2.1.4. Allgemeine Informationen

Zusätzliche Informationen: The Public Procurement Regulations §7-9: The Contracting Authority uses the exclusionary provision in the Public Procurement Regulations § 7-9 fourth paragraph, the first period. An assessment of the procurement's expected climate and environmental impact has been carried out prior to the procurement. In this assessment, material use, transport and site operations are particularly identified as the main sources for climate gas emissions in the project. The contracting authority has assessed that climate and environmental considerations in this procurement are overall safeguarded better through a combination of targeted award criteria, minimum requirements and contract requirements than by exclusively using award criteria with a weighting of minimum 30%. The assessment is based on identified emission sources and how these can best be controlled in the project. This is justified below. After a concrete assessment, the contracting authority has determined the weighting of climate and environmental considerations to 20%. The weighting reflects that the most important climate effects are ensured through absolute requirements, whilst the remaining differences between the tenders are mainly related to optimisation within these frameworks. It is assumed that the most important climate effects in the project are best ensured through clear and binding requirements in the requirement specifications and contract follow-up. The contracting authority estimates that a higher weighting of climate and environmental considerations will, to a small extent, give further real climate effect, as the most central emission drivers are already regulated through requirements. A higher weighted award criteria will mainly give a count of minor variations between tenders that fulfil the stipulated environmental requirements and will, to a greater degree, lead to an evaluation of marginal differences between the tenders. Material use is a significant part of the project's climate gas emissions in construction projects, and concrete is normally one of the largest emission drivers. For the relevant procurement possible to use a significant volume of concrete and this is identified as a major source of emissions in the project. The contracting authority therefore assesses that the use of low carbon concrete is the single measure that gives the greatest direct and documentable climate effect in the project, and has therefore chosen to link the award criterion "Environment" to this relationship. The contracting authority has assessed several environment related sub-criteria, but after a total assessment has chosen a total award criteria for the use of low carbon concrete. Other environmental conditions are either assessed to have a lower effect on the total climate footprint, or to be little suitable to distinguish between suppliers. The award criteria for the use of low carbon concrete is assessed as the most relevant and verifiable criteria, at the same time as the criterion is suitable for an objective evaluation and real climate effect. The contracting authority has assessed several alternative environmental criteria. This applies, among other things, to transport, waste and site operations. After an overall assessment, it has been assessed that several of these give, according to the contracting authority's assessment, limited climate effect, compared with the use of low carbon concrete, are suitable to a limited degree to differentiate between suppliers, or are better suited as contract requirements than the award criteria. The contracting authority has therefore chosen to regulate a number of other climate and environmental conditions through the minimum requirements and contract requirements. These requirements are designed to ensure a minimum level for all suppliers and therefore provide a predictable climate effect. This includes, among other things: requirements for waste management and increased sorting degree, requirements for mass handling and reduction of transport and deposit, requirements for vehicles and limitations on idling, requirements for sustainable wood, requirements related to environmental toxins and documentation, as well as requirements for inspections, documentation and verifiability in the implementation of the contract. The requirements will be followed-up through contract follow-up, including

documentation requirements and control routines, to ensure actual compliance. The contracting authority assesses that the combination of a targeted and substantiated award criteria for low carbon concrete, combined with comprehensive minimum requirements and contract requirements, as well as systematic follow-up, in total provides a better climate and environmental effect and safeguards the considerations in a real and proportional manner in accordance with the Public Procurement Regulations § 7-9. The contracting authority considers, on this basis, that it is clear that this system provides better climate and environmental effect than weighting climate and environmental considerations with a minimum of 30% and/or utilising several award criteria. Please note that the tender deadline stated in Doffin (19.06.2026) is the deadline for registering for pre-qualification (phase 1). Further information on the deadlines is in the tender documents.

5.1.9. Eignungskriterien

Quellen der Eignungskriterien: Bekanntmachung

Kriterium: Eintragung in ein relevantes Berufsregister

Beschreibung des Eignungskriteriums: Tenderers are registered in a professional register in the member state in which the tenderer is established. As described in annex XI of directive 2014/24/EU; suppliers from certain member states may have to fulfil other requirements in the mentioned annex.

Kriterium: Eintragung in das Handelsregister

Beschreibung des Eignungskriteriums: Tenderers are registered in a company register or a trade register in the member state in which the tenderer is established. As described in annex XI of directive 2014/24/EU; suppliers from certain member states may have to fulfil other requirements in the mentioned annex.

Kriterium: Genehmigung oder Mitgliedschaft in einer bestimmten Organisation erforderlich für Dienstleistungsverträge

Beschreibung des Eignungskriteriums: Is it necessary to have specific authorisation from a particular organisation in order to provide the service in the tenderer's home country?

Kriterium: Genehmigung oder Mitgliedschaft in einer bestimmten Organisation erforderlich für Dienstleistungsverträge

Beschreibung des Eignungskriteriums: Is it necessary to have a particular membership in a particular organisation in order to provide the service in the tenderer's home country?

Kriterium: Maßnahmen zur Sicherstellung der Qualität

Beschreibung des Eignungskriteriums: For goods or services that are complicated, or that in exceptional cases shall be used for a particular purpose: Will the tenderer allow checks of the tenderer's production capacity or technical capacity and, where necessary, of the survey and research facilities that the tenderer has at its disposal and of quality control measures? The inspections shall be undertaken by the contracting authority or the contracting authority can leave it to a competent public body in the country where the tenderer is established.

Kriterium: Muster, Beschreibungen oder Fotos ohne Echtheitszertifikat

Beschreibung des Eignungskriteriums: Procurement of goods: The tenderer presents supplies that shall be delivered, requested samples, descriptions or photographs, which do not need to be accompanied by certificates that they are genuine.

Kriterium: Muster, Beschreibungen oder Fotos mit Echtheitszertifikat für Lieferverträge

Beschreibung des Eignungskriteriums: When procurement of goods: If requested, the tenderer further declares that they will deliver the requested certificates that they are genuine.

Kriterium: Zertifikate von Qualitätskontrollinstituten

Beschreibung des Eignungskriteriums: Can tenderers submit the requested certificates issued by official bodies for quality control, and who can confirm that the goods, which are clearly identified by reference to technical specifications or standards, as determined in the notice or in the procurement documents, are in accordance with these?

Kriterium: Zertifikate von unabhängigen Stellen über Qualitätssicherungsstandards

Beschreibung des Eignungskriteriums: Can tenderers submit certificates issued by independent bodies that document that the tenderer fulfils the stated quality assurance standards, including universal design requirements?

Kriterium: Zertifikate von unabhängigen Stellen über Umweltmanagementsysteme oder -standards

Beschreibung des Eignungskriteriums: Is the tenderer able to submit certificates issued by independent bodies as documentation that the tenderer fulfils the stated environmental management systems or standards?

Kriterium: Andere wirtschaftliche oder finanzielle Anforderungen

Beschreibung des Eignungskriteriums: Payment of tax, VAT and other public duties: This requirement only applies to Norwegian tenderers. Requirements: Tenderers must have their tax, payroll tax and VAT payments in order in accordance with the legal provisions and the tenderer must not have significant arrears. Any arrears or other irregularities must be justified. Documentation requirement: Tenderers shall document the requirement through the certificate "Information on tax and duties". The certificate shall be of the type "RF-1507" and not "RF-1316". Tenderers can order such a certificate from the Norwegian Tax Administration on behalf of their activities. Tenderers are requested to enclose the certificate in the tender. The tax certificate must not be older than six months calculated from the deadline for receipt of tenders. Read about the certificate here: <https://www.skatteetaten.no/skjema/opplysninger-om-skatt-og-avgift/>

Kriterium: Andere wirtschaftliche oder finanzielle Anforderungen

Beschreibung des Eignungskriteriums: Credit rating: Requirements: Tenderers must have the financial capacity to execute the contract. The tenderer is required to be credit worthy, minimum A, in accordance with Dun & Bradstreet's service riskguardian suite (<https://riskguardian.bisnode.no>), or have the financial capacity to execute the contract based on the contracting authority's discretion. Documentation requirement: The contracting authority will carry out their own assessment of the tenderer's finances through the RiskGuardian Suite (RGS). Tenderers can enclose other necessary information if the tenderer believes that the RGS does not provide a correct picture of the financial situation, e.g. with a lower credit rating than required. This can be an account of how the tenderer believes to still fulfil the requirement, with documentation that supports this (e.g. accounts, annual reports, etc.). If a tenderer has doubts about whether they fulfil the requirement and would like to rely on other entities for fulfilment (e.g. through a parent company guarantee), the tenderer must enclose a binding statement from the relevant company in their tender. The RGS comprises all Nordic countries. As a main rule, the contracting authority will not accept credit ratings from other company and accounting information systems than RGS due to equal treatment of the tenderers. Foreign tenderers outside the Nordic countries will, however, use and accept credit appraisal through Dun & Bradstreet's service D&B Finance Analytics. Tenderers that the contracting authority cannot find at RGS (or Credit for suppliers outside the Nordic countries), e.g. newly established tenderers who have not built up a basis for a credit rating, must enclose a declaration/guarantee from a parent company/owner/bank or similar financing institutions, regarding the company's financial and economic position.

Kriterium: Referenzen zu bestimmten Lieferungen

Beschreibung des Eignungskriteriums: Technical and professional capacity of the tenderer: The tenderer shall have experience from two relevant assignments during the last ten years. If

a tenderer attaches more than two experiences, only the first two will be assessed. Relevant assignments are in this context defined as projects that are comparable with the actual assignment in regards to: contract form (turnkey contract), financial scope (minimum contract value for the tenderer NOK 70 million excluding VAT), and technical complexity (with comparable technical complexity means experience from projects with a comparable degree of technical systems, integration between disciplines and operational security requirements.) The following project types are normally seen as fulfilling the requirement: Fire Station Police station or other stand-by building Hospital, emergency doctor surgery or emergency centre. Prison or other high-security institution Advanced school buildings, including schools with special functions such as laboratories, workshops and resource departments. Multi sports halls, i.e. sports halls with advanced control systems for, among other things, lighting, ventilation and heating, adapted for several sports and forms of use. The following project types are not normally seen as having equivalent technical complexity: Office buildings Blocks of flats Simple business buildings Nursery Shopping malls The experience can be built up by the tenderer's/or key personnel at the tenderer. Documentation requirement: The tenderer shall use annex "Part 0 Annex 4 the Tenderer's experience" for filling in. For each project, the overview shall include: Project name Type of contract (e.g. stating which NS contract is the basis) Area (gross area) Period that the project was executed (start date end date) Contract value (for the tenderer) Project Description: Brief description of the contract work, including the project's technical complexity Statement of which work was carried out by the tenderer and which work was possibly carried out by sub-suppliers (contract helpers). NB! The project description shall not exceed 250 words per project. If the word limit is exceeded, only the first 250 words will form the basis for the assessment. Further information will not be considered. Name and contact information of the contracting authority (reference*) *Note that references may be contacted to confirm the project

5.1.10. Zuschlagskriterien

Kriterium:

Art: Preis

Bezeichnung: Price

Beschreibung: Orientation: Tenderers shall fill in the attached price form in their cost calculations, Part II annex F.1 Price Form and submit it as an annex to the tender in Excel format. All fields in the attached price form marked with yellow shall be completed. Missing the

price fields can cause difficulties in assessing the tender and the tender can then be rejected. All prices are in NOK, excluding VAT, including all direct or indirect expenses and duties that could be incurred in connection with the delivery. Order fees and invoice fees are to be seen as expenses. The prices shall include all costs for the customer who is included in this competition. Costs that the tenderer knows will be incurred, but that are not specifically stated in the tender, will be seen as included in the stated costs. Evaluation: The total sum from the price form will form the basis of the price evaluation. This also includes options that are priced in the price form. This applies with the exception of an option for facilitating for future expansion of the office area, see annex C.2.6 Option 15. When assessing the price, a hybrid model with break point 1 will be used. The attached template for the evaluation model is attached: "Part I Annex T.1 Template - Evaluation Award Criteria Price". The tenderer's total points for this award criteria is weighted with the award criteria's weighting percentage. Bezeichnung: Environment

Beschreibung: When evaluating, there will be a procuremental total assessment of the described systems. The achieved point score will be multiplied by the weighting of the tenderer. Orientation: The contracting authority would like to reduce greenhouse gas emissions connected to the use of concrete and would like to optimise for use of low carbon concrete class A, alternatively class B, in accordance with The Norwegian Concrete Association's definitions. Tenderers shall document the offered solution by stating the share of low carbon concrete of the total concrete volume, divided between class A and class B. The documentation shall as a minimum contain: percentage of unclassified concrete, low carbon concrete class A and class B. Description of the basis for the estimates. The tenderer shall use the annex "Part I Annex T.2 Miljø". The stated solution will be seen as binding for the implementation of the contract. The contracting authority reserves the right to check the documentation during the contract period. During the contract period the tenderer shall be able to document which low carbon class was actually delivered. The documentation shall be verifiable and it can include product documentation (EPD or equivalent), delivery documentation from the concrete supplier and the invoice documentation. Invoices shall be sufficiently specified to state which concrete class was delivered and that it has been delivered for this project. The contracting authority reserves the right to check the documentation during the contract period. Evaluation: The criteria will be assessed based on the calculated equivalent share of low carbon concrete of the total concrete volume. The following calculation will form the basis of the calculation: Low carbon concrete class A: 100 % Low carbon concrete class B: 50 % Unclassified concrete: 0 % Points scale Calculation example: 40% class A and 40% class B → $40\% + (40\% \times 0.5) = 60\% = 8 \text{ points}$ Missing or incomplete completion of the documentation in accordance with the description above, can result in 0 points.
