Other activity: Humanitarian and Development Aid

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Fleet Management Software

Reference number: 469036

II.1.2. Main CPV code

72268000 Software supply services

II.1.3.

Type of contract

Services

II.1.4. Short description

Welthungerhilfe is one of the largest private aid organizations in Germany, without political or religious affiliation. Since Welthungerhilfe was founded in 1962 each sitting German President has been its patron. The project work is carried out in more than 30 countries on the continents of Africa, Asia and Latin America. In order to carry out the project work, Welthungerhilfe needs vehicles and other assets.

For the administration and management of these vehicles and assets a global fleet management solution is required. The solution will be used worldwide, but the Internet connection at the individual locations varies greatly in availability, throughput, latency and quality (packet loss, jitter). The overall system offered must be fault-tolerant to this type of connection fluctuations.

II.1.5. Estimated total value

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

48430000 Inventory management software package, 48000000 Software package and information systems

II.2.3. Place of performance

NUTS code: DEA22 Bonn, Kreisfreie Stadt

Main site or place of performance: Bonn, GERMANY.

II.2.4. Description of the procurement

Welthungerhilfe is one of the largest private aid organizations in Germany, without political or religious affiliation. Since Welthungerhilfe was founded in 1962 each sitting German President has been its patron. Welthungerhilfe has two locations in Germany (Bonn and Berlin). The project work is carried out in more than 30 countries on the continents of Africa, Asia and Latin America. In order to carry out the project work, Welthungerhilfe needs vehicles. Vehicles are mission critical assets in WHH operations. Target scenario Introduction of a global fleet management solution through the overall system described below, including the provision of operational readiness by the contractor based on a work contract, as well as the provision of the necessary system services to maintain operational readiness. This includes the homogenization of fleet administration in the different countries in order to improve the usability of the resulting data. The aim is to reduce complexity and simplify operation so that the usability increases. The goal of the project is a global, standardized fleet management that meets the main requirements of the stakeholders and allows the organization to improve efficiency and effectiveness. WHH wants to reduce administrative effort, cost for purchasing and repairs and fuel consumption. Also, WHH would like to get an overview of the global fleet cost in order to be able to introduce improvements. The entire system will be used worldwide, the Internet connection at the individual locations varies greatly. Internet connections may vary in availability, throughput, latency and quality (packet loss, jitter). The overall system offered must be fault-tolerant to this type of connection fluctuations. The design of the proposed fleet management infrastructure makes optimal use of the available resources (according to the current state of the art) and thus ensures a very good user experience.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Start: 01/07/2020

This contract is subject to renewal: no

II.2.9. Information about the limits on the number of candidates to be invited

Envisaged number of candidates: 3 Objective criteria for choosing the limited number of candidates:

Refer to tender invitation.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no
