Main site or place of performance: Wave Hub office in Hayle, Cornwall, United Kingdom.
NUTS code UK United Kingdom,UKK3 Cornwall and Isles of Scilly

II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)

II.1.4. Short description of the contract or purchase(s)

This contract is for the marine operational management and electrical engineering services in order to ensure a safe and efficient facility. Wave Hub is a novel system that provides the electrical infrastructure to support developers of wave energy converter devices (WEC's). Wave Hub allows developers to test WEC arrays over several years in a fully monitored

marine environment and export their generated electricity to the local grid, via the Western Power Distribution (WPD) substation at Hayle on the north coast of Cornwall. The development consists of 25 km of armoured subsea cable from the shore to a subsea termination hub. WEC's will be connected via subsea cables from the hub tails. The main 25 km of subsea cable is protected and stabilised along its route. The substation includes a transformer, switch gear and control and monitoring facilities. There are currently no WEC's deployed within the Wave Hub site and further details can be found at www.wavehub.co.uk. There is a dedicated office in the centre of Hayle which allows some command and control functionality.

II.1.5. CPV code(s)

79420000 Management-related services

II.1.6. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: yes

II.2. Total value of the contract/lot
