Children's Centres are a core part of the City's Early Help Delivery Model for children, young people and their families by identifying families with problems and bringing together different services and agencies collectively to look at what support is needed. In line with the Core Purpose for Early Help: Children's Centres (DfE April 2012), the aim of Children Centre Early Help Services is to deliver the required support in a co-ordinated way and therefore improve the outcomes for young children and their families with a particular focus on the most disadvantaged families, in order to reduce inequalities in:

- child development and school readiness;
- parenting aspirations and parenting skills;
- child and family health and life chances.

Thus, reducing demand in the system on more costly, acute and specialist services. Children's Centres also play a significant role in the delivery of an integrated pathway of support for families and work collaboratively with midwifery, health visiting, childcare/early education providers and other early years services. Through the Early Help model the Centre play a key role in managing the interfaces between these different services and aligning priority areas of work.

### Section IV: Procedure

---

#### IV.1. Description

##### IV.1.1. Type of procedure

Award of a contract without prior publication of a call for competition in the Official Journal of the European Union in the cases listed below

- The works, supplies or services can be provided only by a particular economic operator for the following reason:
  - absence of competition for technical reasons

Explanation:

The incumbent economic operators own the buildings where the services are delivered from, which are required to be located within specific geographic areas. New suppliers would incur prohibitive accommodation costs and not deliver best value, as current suppliers cannot be required to vacate the buildings. Previous competition indicated no other interested suppliers. Competition is therefore considered to be absent for technical reasons.
