Whilst ensuring that patients who need to be seen by a hospital consultant are seen as quickly as possible.

Expected outcomes:

- reduce health inequalities by improving access to services, including access to triage and assessment,
- improve clinical outcomes for patients,
- reduce waiting times for patients with musculoskeletal conditions,
- reduce the need for secondary care interventions,
- transfer activity from an acute hospital setting to the community,
- deliver only through clinically agreed and reviewed pathways, published in Map of Medicine,
- get people speedily back into their usual life, including getting people back to work,
- improved skills in primary care.

Promotion of self-management through the use of evidence based education, with reference to approved patient information sources and the evidence based benefits of exercise for specific MSK conditions.
