**II.1. Scope of the procurement****II.1.1. Title**

Procurement of charging stations for chargeable motor vehicles in Trondheim.

Reference number: 16/36901

**II.1.2. Main CPV code**

31000000 Electrical machinery, apparatus, equipment and consumables; lighting

**II.1.3. Type of contract**

Services

#### **II.1.4. Short description**

Trondheim Parkering KF invites tenderers to an open tender contest for a framework agreement with a tenderer for the procurement of charging stations for chargeable motor vehicles, including excavation, assembly, operation and maintenance.

#### **II.1.5. Estimated total value**

Value excluding VAT: 2 000 000,00 NOK

#### **II.1.6. Information about lots**

This contract is divided into lots: no

### **II.2. Description**

#### **II.2.2. Additional CPV code(s)**

45315100 Electrical engineering installation works, 45315300 Electricity supply installations, 51100000 Installation services of electrical and mechanical equipment, 98351000 Car park management services, 45000000 Construction work, 31000000 Electrical machinery, apparatus, equipment and consumables; lighting

#### **II.2.3. Place of performance**

NUTS code: NO06 Trøndelag

Main site or place of performance: Trondheim.

#### **II.2.4. Description of the procurement**

The new parking regulations mean that several charging stations must be established for charging chargeable motor vehicles in Trondheim, c.f. § 35. Charging Option and § 65. Commissioning and transition provisions.

Due to a lack of experience, 2017 will be a trial year with the establishment of 20-40 charging stations. This is to uncover future needs for the number of new charging stations, as well as the need for the locating charging stations in new locations. The first and prioritised assignment for the chosen tenderer will be to establish 28 wall mounted charging stations in Leuthenhavn car park.

A decision has not yet been made as to whether there will be a parking charge for electric vehicles. TP and the chosen tenderer shall follow the decision on charges when it has been made and possibly amended at a later date.

TP would, thus, like to enter into a framework agreement with a tenderer who will have complete responsibility for the engineering design services, development and establishment of the charging stations with mode 3 type 2 technology in Trondheim, in consultation with TP. As a starting point we will require charging stations for charging by the roadside, public charging stations and the establishment of wall mounted charging stations in car parks, but charging stations can also be established in private areas. TP would like to carry out parts of the operational and maintenance assignments themselves.

Another business model can be required in private areas than that used in public areas. This could be user payments for charging, other types of charging technology, all in accordance with the area owner's wishes and needs.

#### **II.2.5. Award criteria**

Criteria below

Quality criterion - Name: Quality / Weighting: 30 %

Quality criterion - Name: Service / Weighting: 10

Quality criterion - Name: The environment / Weighting: 10

Price - Weighting: 50 %

#### **II.2.6. Estimated value**

Value excluding VAT: 20 000 000,00 NOK

#### **II.2.7. Duration of the contract, framework agreement or dynamic purchasing system**

Duration in months: 48

This contract is subject to renewal: no

#### **II.2.10. Information about variants**

Variants will be accepted: no

#### **II.2.11. Information about options**

Options: yes

Description of options:

2.11.1 If desirable, the tenderer can be asked to provide charging stations for public roads with a lower effect due to a lack of capacity in the area where the charging station shall be established.

2.11.2 TP would like to have the option to enter into a contract with a tenderer for privately regulated areas. Examples of this can be sharing costs and income for the establishment of charging stations with payment in private areas.

2.11.3 If TP would like to procure charging stations that are not described in the requirement specifications, TP can ask the tenderer whether they deliver this product. This can, for example, be a housing association that TP has a contract with, who would like a particular type of charging station. Pricing will be as agreed with the contracting authority and equivalent contract terms as the for the rest of the contract will apply. TP will, in such a situation, be free to use the tender.

#### **II.2.13. Information about European Union funds**

The procurement is related to a project and/or programme financed by European Union funds:  
no

#### **II.2.14. Additional information**

### **Section III: Legal, economic, financial and technical information**
