Other type: Environmental NGO

I.5. Main activity

Environment

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Contract Award — Scrub Control Moneygal Bog SAC CANN_UW32
Reference number: project_25584

II.1.2. Main CPV code

45111220 Scrub-removal work

II.1.3. Type of contract

Works

II.1.4. Short description

Ulster Wildlife is seeking to appoint a suitable contractor to clear invasive scrub on Moneygal Bog Special Area of Conservation (SAC). Moneygal Bog SAC is a raised bog site in Co. Tyrone north west of Castleterg. Moneygal Bog SAC is situated in an area with a high density of forestry plantations and even has a parcel of conifer plantation within the boundaries of the designated site. As a result of this there is a significant level of encroachment of conifer scrub within the bog which is bringing the site into unfavourable condition. In areas of historical turf cutting there is also significant encroachment of broadleaved scrub, including birch, willow and

alder. Encroachment such as this on raised bogs has the detrimental impact of lowering the water table. The ever increasing level of scrub removes water from the bog which in turn prevents specialist species that require a high water levels from surviving.

II.1.6. Information about lots

This contract is divided into lots: no

II.1.7. Total value of the procurement

Value excluding VAT: 24 300,00 EUR

II.2. Description

II.2.2. Additional CPV code(s)

77000000 Agricultural, forestry, horticultural, aquacultural and apicultural services, 90710000 Environmental management, 90712400 Natural resources management or conservation strategy planning services

II.2.3. Place of performance

NUTS code: UK United Kingdom

Main site or place of performance: NORTHERN IRELAND and REPUBLIC of IRELAND.

II.2.4. Description of the procurement

Ulster Wildlife is seeking to appoint a suitable contractor to clear invasive scrub on Moneygal Bog Special Area of Conservation (SAC). Moneygal Bog SAC is a raised bog site in Co. Tyrone north west of Castleterg. Moneygal Bog SAC is situated in an area with a high density of forestry plantations and even has a parcel of conifer plantation within the boundaries of the designated site. As a result of this there is a significant level of encroachment of conifer scrub within the bog which is bringing the site into unfavourable condition. In areas of historical turf cutting there is also significant encroachment of broadleaved scrub, including birch, willow and alder. Encroachment such as this on raised bogs has the detrimental impact of lowering the water table.
