**Section II: Object**

**II.1. Scope of the procurement**

**II.1.1. Title**

Framework Agreement — Procurement of Snow Canons and Snow Production Equipment, as Well as Service

Reference number: 20/651

**II.1.2.**

**Main CPV code**

37480000 Machinery or apparatus for leisure equipment

**II.1.3. Type of contract**

Supplies

**II.1.4. Short description**

Kultur- og idrettsbygg Oslo KF is, amongst other things, responsible for the management and operation of the snow production installations that provide artificial snow for the ski jumps and cross country tracks at the Holmenkollen National Arena. These are advanced snow production installations with, amongst other things, 38 lances and fan canons, 38 manholes with various functions, a pump station, weather stations, compressors, and a separate water magazine. The installations are fully automatic, which means that they can be operated via a PC. This currently happens through the software ATASS+. Efficient operation of the snow production installations is decisive for training and events in the winter season going ahead as planned. High reliability in the installations is therefore important.

We need to have a tenderer that can carry out annual services on the snow production installations, as well as supplement with snow canons, snow production equipment, and the necessary spare parts as required.

**II.1.5. Estimated total value**

Value excluding VAT: 6 000 000,00 NOK

**II.1.6. Information about lots**

This contract is divided into lots: no

**II.2. Description****II.2.2. Additional CPV code(s)**

31000000 Electrical machinery, apparatus, equipment and consumables; lighting, 37480000 Machinery or apparatus for leisure equipment, 42120000 Pumps and compressors, 45212223 Winter-sports facilities construction work, 50000000 Repair and maintenance services, 50500000 Repair and maintenance services for pumps, valves, taps and metal containers and machinery, 92610000 Sports facilities operation services

**II.2.3. Place of performance**

NUTS code: NO011 Oslo

**II.2.4. Description of the procurement**

Kultur- og idrettsbygg Oslo KF (KID) is, amongst other things, responsible for the management and operation of the snow production installations that provide artificial snow for the ski jumps and cross country tracks at the Holmenkollen National Arena. These are advanced snow production installations with, amongst other things, 38 lances and fan canons, 38 manholes with various functions, a pump station, weather stations, compressors, and a separate water magazine. The installations are fully automatic, which means that they can be operated via a PC. This currently happens through the software ATASS+. The snow production installations were built for the cross country world championship in 2011 and have since then been extended several times with new production manholes and snow canons. Efficient operation of the snow production installations is decisive for training and events in the winter season going ahead as planned. High reliability in the installations is therefore important.

We need to have a tenderer that can carry out annual services on the snow production installations, as well as supplement with snow canons, snow production equipment, and the necessary spare parts as required. The annual service is normally carried out in September

/October. Furthermore, there is a need for stand-by in the form of competent service personnel and available spare parts for operational problems in periods when the installations are in operation. Snow production depends on satisfactory climatic conditions, sufficiently cold and the correct wind/humidity. Most of the snow production in Holmenkollen normally occurs in December and January, but there will be a need for quick stand-by in the period from 1 November to 20 March. In recent years, snow has been produced between 20 and 30 days every winter.

Several of the snow canons that are used in Holmenkollen were new in 2010, the remainder have gradually come to the arena since then. There will eventually be a need to replace worn-out equipment, including seeing to proper disposal of equipment that will not be used anymore. The selected tenderer must be able to offer snow canons that can be used together with the other installations in Holmenkollen.

The annual service costs are estimated to be below NOK 100 000.

The largest part of the framework agreement in monetary terms will be the procurement of snow canons and snow production equipment. The procurement of snow canons and service costs will make up approx. NOK 1.5 million a year. The amount of call-offs on the contract will vary and will, amongst other things, depend on need, and budget coverage. Grants for this objective can vary from year to year, so the estimate is not binding and it can be both higher and lower.

The total value of the framework agreement is estimated to be between NOK 4 million and NOK 6 million over 4 years.

See the attached requirements specification for further details on the snow production installations and the requirements for service, equipment, stand-by, snow canons, etc.

#### **II.2.5. Award criteria**

Criteria below

Price

#### **II.2.6. Estimated value**

Value excluding VAT: 6 000 000,00 NOK

#### **II.2.7. Duration of the contract, framework agreement or dynamic purchasing system**

Duration in months: 48

This contract is subject to renewal: no

#### **II.2.10. Information about variants**

Variants will be accepted: no

#### **II.2.11. Information about options**

Options: no

#### **II.2.13. Information about European Union funds**

The procurement is related to a project and/or programme financed by European Union funds:  
no

#### **II.2.14. Additional information**

### **Section III: Legal, economic, financial and technical information**

---

#### **III.1. Conditions for participation**

##### **III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers**

List and brief description of conditions:

Tax certificate:

The selected tenderer will be required to present a tax certificate and a VAT certificate. The tax certificate must not be older than 6 months old at the deadline for submitting a request for participation in the competition or tender. For building and construction contracts, the tenderer shall require an equivalent tax certificate from all sub-suppliers when contracts are signed for the assignment with a value exceeding NOK 500 000 excluding VAT.

Company registration certificate:

Requirement:

- tenderers must be a legally established company.

Documentation requirement:

- Norwegian companies: company registration certificate;
- foreign tenderers: verification that the company is registered in a trade register or company register as prescribed by the law of the country where the tenderer is established.

### **III.1.2. Economic and financial standing**

List and brief description of selection criteria:

Requirement:

- tenderers must have sufficient economic capacity to implement the assignment/contract.

Documentation requirement:

- credit rating not older than 6 months.

The contracting authority reserves the right to obtain credit evaluations.

### **III.1.3. Technical and professional ability**

List and brief description of selection criteria:

Requirement

- tenderers must have personnel with sufficient experience from automatic snow production installations.

Documentation requirement:

- a description of the the technical personnel that the tenderer has at disposal for fulfilment of the contract.

Requirement:

Tenderers must have good experience from similar deliveries (size and complexity).

Documentation requirement:

- example of similar deliveries, with a description of the equipment, value, and delivery date.

Minimum level(s) of standards possibly required:

Minimum three persons.

## **III.2. Conditions related to the contract**

### **III.2.2. Contract performance conditions**

The framework agreement will be valid for 4 years from when it is signed, with 6 months mutual notice.

The contractual relationship will be regulated by the attached contract formula, with the accompanying standard contract terms for Oslo Municipality (procurement of goods and the procurement of trade services).

### **III.2.3. Information about staff responsible for the performance of the contract**

Obligation to indicate the names and professional qualifications of the staff assigned to performing the contract

## **Section IV: Procedure**

## **IV.1. Description**

### **IV.1.1. Type of procedure**

Open procedure

### **IV.1.3. Information about a framework agreement or a dynamic purchasing system**

The procurement involves the establishment of a framework agreement  
Framework agreement with a single operator

### **IV.1.8. Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: yes

## **IV.2. Administrative information**

### **IV.2.2. Time limit for receipt of tenders or requests to participate**

Date: 22/02/2021 Local time: 11:00

### **IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates**

### **IV.2.4. Languages in which tenders or requests to participate may be submitted**

Norwegian

### **IV.2.6. Minimum time frame during which the tenderer must maintain the tender**

Tender must be valid until: 02/04/2021

### **IV.2.7. Conditions for opening of tenders**

Date: 22/02/2021 Local time: 11:00

## **Section VI: Complementary information**

---

### **VI.1. Information about recurrence**

This is a recurrent procurement: yes  
Estimated timing for further notices to be published:  
2025.

### **VI.2. Information about electronic workflows**

Electronic ordering will be used  
Electronic invoicing will be accepted  
Electronic payment will be used

### **VI.3. Additional information**

Oslo Municipality is in the process of reorganising the Municipality's construction businesses. It has been decided that the contracts listed below shall be merged a new enterprise — 'Oslobygg KF':

Omsorgsbygg Oslo KF (Municipal Undertaking for Social Service Buildings)

— The development activity in Boligbygg Oslo KF (Municipal Undertaking for Social Housing)

— Undervisningsbygg Oslo KF (Municipal Undertaking for Educational Buildings and Property)

— Kultur- og idrettsbygg Oslo KF (Municipal Undertaking for Cultural and Sports Facilities)

Upon the commencement of Oslobygg KF from and including 1 September 2020, the contract will be transferred to the new company so that the entire new company can use the contract if required.
