The contracting authority is purchasing on behalf of other contracting authorities: no

**Section II: Object of the contract**

---

**II.1. Description**

**II.1.1. Title**

Framework agreement: ICT competence.

**II.1.2. Type of contract and place of performance or delivery**

Services

Service category No 7: Computer and related services

Main site or place of performance: Buskerud.

NUTS code NO032 Buskerud

**II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)**

The procurement involves the establishment of a framework agreement

#### **II.1.4. Short description of the contract or purchase(s)**

BFK Innkjøp [BFK Purchasing] shall advertise a contest for framework agreement on ICT competence for Buskerud County via the ICT department.

Brief description of background and goals for the framework agreement.

The ICT department is gaining an increasing responsibility and more assignments in an increasingly digital world. We wish to be future orientated and have updated system that can improve the services for our customers. We want to strengthen competence in several areas and therefore wish to connect with partners who can assist with increasing the quality of deliveries in a broad spectrum of competence areas. We need partners who can both assist in the operation, but who can also be advisers and supporters when we need them. About the procurement:

The contest concerns framework agreements for the delivery of ICT competence for the Contracting Authority. The framework agreement gives the Contracting Authority the right, but no obligation to undertake call-offs on the purchase of ICT consultants. Awarding of assignments under the framework agreement (call-off) can occur through the entire period of the framework agreement. There may be requests on assistance for assignments of different complexity and with varying delivery times. The services shall be executed in accordance with the framework agreement. Execution and content of assignment will be specified further with the individual call-off. The agreement is planned to be signed as soon as possible in the applicable deadlines in accordance with Regulations on Public Procurements. The scope of the ICT services:

The contest is split into several groups divided according to disciplines (hereafter called groups). Parallel framework agreements shall be signed with three (3) tenderers in each group, assuming a sufficiently qualified tender offer. In the evaluation phase, the three chosen tenderers will be ranked from first priority to third priority for use of the waterfall method, see the contract formulated point four. It is estimated that during the contract's possible 4-year period, ICT services will be purchased for approx. 4 000 000 NOK. The volume is based on an estimate and is not binding. It is difficult to say for certain how the volume will distribute across the different groups. It can swing from year to year and from group to group. The scope of the services requested (number of hours per calendar year) will vary and be dependant on the Contracting Authority's definitive need, and available competence and capacity in their own organisation. Buskerud Fylkeskommune has their own ICT unit consisting of capable employees. Much work in the disciplines will therefore to a certain degree be carried out internally.

For an overview of the different groups, see the attached spreadsheet 'Groups, services and programmes'. It is possible to submit a tender offer on 1 or more of the groups, and a tenderer is not limited to how many groups for which they can achieve first priority. The Contracting Authority retains the right to cover the contract between several tenderers. The Contracting Authority can utilise mini contest to establish a service agreement with the winner of the contest. The service agreement must only apply to 1 group or one programme, and cannot endure for more than 6 months.

For further information about the procurement, refer to the attached document 'requirement specification'.

Prices and costs.

All prices shall be given excluding VAT, but including all of the tenderer's other costs (fees, training, installation, remuneration, delivery etc.). Travel time and travel costs to and from the Contracting Authority will not be covered. Other travel imposed by, or previously agreed with the Contracting Authority, documented travel expenses will be remunerated according to the government's rates. The cheapest means of travel must be used.

#### **II.1.5. CPV code(s)**

72000000 IT services: consulting, software development, Internet and support, 48000000 Software package and information systems, 72222300 Information technology services, 72300000 Data services, 72320000 Database services, 72321000 Added-value database services, 72500000 Computer-related services, 72510000 Computer-related management services, 72514000 Computer facilities management services, 72514200 Facilities management services for computer systems development
