Works

**II.1.4. Short description**

Fortum Oslo Varme, FOV, produces and distributes renewable district heating in the Oslo region. We provide safe and environmentally friendly treatment of residual waste that cannot, or ought not, be recycled, and recover energy from waste and other environmentally friendly resources, in order to provide green district heating and electricity.

FOV is the largest supplier of district heating in Norway and makes up 36 % of all district heating generated in Norway. Work is being carried out on large development projects, and the company intends to establish a full-scale carbon catchment plant at Klemetsrud.

The company is owned 50/50 by Fortum and Oslo Municipality and is part of the Fortum group, which has the operational control.

The company was established on 4 August 2017, when the previous Hafslund Varme AS was merged with Klemetsrudanlegget AS. The new company currently has approx. 180 employees. The company has office premises at Klemetsrud and Skøyen.

This contract is divided into lots: no

**II.2. Description****II.2.2. Additional CPV code(s)**

45200000 Works for complete or part construction and civil engineering work, 45213250 Construction work for industrial buildings, 45213260 Stores depot construction work, 45230000 Construction work for pipelines, communication and power lines, for highways, roads, airfields and railways; flatwork, 45252300 Refuse-incineration plant construction work

**II.2.3. Place of performance**

NUTS code: NO011 Oslo

Main site or place of performance: Klemetsrud.

**II.2.4. Description of the procurement**

Fortum Oslo Varme, FOV, is carrying out a project for Front-End Engineering Design, FEED, for adding a carbon catchment plant at Klemetsrud Waste-to-Energy plant in Norway.

The aim of FEED is to develop an independent and self-sufficient full-scale unit for the catchment of CO<sub>2</sub>. Collected CO<sub>2</sub> will be compressed, condition, liquid and sent to temporary storage. Liquid CO<sub>2</sub> will be later transported to Oslo Port by lorries, where it will be stored in a temporary storage tank facility before it is exported via a CO<sub>2</sub> transport ship. Liquid CO<sub>2</sub> is to be temporarily stored in a planned, established tank store/terminal before it is transported to the export terminal at Oslo Port. The requested work is for a catchment plant and temporary storage at Klemetsrud, as well as temporary storage/export terminal at Oslo Port. The ground must be prepared and foundations must be laid for all parts of the facility.

This request is for ground work and foundations for a carbon catchment facility and temporary storage at Klemetsrud, as well as for a terminal at Oslo Port.

#### **II.2.5. Award criteria**

Price is not the only award criterion and all criteria are stated only in the procurement documents

#### **II.2.6. Estimated value**

#### **II.2.7. Duration of the contract, framework agreement or dynamic purchasing system**

Start: 24/05/2019 End: 01/10/2019

This contract is subject to renewal: yes

Description of renewals:

The delivery is subject to the carbon catchment project actually being financed, including public support. The decision on financing will not be known until after the contract is signed. The contract will therefore be signed subject to financing and public support.

#### **II.2.10. Information about variants**

Variants will be accepted: no

#### **II.2.11. Information about options**

Options: no

#### **II.2.13. Information about European Union funds**

The procurement is related to a project and/or programme financed by European Union funds: no

#### **II.2.14. Additional information**

### **Section III: Legal, economic, financial and technical information**

---

#### **III.1. Conditions for participation**

##### **III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers**
