Section II: Object

II.1. Scope of the procurement

II.1.1. Title

EBN Seismic Processing Services

Reference number: GTO-19-T008

II.1.2. Main CPV code

71352140 Seismic processing services

II.1.3. Type of contract

Services

II.1.4. Short description

With this RFQ, EBN seeks to identify several technically capable seismic processing contractors through a pre-qualification tender. Any contractor that passes this pre-qualification will join a list of approved suppliers and EBN aims to sign a framework agreement with each of these contractors with a zero-hour work commitment. If EBN requires seismic processing

services, all approved suppliers will be invited in a 'mini-tender' to bid on a specific work package for either processing newly acquired 2D data or 2D or 3D reprocessing projects.

II.1.6. Information about lots

This contract is divided into lots: yes

II.1.7. Total value of the procurement

Value excluding VAT: 100 000,00 EUR

II.2. Description

II.2.1. Title

Lot No: 1

II.2.2. Additional CPV code(s)

71352140 Seismic processing services

II.2.3. Place of performance

NUTS code: NL Nederland

II.2.4. Description of the procurement

While in some onshore areas the Dutch subsurface data availability is good, there are still significant areas in the Netherlands with relatively poor data coverage. In these onshore areas, effective and economically feasible development of geothermal projects is not possible under the current circumstances. In this context, EBN has been asked to embark on a seismic geothermal exploration program (SCAN = Seismische Campagne Aardwarmte Nederland), which will comprise of the reprocessing of vintage data as well as the acquisition of new 2D seismic data.

II.2.5. Award criteria

Quality criterion - Name: Multiple criteria / Weighting: 100

Cost criterion - Name: Geen / Weighting: 0

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

II.2. Description

II.2.1. Title

3D Onshore Seismic Processing Services

Lot No: 2

II.2.2. Additional CPV code(s)

71352140 Seismic processing services

II.2.3. Place of performance

NUTS code: NL Nederland

II.2.4. Description of the procurement

As part of the SCAN project, EBN plans to acquire long-offset, high density 2D land seismic data, in areas (Areas A to I) where current data availability is relatively poor. During SCAN, it is anticipated that some 2 500 km of 2D seismic will be acquired between 2019 and 2023. It is the plan that the data will be processed as it becomes available, so rather than having all data available at once, the data will be processed per line (or per set of lines). In addition to any newly acquired 2D data, the scope of this processing framework agreement shall also include 2D land vintage data reprocessing.
