Περιγραφή του κριτηρίου επιλογής: Support from other entities for fulfilment of the qualification requirements. The tenderer can, if necessary, rely on other companies' capacity to fulfil the requirements for economic and financial capacity and/or the requirements for technical and professional qualifications. Documentation requirement: Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity that the tenderer will use to submit a separate ESPD form when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • Documentation that shows that the tenderer can use the necessary resources for the entities that they will use, for example, a commitment statement from these businesses. The template for the commitment statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. • Documentation that shows that the company(s), that the tenderer will use, fulfil the qualification requirement 'the tenderer's organisational and legal position'. • Documentation that shows that the company(s), that the tenderer will use, fulfil the relevant qualification requirements. • If a tenderer will use the capacity of other companies to fulfil the requirements for economic and financial capacity, a signed joint and several liability statement must be enclosed. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. If a tenderer will use

the capacity of other companies to fulfil the requirements of relevant experience, these entities shall carry out the services or the building and construction work that requires such qualifications.

Κριτήριο: Απαίτηση για άδεια ή μέλος σε συγκεκριμένη οργάνωση για συμβάσεις υπηρεσιών
Περιγραφή του κριτηρίου επιλογής: Suppliers who participate in a working partnership Several tenderers can participate in the competition jointly. The community must see to the necessary documentation that all the qualification requirements are met. The contracting authority will assess each individual supplier in the community against the provisions on rejection, cf. § 9-5 and § 24-2, this except the provision in § 9-5 (1) letter a) and § 24-2 (1) letter a) fulfilment of the qualification requirements, which will be applied to the jointly combined set. Tenderers who participate as a working partnership will be assessed collectively for the qualification requirements, with the exception of the requirements for the tenderer's organisational and legal position, documentation for absence of rejection reasons, tax certificates and authority for information on tax and duties (OSA). Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity in the (work) group shall submit separate ESPD forms when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • An account of the group (including each participant's role), each participant's organisation number, address and nationality. • The same documentation as individual tenderers shall be provided for each individual tenderer who participate in the group. • Declaration of joint and several liability to the contracting authority. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. The community of suppliers can, if necessary, rely on other entities to fulfil the qualification requirements, see the point on support from other companies to fulfil the qualification requirements. The contracting authority requires that the tenderer who fulfils the requirements for relevant experience shall carry out the services or the building and construction work that requires such qualifications.

Κριτήριο: Εγγραφή σε σχετικό επαγγελματικό μητρώο
Περιγραφή του κριτηρίου επιλογής: Particularly on newly established tenderers A tenderer who is newly established and cannot present all the required documentation must be particularly careful to document and substantiate that they still have the prerequisites required to fulfil the contract. It is particularly important that such tenderers can document a sufficiently large workforce for the execution of the contract, including technical and professional qualifications. Newly established tenderers emphasise that it is the tenderer's ability as such to carry out the contract that is assessed, not individual persons' competence in isolation. If a newly established tenderer has experience from contracts, the most relevant contracts from which the tenderer has experience must be completed in accordance with the documentation requirements regarding relevant experience. This is even if the contracts are of such a nature that they do not fulfil the specified requirements. Missing or inadequate documentation in one or more of the requirements can result in the tenderer being rejected. Insufficient or incorrect completed response form can also lead to rejection. Tenderers who have established themselves within a new discipline can also be seen as newly established.

Ονομασία: Justification for the use of climate and environmental requirements in the requirement specifications.

Περιγραφή: The procurement concerns maintenance and improvement of electrotechnical installations along and roads national road. The project is above the EEA threshold value, cf. the procurement regulations §5-3 (1) with a expected procurement value of NOK 300-400 million (2026) excluding VAT, (procurement procedure: open tender contest, the public procurement regulations §13-1 first section) and it shall be implemented as an execution contract and contract type, the framework agreement is based on unit prices. According to the Public Procurement Regulations (FOA) § 7-9 (4), award criteria can, in accordance with PPR § 7-9 (2) and (3) will be replaced with climate and environmental requirements if it is clear that this provides a better climate and environmental effect. The climate and environmental impact of this procurement is mainly related to: i) Transport of personnel ii) Emissions from materials iii) Handling waste In this procurement, work hours for personnel make up the largest resource effort, and transport of personnel will give the largest climate footprint. Personnel vehicles are mainly light vehicles under 3.5 tons. There is a requirement that 100% of all such transport shall be carried out by zero emission vehicles (electric or hydrogen vehicles). This is taken care of in chapter C4 point 3.2 Requirements for vehicles. Petrol or diesel powered vehicles used in the contract work require: emission levels. Such vehicles shall as a minimum fulfil Euro VI/6 or Stage IV. This is complied with in chapter C4 point 3.2 Requirements for vehicles and machines. Electrical material is a part of the procurement. The total extent of the material deliveries are unknown at the time of the competition notice and allow not fully estimated in advance. The materials are mainly delivered in accordance with requirements arisen. The Contracting Authority emphasises the materials' climate and environmental profile. for the concrete procurements. Materials that are used as promotes re-use. This is taken care of in chapter C2 point 30.4 Recycling and recycling. Handling waste is a minor part of the execution of the contract. There are requirements as to how waste shall be handled for re-use and recycling. This is taken care of in chapter C2 point 30.5 Waste management. The tenderer is required to be certified in accordance with ISO 14001 Management System Requirements. for environment or equivalent recognised systems. This contributes to the tenderer having a systematic approach to environmental management in connection with the implementation of the contract work. Tenderers will, thus, contribute to protecting the environment by preventing or mitigate unfortunate environmental impact, uphold environmental obligations, improve environmental performance, implement environmental alternatives and communicate environment information. By setting minimum requirements in the contract, we are largely ensured a climate and environmental effect and we therefore considers the climate and environmental gains in this procurement better safeguarded through such a requirement position rather than the use of climate and environment as the award criterium.

Περιγραφή: The procurement is for DoV Midt Rammeavtale Elektro 2026-2028+ option 1+1 The procurement concerns maintenance and improvement of electrotechnical installations along and roads national road. The project is above the EEA threshold value, cf. the procurement regulations §5-3 (1) with a expected procurement value of NOK 300-400 million (2026) excluding VAT, (procurement procedure: open tender contest, the public procurement regulations §13-1 first section) and it shall be implemented as an execution contract and contract type, the framework agreement is based on unit prices. According to the Public Procurement Regulations (FOA) § 7-9 (4), award criteria can, in accordance with PPR § 7-9 (2) and (3) will be replaced with climate and environmental requirements if it is clear that this provides a better climate and environmental effect. The climate and environmental impact of this procurement is mainly related to: i) Transport of personnel ii) Emissions from materials iii) Handling waste In this procurement, work hours for personnel make up the largest resource effort, and transport of personnel will give the largest climate footprint. Personnel vehicles are mainly light vehicles under 3.5 tons. There is a requirement that 100% of all such transport shall be carried out by zero emission vehicles (electric or hydrogen vehicles). This is taken care of in chapter C4 point 3.2 Requirements for vehicles. Petrol or diesel powered vehicles

used in the contract work require: emission levels. Such vehicles shall as a minimum fulfil Euro VI/6 or Stage IV. This is complied with in chapter C4 point 3.2 Requirements for vehicles and machines. Electrical material is a part of the procurement. The total extent of the material deliveries are unknown at the time of the competition notice and allow not fully estimated in advance. The materials are mainly delivered in accordance with requirements arisen. The Contracting Authority emphasises the materials' climate and environmental profile. for the concrete procurements. Materials that are used as promotes re-use. This is taken care of in chapter C2 point 30.4 Recycling and recycling. Handling waste is a minor part of the execution of the contract. There are requirements as to how waste shall be handled for re-use and recycling. This is taken care of in chapter C2 point 30.5 Waste management. The tenderer is required to be certified in accordance with ISO 14001 Management System Requirements. for environment or equivalent recognised systems. This contributes to the tenderer having a systematic approach to environmental management in connection with the implementation of the contract work. Tenderers will, thus, contribute to protecting the environment by preventing or mitigate unfortunate environmental impact, uphold environmental obligations, improve environmental performance, implement environmental alternatives and communicate environment information. By setting minimum requirements in the contract, we are largely ensured a climate and environmental effect and we therefore considers the climate and environmental gains in this procurement better safeguarded through such a requirement position rather than the use of climate and environment as the award criterium.

Κριτήριο: Ασφάλεια του εφοδιασμού

Περιγραφή του κριτηρίου επιλογής: Support from other entities for fulfilment of the qualification requirements. The tenderer can, if necessary, rely on other companies' capacity to fulfil the requirements for economic and financial capacity and/or the requirements for technical and professional qualifications. Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity that the tenderer will use to submit a separate ESPD form when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • Documentation that shows that the tenderer can use the necessary resources for the entities that they will use, for example, a commitment statement from these businesses. The template for the commitment statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. • Documentation that shows that the company(s), that the tenderer will use, fulfil the qualification requirement 'the tenderer's organisational and legal position'. • Documentation that shows that the company(s), that the tenderer will use, fulfil the relevant qualification requirements. • If a tenderer will use the capacity of other companies to fulfil the requirements for economic and financial capacity, a signed joint and several liability statement must be enclosed. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. If a tenderer will use the capacity of other companies to fulfil the requirements of relevant experience, these entities shall carry out the services or the building and construction work that requires such qualifications.

Κριτήριο: Απαίτηση για άδεια ή μέλος σε συγκεκριμένη οργάνωση για συμβάσεις υπηρεσιών

Περιγραφή του κριτηρίου επιλογής: Suppliers who participate in a working partnership Several tenderers can participate in the competition jointly. The community must see to the necessary documentation that all the qualification requirements are met. The contracting authority will assess each individual supplier in the community against the provisions on rejection, cf. § 9-5 and § 24-2, this except the provision in § 9-5 (1) letter a) and § 24-2 (1) letter a) fulfilment of the qualification requirements, which will be applied to the jointly combined set. Tenderers who participate as a working partnership will be assessed collectively for the qualification requirements, with the exception of the requirements for the tenderer's organisational and legal position, documentation for absence of rejection reasons, tax certificates and authority for information on tax and duties (OSA). Documentation requirement Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity in the (work) group shall submit separate ESPD forms when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • An account of the group (including each participant's role), each participant's organisation number, address and nationality. • The same documentation as individual tenderers shall be provided for each individual tenderer who participate in the group. • Declaration of joint and several liability to the contracting authority. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>.

[kontraktsdokumenter/generelle-kontraktsdokumenter/](#). The community of suppliers can, if necessary, rely on other entities to fulfil the qualification requirements, see the point on support from other companies to fulfil the qualification requirements. The contracting authority requires that the tenderer who fulfils the requirements for relevant experience shall carry out the services or the building and construction work that requires such qualifications.

Κριτήριο: Εγγραφή σε σχετικό επαγγελματικό μητρώο

Περιγραφή του κριτηρίου επιλογής: Particularly on newly established tenderers A tenderer who is newly established and cannot present all the required documentation must be particularly careful to document and substantiate that they still have the prerequisites required to fulfil the contract. It is particularly important that such tenderers can document a sufficiently large workforce for the execution of the contract, including technical and professional qualifications. Newly established tenderers emphasise that it is the tenderer's ability as such to carry out the contract that is assessed, not individual persons' competence in isolation. If a newly established tenderer has experience from contracts, the most relevant contracts from which the tenderer has experience must be completed in accordance with the documentation requirements regarding relevant experience. This is even if the contracts are of such a nature that they do not fulfil the specified requirements. Missing or inadequate documentation in one or more of the requirements can result in the tenderer being rejected. Insufficient or incorrect completed response form can also lead to rejection. Tenderers who have established themselves within a new discipline can also be seen as newly established.
