II.2.4. Description of the procurement

The group currently has 19 active installations/meter numbers, which are all read every hour. The estimated total consumption is 4 GWh a year. The maximum volume for the contract period is set to a total of 20 GWh.

Tempevegen 25 AS has 2 active installations, which are both read every hour. The estimated total consumption is 0.5 GWh a year. The maximum volume for the contract period is set to a total of 2.5 GWh.

A project will be started during the contract period for solar panels and self-supplied electricity at Trondheim Renholdsverk AS, but the size and scope of this has not yet been mapped. In addition, TRV Gruppen AS is looking at possibilities for further solar panel installations. This is only in the mapping phase and the scope is thus unknown. We would like the tenderer to procure excess electricity from future solar panel installations if this occurs.
