II.2.4. Description of the procurement

The main aim of the procurement is to cover Skyss' total need for expertise within data developer and analyst services. There can also be a need for data management services. The procurement will cover the need for expertise in addition to the competence that Skyss has itself, and/or cover the need for extra capacity in periods with extra activities. Competence will not be emphasised when comparing tenders.

The work tasks for the data developer(s) will include, amongst other things:

- Improving and developing data platforms, api, and integrations in order to collect, manage, and make data available for sharing, information, statistics, planning, and follow-up.
- Help to introduce new digital tools for change.
- To facilitate so that the organisation can make use of available data sets to obtain insight, e. g., via a data catalogue, business dictionary, guidelines for use, training, and documentation.
- Assist with automatic data exchange from, e.g., Enter and other operators and public transport companies.

The work tasks for the data analyst(s) will include, amongst other things:

- Collect, organise, and interpret data that will support decision processes and strategic choices.
- Analyse data, and, with the help of the analyses, contributing to, for example:
 - o key insight into, amongst other things, user behaviour and travel patterns, and changes to these.
 - o new insights that highlight a particular challenge or a general theme.
 - o cost calculations within different forms of mobility.
- Project management and implementation of independent processes.
- Business development

The list of work tasks is not exhaustive. Other services that naturally belong under the requested fields included in the framework agreement can be included if there is a need for them in the contract period.
