**II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)**

**II.1.4. Short description of the contract or purchase(s)**

Be responsible for running the health monitoring programme for deer and musk-ox in accordance with the specifications, including:

— Obtain data on the health status through self initiated, systematic collections and examinations.

- Identify changes in populations resulting from diseases.
- Uncover 'new' disease conditions in primary deer and musk-ox.
- Monitor infectious diseases that can be transferred between domestic animals and game.
- Map the extent of infectious diseases in game that can be transferred to hunters and other nature users.
- Uncover health conditions that require management initiatives.
- Monitor animal welfare aspects connected to disease, euthanasia, hunting and capture of game.
- Contribute to putting health data in an organic context, also on a population level.
- Use the collected material to assess the effects of factors that can influence the health of game, for example, climate, vegetation changes, introduction of infectious substances or management initiatives.
