettbewerb/Verhandlungsverfahren

Das Verfahren wird beschleunigt: nein

Zentrale Elemente des Verfahrens: ESM platform with a system for user enquiries.

2.1.1. Zweck

Art des Auftrags: Dienstleistungen

Haupteinstufung (cpv): 72000000 IT-Dienste: Beratung, Software-Entwicklung, Internet und Hilfestellung

Zusätzliche Einstufung (cpv): 48000000 Softwarepaket und Informationssysteme, 48311100

Dokumentenverwaltungssystem, 48517000 IT-Softwarepaket, 72200000

Softwareprogrammierung und -beratung, 72260000 Dienstleistungen in Verbindung mit Software

2.1.2. Erfüllungsort

Land, Gliederung (NUTS): Oslo (NO081)

Land: Norwegen

2.1.4. Allgemeine Informationen

Rechtsgrundlage:

Richtlinie 2014/24/EU

Anskaffelsesforskriften - Negotiated procedure. The first phase is qualification and the second phase is a competition. All relevant documents are available in both phases. A RFI has been carried out before the outset of competition: <https://www.doffin.no/notices/2026-104558>

Anskaffelsesforskriften - Amendment to the notice form regarding the number of suppliers that go on to negotiations

2.1.6. Ausschlussgründe

Quellen der Ausschlussgründe: Einheitliche Europäische Eigenerklärung (EEE)

5.1.2. Erfüllungsort

Land, Gliederung (NUTS): Oslo (NO081)

Land: Norwegen

5.1.3. Geschätzte Dauer

Datum des Beginns: 30/10/2026

Enddatum der Laufzeit: 31/10/2036

5.1.6. Allgemeine Informationen

Vorbehaltene Teilnahme:

Teilnahme ist nicht vorbehalten.

Auftragsvergabeprojekt nicht aus EU-Mitteln finanziert

Die Beschaffung fällt unter das Übereinkommen über das öffentliche Beschaffungswesen: ja

5.1.9. Eignungskriterien

Quellen der Eignungskriterien: Einheitliche Europäische Eigenerklärung (EEE)

Informationen über die zweite Phase eines zweiphasigen Verfahrens:

Mindestzahl der zur zweiten Phase des Verfahrens einzuladenden Bewerber: 3

Höchstzahl der zur zweiten Phase des Verfahrens einzuladenden Bewerber: 5

Das Verfahren wird in mehreren aufeinanderfolgenden Phasen durchgeführt. In jeder Phase können einige Teilnehmer ausgeschlossen werden

Der Erwerber behält sich das Recht vor, den Auftrag aufgrund der ursprünglichen Angebote ohne weitere Verhandlungen zu vergeben

5.1.11. Auftragsunterlagen

Sprachen, in denen die Auftragsunterlagen offiziell verfügbar sind: Norwegisch

Internetadresse der Auftragsunterlagen: <https://permalink.mercell.com/281577992.aspx>

5.1.12. Bedingungen für die Auftragsvergabe

Bedingungen für die Einreichung:

Elektronische Einreichung: Erforderlich

Adresse für die Einreichung: <https://permalink.mercell.com/281577992.aspx>

Sprachen, in denen Angebote oder Teilnahmeanträge eingereicht werden können: Norwegisch

Elektronischer Katalog: Nicht zulässig

Fortgeschrittene oder qualifizierte elektronische Signatur oder Siegel (im Sinne der Verordnung (EU) Nr 910/2014) erforderlich

Varianten: Nicht zulässig

Frist für den Eingang der Teilnahmeanträge: 22/06/2026 10:00:00 (UTC+00:00)

Westeuropäische Zeit, GMT

Auftragsbedingungen:

Die Auftragsausführung muss im Rahmen von Programmen für geschützte

Beschäftigungsverhältnisse erfolgen: Nein

Elektronische Rechnungsstellung: Erforderlich

Aufträge werden elektronisch erteilt: ja

Zahlungen werden elektronisch geleistet: ja

5.1.15. Techniken

Rahmenvereinbarung:

Keine Rahmenvereinbarung

Informationen über das dynamische Beschaffungssystem:

Kein dynamisches Beschaffungssystem

5.1.16. Weitere Informationen, Schlichtung und Nachprüfung

Überprüfungsstelle: Oslo tingrett

Informationen über die Überprüfungsfristen: See the tender documentation and loa/FOA

Organisation, die weitere Informationen für die Nachprüfungsverfahren bereitstellt: Oslo tingrett
