There will also be a requirement to supply new and new-for-old TWTs to maintain support. It is expected that all spare items required to execute repair shall be provided by the contractor and conform to the OEM's specification. Repaired items shall be delivered self-to-self for bonded storage, until required by ADATS DT and will be warranted from when they are fitted to a site transmitter. The contractor shall also undertake to provide engineering support, at the request of ADATS DT, at any radar site in the British Isles, within 24 hours.

The contract duration is likely to be for 3 years with options for further years.

Suitably qualified companies are invited to submit expressions of interest to the above DT and must comply with the following criteria:

- a. Quality assurance certification to ISO 9001:2000 or equivalent;
- b. A brief description of the company and previous experience in respect of the repair and supply of Watchman TWTs, disclosing the names of organisations to which they have provided a similar service, limited to 2 sides of A4;
- c. Evidence of Design Authority Rights or agreement to obtain relevant repair data and drawings from the OEM.

Expressions of interest are to be submitted by Wednesday 8.2.2012.

The contract will be awarded on the basis of the most economically advantageous, taking into account overall value for money, repair turn around times and technical merit.
