Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Award of a contract without prior publication of a call for competition in the Official Journal of the European Union in the cases listed below

- The works, supplies or services can be provided only by a particular economic operator for the following reason:
 - absence of competition for technical reasons

Explanation:

CyteFinder II is the only instrument available in the market that can perform the required rare-cell detection and rare-cell retrieval functions based on the following technical specifications.

- Hardware and software to create an automated, seven-channel fluorescence imaging system that rapidly images for both fluorescence and brightfield H&E/IHC imaging with subcellular resolution using the sCMOS camera.
- High speed, multi-channel system optimized for rare-cell detection and analysis.
- Integrated machine learning algorithm detects and ranks candidate cells for user review.
- CytePicker® Retrieval Module enables single cell or tissue micro-region retrieval from any location on the slide: the CytePicker Retrieval Module on the CyteFinder II instrument is a needle-based system used to reliably retrieve visually-confirmed single cells or tissue micro-regions for downstream genomic and transcriptomic analyses. The CytePicker Retrieval module is exclusively available on the CyteFinder II® Instrument.

The integrated machine learning algorithm (rare-cell detection) together with CytePicker Retrieval Module or similar module can't be found in any other device available in the market.
