2.1. Procedure

Title: Development services for minimally invasive glaucoma surgery (MIGS) device

Description: We are seeking quotes for the development and manufacturing of a multi-lumen stent intended for minimally invasive glaucoma surgery (MIGS). The device is designed to lower intraocular pressure (IOP), a key factor in the progression of glaucoma, with the ability to regulate pressure post insertion. The development scope, estimated to about 2 years of development, includes optimising the stent design using in silico modelling, prototyping, and in vitro testing with ocular models and extracted pig eyes. Manufacturing will involve precision techniques such as microscale injection moulding and extrusion, ensuring the production of a batch that meets the standards for preclinical testing. Approximately 100 units are planned for manufacturing to support the initial in vitro testing and a preclinical efficacy study in pigs.

Duration: 60 Months

5.1.4. Renewal

Maximum renewals: 1

Other information about renewals: Three years. The contract may be extended by another 3 years, pending the availability of development funding. While the present contract seeks to develop a device that can be tested in vivo (prototype), the option refers to development of a device suitable for clinical testing. This entails the use of clinical-grade materials, risk planning, and regulatory development as well as preparation of the clinical trial. We foresee the delivery of clinical-grade stents in batches of 30-100. The option may be called within 3 years following the completion of the initial project.

5.1.6. General information

Reserved participation:

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): no

5.1.9. Selection criteria

Sources of selection criteria: Notice

Criterion: References on specified works

Description of selection criterion: Documented experience from similar projects in scope and complexity within the last 3 years. Documentation requirements: Documented references of past projects. Minimum requirement: 1 comparable project.

Criterion: Relevant educational and professional qualifications

Description of selection criterion: Qualifications and expertise of key personnel proposed for the assignment. Documentation requirements: CVs and documented competence in relevant fields (e.g., biomedical engineering, regulatory compliance).

Information about the second stage of a two-stage procedure:

The buyer reserves the right to award the contract on the basis of the initial tenders without any further negotiations

Description: In this procurement, the contract concerns research and development of a new glaucoma stent prototype, which involves: * Early-stage design and testing, not mass production. * Limited environmental impact during the development phase. * Focus on technical innovation, regulatory compliance and patient safety. Therefore, sustainability considerations (such as lifecycle emissions, material sourcing, and production efficiency) are not decisive at this stage. These aspects will be addressed in later phases when the product moves toward industrialisation and commercialisation.
