II.2.4. Description of the procurement

Omschrijving schilderwerkzaamheden hoogspanningsmasten: de schilderwerkzaamheden die onder deze raamovereenkomsten vallen hebben betrekking op het onderhoud aan bovengrondse hoogspanningslijnen, waarvan stalen vakwerkmasten, stalen buismasten en/of stalen portalen een onderdeel zijn. Het voornaamste kenmerk van het werken in hoogspanningsmasten is het klimmen en zichzelf verplaatsen in combinatie met het werken op grote hoogte. Hoogspanningsmasten hebben een hoogte van dertig tot honderd meter, met een enkele uitschieter boven de honderd meter. De hoogste mast in NEDERLAND is 165 meter hoog. Vakwerkmasten en/of portalen bestaan uit samengestelde stalen profielen of buizen. De voortkomende handelingen zijn:

- het voorbehandelen,
- het bijplekken,
- het volledig schilderen.

De op hoogspanningsmasten toegepaste verfsystemen zijn wezenlijk anders dan systemen die elders voor schilderwerk worden toegepast. Dit komt met name door de in één keer aan te brengen laagdikte van zestig tot honderd micrometer. Deze laagdikte is beduidend hoger dan gebruikelijk in bijvoorbeeld de woningbouw. Het aanbrengen van de verf vereist kennis over en ervaring met het aan te brengen verfsysteem. Bovendien vergt het aanbrengen relatief veel kracht.

II.2.4. Description of the procurement

Omschrijving schilderwerkzaamheden hoogspanningstations: de schilderwerkzaamheden die onder deze raamovereenkomsten vallen hebben betrekking op het onderhoud aan staalconstructies, fundaties, gebouwen en in voorkomende situaties hoogspanningscomponenten, waarvan transformatoren en koelerbanken een onderdeel zijn. De voortkomende handelingen zijn:

- het voorbehandelen,
- het bijplekken,
- het volledig schilderen.

De schilders worden geacht om zelfstandig, onder e-toezicht, in een veilig gesteld gebied te werken. Vanaf het moment dat de werkzaamheden starten zijn gegadigden mede verantwoordelijke voor hun eigen veiligheid en de kwaliteit waarmee ze het werk uitvoeren. Deze manier van werken vereist veel verantwoordelijkheidsbesef en discipline. Naast deze zelfstandigheid van werken is het noodzakelijk om ook in teamverband goed te functioneren. Het schilderen op hoogspanningstations en aan hoogspanningsmasten stelt hoge eisen aan de sociale vaardigheden van de schilders. Leden van een team dienen zich dan ook verantwoordelijk te voelen voor elkaars veiligheid en geleverde prestatie. Dit om onveilige situatie en lagere kwaliteit van het werk te voorkomen of in ieder geval te verminderen. Specifiek voor hoogspanningsmasten en hoogspanningstations is uiteraard de hoge elektrische spanning op de geleiders en componenten. Een ieder die aan hoogspanningsmasten en hoogspanningstations werkt moet zich terdege bewust zijn van de risico's die hieraan zijn verbonden.
