Titel: OAS - Education administrative system Lillehammer Øyer and Gausdal

Beschreibung: Lillehammer, Øyer and Gausdal municipalities are carrying out a joint procurement of education administrative systems for the municipalities' services in nurseries, primary and lower secondary schools with before-and-after-school care, educational-psychological services (PPT) and adult education. The procurement will be carried out in cooperation with the municipalities' joint ICT supplier IKOMM AS, who can assist with mercantile execution and project management. The education area in the three municipalities combined constitutes a comprehensive and socially critical service area with considerable complexity and large requirements for efficient interaction, information security and long-term development of the systems. The municipalities have a total of approx. 41,000 inhabitants and an education area consisting of municipal and private nurseries, primary and secondary schools, before-and-after-school care, PPT services and adult education. The procurement will be carried out as a negotiated procedure in accordance with part III of the regulations (EEA notice) and based on SSA-L with the accompanying annexes. The municipalities have chosen a modular procurement strategy to facilitate the best possible combination of functionality, quality, user friendliness and further development within the different disciplines. The procurement is therefore divided into the following sub-contracts: * Sub-contract 1 - Nursery administration * Sub-contract 2 - Primary and secondary schools and before-and-after-school care * Sub-contract 3 – PPT * Sub-contract 4 - Adult education Tenderers can submit tenders for one, several or all sub-contracts. Each sub-contract will be evaluated, assessed and awarded individually. The contracting authority reserves the right to enter into a contract with one or several tenderers. At the same time, the municipalities would like to ensure uniform and future orientated system architecture across the sub-contracts. Integrations, interface and interaction between the systems will therefore be a central theme in the competition. Tenderers shall describe how the systems support interaction between the sub-contracts, as well as integration with other municipal system portfolios and relevant national joint components. Separate requirement documents (Annex 1) have been prepared for each of the 4 sub-contracts in addition to the common requirement areas. The requirements will describe the functional, technical and integration needs within each discipline. The municipalities attach

great importance to information security, privacy and the suppliers' ability to long-term further development of the systems. The systems shall support the processing of sensitive personal data for children, pupils and users of the services, and at the same time facilitate efficient and user friendly work processes for employees, guardians and administration. The procurement shall contribute to modernising and further development of the municipalities' digital education services, with the aim of increasing quality, better interaction and more efficient administrative processes over time.

Kriterium: Eintragung in ein relevantes Berufsregister

Beschreibung des Auswahlkriteriums: Tenderers shall be a legally established company and registered in a company register, professional register or trade register in the country where

the tenderer is established. Documentation requirements: Norwegian tenderers shall enclose a company registration certificate from the Brønnøysund Register Centre. Foreign tenderers shall submit equivalent documentation from the public company register in the country where the business is established.

Kriterium: Andere wirtschaftliche oder finanzielle Anforderungen

Beschreibung des Auswahlkriteriums: Tenderers must have sufficient economic and financial capacity to fulfil the contract for the sub-contracts that the tenderer is seeking qualification for. Tenderers shall be credit worthy without a requirement for provision of security.

Documentation requirements: Tenderers shall provide a credit rating or credit rating from an approved credit information company based on the last available accounting figures. The Contracting Authority can, in addition, obtain or request Annual Financial Statements, notes, the auditor's report and other relevant financial documentation. For recently established companies or suppliers where a credit rating does not provide sufficient basis, the tenderer can document financial capacity in another suitable manner, for example, by a parent company guarantee, bank guarantee or other binding documentation. The company that the tenderer will use must document that it meets the requirement.

Kriterium: Referenzen zu bestimmten Dienstleistungen

Beschreibung des Auswahlkriteriums: Tenderers shall have relevant experience from deliveries of education administrative systems or equivalent trade systems of comparable complexity. Experience from Norwegian municipalities or other public sector will be emphasised. Documentation requirements: Tenderers shall state a minimum of three and a maximum of five relevant reference projects from the last five years. The references shall, as a minimum, state: * customer/contracting authority * gender neutral preferred at the reference customer * contract period * scope and value, if stated * which sub-areas/modules were delivered. * number of users/municipalities or equivalent extent. * the tenderer's role in the delivery * establishment/migration * integrations * operation, support and further development. The contracting authority reserves the right to contact the references and to obtain their own experience from relevant deliveries.

Kriterium: Techniker oder technische Stellen zur Durchführung der Arbeiten

Beschreibung des Auswahlkriteriums: Tenderers shall have sufficient technical and professional capacity to establish, operate, support, maintain and further develop the systems throughout the contract period. Documentation requirements: Tenderers shall describe: * Organisation and Manpower * relevant professional environments * Implementation Team * support and management organisation * development environment/product team * key competence * Capacity for the sub-contracts that the tenderer is applying for qualification for

Kriterium: Techniker oder technische Stellen zur Durchführung der Arbeiten

Beschreibung des Auswahlkriteriums: Tenderers shall document active and systematic further development of the systems, as well as the capacity for long-term product development in the contract period. Documentation requirements: Tenderers shall describe: * overall product strategy * roadmap for the next 3-5 years * development methodology * release model * how legislative and regulatory changes are handled * how customers are involved in prioritising further development * development capacity and organisation of product development

Kriterium: Informationssicherheit

Beschreibung des Auswahlkriteriums: Tenderers shall have an established management system, routines and technical/organisational measures for information security that is suitable

for the processing of sensitive personal information in the municipal education sector.
Documentation requirements: Tenderers shall present a valid ISO/IEC 27001 certificate or equivalent documentation. If there is no certification, the tenderer shall document their management system and routines for information security, including: * risk management * Access management * logging * Event Handler * handling vulnerability * Secure Development * stand-by and continuity

Kriterium: Informationssicherheit

Beschreibung des Auswahlkriteriums: Tenderers shall have routines and documented maturity for compliance with the data protection regulations, including handling data processing responsibility, built-in privacy and the processing of information about children and pupils.
Documentation requirements: Tenderers shall describe: * Privacy Management * data processing role * routines for processing protocols * assistance with DPIA/data protection consequences assessment. * handling deviations * deletion and access * logging * use of sub-suppliers * transfer of personal data, including any processing outside the Norway/EEA ISO /IEC 27701 or equivalent documentation can be enclosed if the tenderer has this.

Kriterium: Maßnahmen zur Sicherstellung der Qualität

Beschreibung des Auswahlkriteriums: Tenderers shall have an established quality system that ensures systematic work with delivery quality, deviations, change management, customer satisfaction and continual improvement. Documentation requirements: The tenderer shall present an ISO 9001 certificate or equivalent documentation. If there is no certification, the tenderer can document a quality system through a quality hand book, process descriptions, deviation routines, change routines or other relevant documentation.

Kriterium: Umweltmanagementmaßnahmen

Beschreibung des Auswahlkriteriums: Tenderers shall have routines or a system for environmental management that is relevant for the delivery. Documentation requirements: Tenderers shall present ISO 14001, Miljøfyrtårn, EMAS or equivalent documentation. If there is no certification, the tenderer can document internal environmental goals, routines and measures.

Kriterium: Relevante Bildungs- und Berufsqualifikationen

Beschreibung des Auswahlkriteriums: Tenderers shall be able to deliver project implementation, support, training, customer dialogue and contract follow-up in Norwegian. Tenderers shall have established capacity in Norway or be able to document equivalent binding delivery apparatus for Norwegian customer dialogue and support. Documentation requirements: Tenderers shall describe: * Norwegian customer team * support function * learning resources * language competence * availability for project implementation and customer meetings * any use of a Norwegian partner or sub-supplier If the tenderer relies on other companies to fulfil the requirement, this shall be documented by a commitment statement.

Kriterium: Techniker oder technische Stellen zur Durchführung der Arbeiten

Beschreibung: An assessment has been made of environmental requirements and environmental weighting in the procurement in accordance with the procurement regulations and the Public Procurement Regulations § 5. The procurement concerns a standardised software service/SaaS system where the environmental impact is mainly indirectly and to a limited degree affected by the actual competition or the evaluation of the tenders.

Environmental requirements in this procurement are considered not to have sufficient real management effect or be suitable for separating the tenders in an objective and competitive relevant manner. The procurement is, therefore, instead aimed at conditions that are considered to be of greatest importance for goal achievement and social benefit, including functionality, security, integrations, service quality, lifecycle costs and sustainable operation through cloud based standard systems. Based on this, it is assessed as proportional and professionally justified not to use the environment as a separate award criteria in this competition.

Beschreibung: An assessment has been made of environmental requirements and environmental weighting in the procurement in accordance with the procurement regulations and the Public Procurement Regulations § 5. The procurement concerns a standardised software service/SaaS system where the environmental impact is mainly indirectly and to a limited degree affected by the actual competition or the evaluation of the tenders.

Environmental requirements in this procurement are considered not to have sufficient real management effect or be suitable for separating the tenders in an objective and competitive relevant manner. The procurement is, therefore, instead aimed at conditions that are considered to be of greatest importance for goal achievement and social benefit, including functionality, security, integrations, service quality, lifecycle costs and sustainable operation through cloud based standard systems. Based on this, it is assessed as proportional and

professionally justified not to use the environment as a separate award criteria in this competition.

Quellen der Auswahlkriterien: Bekanntmachung

Kriterium: Eintragung in ein relevantes Berufsregister

Beschreibung des Auswahlkriteriums: Tenderers shall be a legally established company and registered in a company register, professional register or trade register in the country where the tenderer is established. Documentation requirements: Norwegian tenderers shall enclose a company registration certificate from the Brønnøysund Register Centre. Foreign tenderers shall submit equivalent documentation from the public company register in the country where the business is established.

Kriterium: Andere wirtschaftliche oder finanzielle Anforderungen

Beschreibung des Auswahlkriteriums: Tenderers must have sufficient economic and financial capacity to fulfil the contract for the sub-contracts that the tenderer is seeking qualification for.

Tenderers shall be credit worthy without a requirement for provision of security.

Documentation requirements: Tenderers shall provide a credit rating or credit rating from an approved credit information company based on the last available accounting figures. The Contracting Authority can, in addition, obtain or request Annual Financial Statements, notes, the auditor's report and other relevant financial documentation. For recently established companies or suppliers where a credit rating does not provide sufficient basis, the tenderer can document financial capacity in another suitable manner, for example, by a parent company guarantee, bank guarantee or other binding documentation. The company that the tenderer will use must document that it meets the requirement.

Kriterium: Referenzen zu bestimmten Dienstleistungen

Beschreibung des Auswahlkriteriums: Tenderers shall have relevant experience from deliveries of education administrative systems or equivalent trade systems of comparable

complexity. Experience from Norwegian municipalities or other public sector will be emphasised. Documentation requirements: Tenderers shall state a minimum of three and a maximum of five relevant reference projects from the last five years. The references shall, as a minimum, state: * customer/contracting authority * gender neutral preferred at the reference customer * contract period * scope and value, if stated * which sub-areas/modules were delivered. * number of users/municipalities or equivalent extent. * the tenderer's role in the delivery * establishment/migration * integrations * operation, support and further development The contracting authority reserves the right to contact the references and to obtain their own experience from relevant deliveries.

Kriterium: Techniker oder technische Stellen zur Durchführung der Arbeiten

Beschreibung des Auswahlkriteriums: Tenderers shall have sufficient technical and professional capacity to establish, operate, support, maintain and further develop the systems throughout the contract period. Documentation requirements: Tenderers shall describe: * Organisation and Manpower * relevant professional environments * Implementation Team * support and management organisation * development environment/product team * key competence * Capacity for the sub-contracts that the tenderer is applying for qualification for

Kriterium: Techniker oder technische Stellen zur Durchführung der Arbeiten

Beschreibung des Auswahlkriteriums: Tenderers shall document active and systematic further development of the systems, as well as the capacity for long-term product development in the contract period. Documentation requirements: Tenderers shall describe: * overall product strategy * roadmap for the next 3-5 years * development methodology * release model * how legislative and regulatory changes are handled * how customers are involved in prioritising further development * development capacity and organisation of product development

Kriterium: Informationssicherheit

Beschreibung des Auswahlkriteriums: Tenderers shall have an established management system, routines and technical/organisational measures for information security that is suitable for the processing of sensitive personal information in the municipal education sector. Documentation requirements: Tenderers shall present a valid ISO/IEC 27001 certificate or equivalent documentation. If there is no certification, the tenderer shall document their management system and routines for information security, including: * risk management * Access management * logging * Event Handler * handling vulnerability * Secure Development * stand-by and continuity

5.1. Los: LOT-0004

Titel: Adult Education System

Beschreibung: The sub-agreement comprises systems for administration and follow-up within adult education and will be carried out as an option. The system shall support central administrative processes connected to pupil administration, course and teaching follow-up, reporting and communication. The municipalities want flexible systems that can be adapted to changes in organisation, rules and service needs over time. Interaction with other education administrative systems and integration with municipal support systems will be important.
