The pipeline also enables energy supply to local industry, including the local sugar factories in Nykøbing Falster and Nakskov. The overall project consists of a total of 115 km pipeline and includes 7 M/R and L/V stations and includes crossing water bodies between Zealand and Falster and Falster and Lolland. Gas delivery is expected from September 2024. The project is split between the transmission operator (Energinet) and distribution operator (Evida), and system boundaries has been defined at Nørre Alslev and in Everdrup. This means that Energinet will own and maintain the pipeline from Everdrup to Nørre Alslev but Evida will balance the system once commissioned. This project covers Energinet's part of the system, which includes approximately 44 km, 10" pipeline (PE coated) with a wall thickness of 6,35mm between Everdrup and Nørre Alslev, L/V stations at Everdrup and Egesborg and a Scraper station at Everdrup. The crossing between Zealand and Falster will be performed as HDD across Færgestrømmen and Grønsund in another contract which is not part of this tender.
