Execution

Main site or place of performance: Sola, Norway.

NUTS code NO05 Vestlandet

II.1.3. Information about a framework agreement or a dynamic purchasing system

The notice involves a public contract

II.1.4. Information about framework agreement

II.1.5. Short description of the contract or purchase(s)

Avinor shall expand central areas at Stavanger Airport Sola (USO1). The expansion consists of expanding the departure hall and storage building, which has already begun, as well as expanding the arrivals and customs area (this announcement). The area of the new building is approx. 5 600 m² divided between 3 floors of various sizes.

This contract is for insulation of roof areas as well as roofing. The roof tiles that shall insulate and cover are mainly corrugated steel plates.

The provisional plan for execution is the period January-March 2017.

Examples of works which may be included in the contract:

- Delivery and assembly of insulation for a roof;
- Delivery and assembly of a membrane for a roof;
- Delivery and assembly of sandwich elements (steel plates + mineral wool);
- Sealing against existing constructions.

Other conditions:

- The construction area lies on the land side (white zone) during the entire construction period;
- The airport is in operations while the construction works are being carried out. Contractor must take this into account;
- The expansion will be built against the existing constructions. This will increase the degree of difficulty of construction works;
- The contractor must coordinate his own work with other contracts. This concerns, amongst other things, the exact date for the assembly of the insulation and roofing as well as temporary construction period covering.
