I.2. Information about joint procurement

The contract involves joint procurement

I.4. Type of the contracting authority

Regional or local authority

I.5.

Main activity

General public services

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Electricity - physical delivery and financial management of electricity for Trondheim Municipality
Reference number: 2022/22777

II.1.2. Main CPV code

09300000 Electricity, heating, solar and nuclear energy

II.1.3. Type of contract

Supplies

II.1.4. Short description

Trondheim Municipality, hereafter called the contracting authority, invites tenderers to an open tender contest for a framework agreement for electricity, which includes the physical delivery of electricity to the municipality's units, optimisation of concessionary energy sales, and financial management of termin contracts.

II.1.6. Information about lots

This contract is divided into lots: no

II.1.7. Total value of the procurement

Value excluding VAT: 120 000 000,00 NOK

II.2. Description

II.2.2. Additional CPV code(s)

09310000 Electricity, 71314000 Energy and related services, 71314200 Energy-management services

II.2.3. Place of performance

NUTS code: NO060 Trøndelag

II.2.4. Description of the procurement

Based on historical figures and the current installations, the total annual consumption of electrical energy for the contracting authority and collaboration partners is approx. 130 GWh split between approx. 2,500 measuring points. The contracting authority has concessionary energy for approx. 35.7 GWh/annum, which will be included in the management.

The delivery mainly comprises the following areas:

- Physical delivery of electrical energy
- Handling and optimising concessionary power
- Implementation of a price insurance strategy and handling financial contracts
- Overview and prognoses for price development in the spot and forward market for electricity, as well as important input factors for the production of, for example, water, wind, coal and gas.
- Invoicing services and site administration
- Consultancy services and installation of environmental and efficiency measures
- General consultancy services
- Reports

The contracting authority currently has a price insurance strategy, which states an interval for a given percentage share of the expected consumption, which is to be price insured with forward contracts. The amount of the consumption that is to be price insured is decided by an interval for the price insurance model within different time horizons. Within these intervals the contracting authority decides how much will be price insured based on the relationship between the average spot price in recent years and the price of forward contracts and judgemental assessments of the expected market development. The contracting authority would like to have the chosen tenderer as an opponent for all transactions, and they must not be a clearing customer at Nasdaq OMX.

The Contracting Authority can require consultancy services in the contract period that are in addition to the areas specified in this tender documentation. If the tenderer is to demand compensation for any general consultancy services that are not mentioned in the tender documentation, the frameworks for these consultancy services must be agreed in advance. It is the tenderer's responsibility to ensure that such an agreement is signed. Tenderers are asked to specify hourly rates/the fee model in their tender.

The signed contract will be based on the contracting authority having an obligation to meet their need for energy through the contract for the locations stated when the contract was signed. It is highly probable that energy deliveries to additional locations will be phased in due to new developments and any rental of premises that does not include electricity.

Subsequently, energy deliveries can also be phased out if, for example, locations are no longer used.

The procurements will cover all procurements within the product range covered by this contract and that are made by Trondheim Municipality with collaboration partners in the contract period. The contracting authority has based its specification of the services on the consumption from 2019-2021.

II.2.5. Award criteria

Quality criterion - Name: Financial risk in case of hedging / Weighting: 25 %

Quality criterion - Name: Environment / Weighting: 30%

Quality criterion - Name: Follow-up, reporting and invoicing / Weighting: 10 %

Quality criterion - Name: Administration methodology and achieved results - yield of power due to concession conditions / Weighting: 5 %

Price - Weighting: 30%

II.2.11. Information about options

Options: yes

Description of options:

Option for a contract extension for 1 + 1 year on the same terms.

Option for the procurement of electricity with a guarantee of origin.

Option for consultancy services and commissioning, including procurement or leasing of equipment, for different environmental and efficiency measures.

Option for Trondheim Havn IKS to use the contract for new installations.

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Open procedure

IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no

IV.2. Administrative information

IV.2.1. Previous publication concerning this procedure

Notice number in the OJ S: [2022/S 207-592719](#)

IV.2.8. Information about termination of dynamic purchasing system

IV.2.9. Information about termination of call for competition in the form of a prior information notice

Section V: Award of contract

Title:

Electricity - physical delivery and financial management of electricity for Trondheim Municipality

A contract/lot is awarded: yes

V.2. Award of contract

V.2.1. Date of conclusion of the contract

23/12/2022

V.2.2. Information about tenders

Number of tenders received: 4

Number of tenders received from SMEs: 1

Number of tenders received from tenderers from other EU Member States: 4

Number of tenders received from tenderers from non-EU Member States: 0

Number of tenders received by electronic means: 4

The contract has been awarded to a group of economic operators: no

V.2.3. Name and address of the contractor
