Economic and financial standing The applicant must confirm the economic ability in the ESPD part IV.B with information from the latest annual report regarding the following economic indicators: 1. Equity (total equity incl. share capital, reserves, revaluation, retained earning etc.) 2. Equity ratio (equity/total assets). This must be stated with two decimals. If the applicant relies on the capacities of other entities or the applicant is a group of economic operators, the information for the ESPD part IV.B must also be given in a separate ESPD from each of these entities. It is the sole responsibility of the applicant to secure that the minimum requirements are reached, based on consolidation, when the applicant is relying on the capacity of other entities or when the applicant is a group of economic operators. Minimum requirement: Equity from the latest annual report must, at the time of prequalification, be at least 2,000,000 EUR. Equity ratio from the latest annual report must, at the time of prequalification, be at least 20

pct. If the equity ratio is between 15 pct. and 20 pct. the applicant can qualify if Equity exceeds 6,000,000 EUR. Turnover from the latest annual report must, at the time of prequalification, be at least 10,000,000 EUR

Κριτήριο: Αναφορές σε καθορισμένα έργα

Περιγραφή του κριτηρίου επιλογής: The suitability of applicants fulfilling the minimum requirements for economic and financial standing will be assessed based on technical and professional ability. The ability will be assessed based on references which can be filled in ESPD part IV.C. 2.3 The applicant is allowed to submit up to 3 most comparable and relevant references undertaken in the past 7 years as part of the application. "Undertaken in the past 7 years" implies that the reference must not have been completed prior to the date reached when counting 7 years backwards from the submission date for prequalification. References older than this will not be taken into consideration. References which have not yet been fully completed can be included as part of the application, however the applicant must describe the parts which have not yet been delivered, and this may affect the evaluation of the application, cf. section 2.3. The references should describe HDD drilling experience, and include: • A specific description of deliveries, including: - Length, diameter, width and depth of drilling - Types of crossings - Drilling system - Handling of frack outs - Incidents concerning HSE - Applicant's concrete role in the (main/subcontractor) • Contract value (if possible) • Location • Date of initiation and final delivery (day, month, year) Any ambiguities and/or incomprehensibilities may have a negative effect on the selection of applicants. Please note the "description" box in ESPD part IV.C. can contain more text than is visible and it is possible to copy paste text into the box. If the applicant is relying on the capacity of other entities or the applicant is a group of economic operators, the maximum number of references to be submitted must still be respected and cannot exceed 3 when combined. If more are submitted, the Contracting Authority will only consider the most recent references determined by date of final delivery, in this case not yet finished references will not be included. If the applicant relies on other entities' capacity or is part of a group of economic operators, the information concerning ESPD part IV.C must be submitted in separate ESPDs for each entity. Minimum requirement: The applicant must have at least one reference with HDD landfall drilling, that meets the following requirements: - Undertaken within the past 7 years - Contract value of at least 5.000.000 EUR

The submission shall include: • Overall methodology, construction approach and site layout (onshore and offshore), including key interfaces and work sequencing • HDD design concept, including alignment, entry/exit points, preliminary geotechnical considerations and drilling methodology • Duct system design, materials, installation methods and key equipment, including handling and installation principles • Environmental mitigation measures, including specific measures to prevent and manage loss of drilling fluids, as well as survey concept and approach to control and verification of the installed works • Assessment of the methodology under the expected metocean conditions. • Survey and control concept, including methodology for setting out, tracking and monitoring during drilling operations and approach to verification of the installed alignment and duct system • The Tenderer shall identify and assess key risks related to the proposed solution and describe how such risks are avoided, reduced or managed. • CV for key personnel: A. Project Manager B. Site Manager C. Drilling Supervisor D. Marine Supervisor • Project Management Concept • Quality Management Concept The Technical Solution will be evaluated on the basis of the credibility, feasibility and level of detail of the submitted conceptual design and methodology. Emphasis will be placed on: • Demonstrated understanding of project conditions, constraints and key risks • Feasibility, robustness and efficiency of the proposed construction and installation methods • Technical soundness of the HDD design and duct system solution • Effectiveness of environmental mitigation measures, including management of drilling fluid losses • Adequacy of the proposed survey, control and verification approach • Solutions demonstrating practical, well-structured and clearly described methodologies, with a focus on HSE risk reduction and safe execution, will be considered favorable. • A robust vessel set up for the offshore activities, including information on backup vessels and operational weather limitations for each vessel, will be considered favorable. • Positive consideration will be given to key personnel demonstrating relevant experience from projects of a similar nature, size, complexity, and risk profile to the Contract, as well as a proven track record of successful project delivery, including performance in relation to time, quality, safety, and stakeholder management. • Positive consideration will be given to proposals demonstrating a clear, robust, and project-specific approach to project management, including effective management of risks, schedule, resources, interfaces, and stakeholder engagement, as well as proactive measures to ensure efficient and timely project execution. • Positive consideration will be given to proposals demonstrating a systematic, robust, and project-specific approach to quality management, including the prevention of non-conformities, effective control of critical activities, efficient management of deviations and corrective actions, and measures ensuring consistent and documented quality throughout the execution of the Contract. An overall evaluation will be made of this sub-criterion. For the sub-criteria "Technical Solution" it is a minimum requirement that the tenderer reach a minimum score of 4 for the tender to be compliant. Not reaching this score either in connection with shortlisting, cf. section 3.9, or in connection with the tender evaluation (an evaluation leading to the award of the contract) will result in the tender being excluded from the competition.
