I.5. Main activity

General public services

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Single European Digital Enforcement Area

Reference number: MOVE/2023/OP/0009

II.1.2. Main CPV code

60100000 Road transport services

II.1.3. Type of contract

Services

II.1.4. Short description

In order to ensure effective, reliable and consistent monitoring and control of compliance with EU road transport legislation there must be an adequate enforcement mechanism in place. In recognition of the importance of law enforcement, the EU introduced certain minimum requirements for carrying out controls of compliance with the relevant rules during controls at roadside and checks at premises of the road transport undertaking. Despite developments made at national, European and international levels to step up enforcement, the complexity of the rules applicable to highly mobile road transport sector remains a huge challenge. The

general objective of the project is to initiate the process of creating a regulatory and technological environment for checking compliance with the EU road transport rules in the smartest and most efficient possible way, using the potential of the existing and emerging digitalisation, automation and communication technologies.

II.1.6. Information about lots

This contract is divided into lots: no

II.1.7. Total value of the procurement

Value excluding VAT: 889 467,50 EUR

II.2. Description

II.2.3. Place of performance

NUTS code: BE Belgique / België

II.2.4. Description of the procurement

In order to ensure effective, reliable and consistent monitoring and control of compliance with EU road transport legislation there must be an adequate enforcement mechanism in place. In recognition of the importance of law enforcement, the EU introduced certain minimum requirements for carrying out controls of compliance with the relevant rules during controls at roadside and checks at premises of the road transport undertaking. Despite developments made at national, European and international levels to step up enforcement, the complexity of the rules applicable to highly mobile road transport sector remains a huge challenge. The general objective of the project is to initiate the process of creating a regulatory and technological environment for checking compliance with the EU road transport rules in the smartest and most efficient possible way, using the potential of the existing and emerging digitalisation, automation and communication technologies.

II.2.5. Award criteria

Quality criterion - Name: Quality / Weighting: 70

Price - Weighting: 30

II.2.11. Information about options

Options: no
