I.2. Information about joint procurement

The contract involves joint procurement

In the case of joint procurement involving different countries, state applicable national procurement law:

See question 1.1.

The contract is awarded by a central purchasing body

I.3. Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at: https://portal.negometrix.com/index.cfm?action=sourcing:_requestform.subscribe&document=A4291E95-F50E-F0F5-EB8C8816F3C11AEA

Additional information can be obtained from the abovementioned address

Tenders or requests to participate must be submitted electronically via: https://portal.negometrix.com/index.cfm?action=sourcing:_requestform.subscribe&document=A4291E95-F50E-F0F5-EB8C8816F3C11AEA

I.4. Type of the contracting authority

Body governed by public law

I.5. Main activity

Other activity: Research and education networks

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Open Cloud for Research Environments (OCRE) — IaaS+ Cloud Tender 2020

II.1.2. Main CPV code

72000000 IT services: consulting, software development, Internet and support

II.1.3. Type of contract

Services

II.1.4. Short description

GÉANT is a not-for-profit organisation. The GÉANT Vereniging is owned by its core membership of 39 European National Research and Education Network (NREN) organisations and NORDUnet, which participates on behalf of five Nordic NRENS.

GÉANT executes this tender procedure on behalf of its members and may also act as a purchasing body on behalf of those members. The purpose of the procurement initiative is to

bridge the demand and supply sides for Infrastructure- Platform- and Software as a Service (IaaS+). It is being conducted as an Open Procedure in accordance with the Dutch Public Procurement Act (Aanbestedingswet 2012, revised 1 July 2016).

The open procedure is divided in 40 lots. Each lot represents 1 Country. Per lot a number of frameworks can be awarded.

The combined value of services over the lifespan of the frameworks agreements over all lots is estimated at EUR 600 000 000,-. Estimated value per lot vary be significantly. See document Vol 0. for more details.

II.1.5. Estimated total value

Value excluding VAT: 600 000 000,00 EUR

II.1.6. Information about lots

This contract is divided into lots: yes

Tenders may be submitted for all lots

II.2. Description

II.2.1. Title

Albania

Lot No: 1

II.2.2. Additional CPV code(s)

72000000 IT services: consulting, software development, Internet and support

II.2.3. Place of performance

NUTS code: 00 Other or Not Specified

II.2.4. Description of the procurement

For this lot GEANT searches for providers who are able to offer and deliver the following solutions consisting of:

IaaS infrastructure as a service

Where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, and deployed applications; and possibly limited control of select networking components (e.g., host firewalls)

Note: this definition of compute may include server and serverless computing for example virtual machines, FPGA's, etc.

This IaaS(+) solution or Solution may (optionally) also offer:

PaaS (Platform as a Service)

The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary software services utilising bidders public IaaS/PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the bidders Public IaaS resources (CPU, memory, storage, networking).

Managed services or license based (e.g. VMs with applications pre-installed from a vendor's cloud 'marketplace') services and general PaaS and SaaS services available in the

marketplace and running in customer tenancies, may be included but these must be a direct consequence of the usage of IaaS services.

One of the main objectives of the OCRE project is to create and further stimulate demand for IaaS+ services in Europe. For this specific objective the EC has made funds available that are to be distributed via the frameworks following this tender. Because of the current absence of demand for IaaS+ services in many lots of this tender it is difficult to predict contract volumes over a period of 4 years, especially since the stimulation of demand in one of the main drivers behind this tender procedure. At the time of publication it is not known in which countries the EC adoption funds are to be spend.

Therefore it is hard to estimate the total spend for this lot. The estimated spend is therefore an estimate only. No rights can be derived from the indicated estimated value.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 5 000 000,00 EUR

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds: yes

Identification of the project: This tender is part of the OCRE project. For more information see: <https://www.ocre-project.eu> The adoption funds are made available to the OCRE project by the European Commission under grant number 824079.

II.2.14. Additional information

II.2. Description

II.2.1. Title

Armenia

Lot No: 2

II.2.2. Additional CPV code(s)

72000000 IT services: consulting, software development, Internet and support

II.2.3. Place of performance

NUTS code: 00 Other or Not Specified

II.2.4. Description of the procurement

For this lot GEANT searches for providers who are able to offer and deliver the following solutions consisting of:

IaaS Infrastructure as a Service

Where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, and deployed applications; and possibly limited control of select networking components (e.g., host firewalls)

Note: This definition of compute may include server and serverless computing for example virtual machines, FPGA's, etc.

This IaaS(+) solution or Solution may (optionally) also offer:

PaaS (Platform as a Service)

The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary Software services utilising Bidders Public IaaS / PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the Bidders Public IaaS resources (CPU, memory, storage, networking).

Managed services or license based (e.g. VMs with applications pre-installed from a vendor's cloud "marketplace") services and general PaaS and SaaS services available in the marketplace and running in customer tenancies, may be included but these must be a direct consequence of the usage of IaaS services.

One of the main objectives of the OCRE project is to create and further stimulate demand for IaaS+ services in Europe. Because of the current absence of demand for IaaS+ services in many Lots of this tender it is difficult to predict contract volumes over a period of 4 years, especially since the stimulation of demand in one of the main drivers behind this tender procedure. At the time of publication it is not known in which countries the EC adoption funds are to be spend.

Therefore it is hard to estimate the total spend for this Lot. The estimated spend is therefore an estimate only. No rights can be derived from the indicated estimated value.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 5 000 000,00 EUR

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
yes

Identification of the project: This tender is part of the OCRE project. For more information see:
<https://www.ocre-project.eu> The adoption funds are made available to the OCRE project by
the European Commission under grant number 824079

II.2.14. Additional information

II.2. Description

II.2.1. Title

Croatia

Lot No: 6

II.2.2. Additional CPV code(s)

72000000 IT services: consulting, software development, Internet and support

II.2.3. Place of performance

NUTS code: HR Hrvatska

II.2.4. Description of the procurement

For this lot GEANT searches for providers who are able to offer and deliver the following solutions consisting of:

IaaS Infrastructure as a Service

Where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, and deployed applications; and possibly limited control of select networking components (e.g., host firewalls)

Note: This definition of compute may include server and serverless computing for example virtual machines, FPGA's, etc.

This IaaS(+) solution or Solution may (optionally) also offer:

PaaS (Platform as a Service)

The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary Software services utilising Bidders Public IaaS / PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the Bidders Public IaaS resources (CPU, memory, storage, networking).

Managed services or license based (e.g. VMs with applications pre-installed from a vendor's cloud "marketplace") services and general PaaS and SaaS services available in the marketplace and running in customer tenancies, may be included but these must be a direct consequence of the usage of IaaS services.

One of the main objectives of the OCRE project is to create and further stimulate demand for IaaS+ services in Europe. For this specific objective the EC has made funds available that are to be distributed via the frameworks following this tender. Because of the current absence of demand for IaaS+ services in many Lots of this tender it is difficult to predict contract volumes over a period of 4 years, especially since the stimulation of demand in one of the main drivers behind this tender procedure. At the time of publication it is not known in which countries the EC adoption funds are to be spend.

Therefore it is hard to estimate the total spend for this Lot. The estimated spend is therefore an estimate only. No rights can be derived from the indicated estimated value.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 50 000 000,00 EUR

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds: yes

Identification of the project: This tender is part of the OCRE project. For more information see: <https://www.ocre-project.eu> The adoption funds are made available to the OCRE project by the European Commission under grant number 824079

Where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, and deployed applications; and possibly limited control of select networking components (e.g., host firewalls)

Note: This definition of compute may include server and serverless computing for example virtual machines, FGPA's, etc.

This IaaS(+) solution or Solution may (optionally) also offer:

PaaS (Platform as a Service)

The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary Software services utilising Bidders Public IaaS / PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the Bidders Public IaaS resources (CPU, memory, storage, networking).

Managed services or license based (e.g. VMs with applications pre-installed from a vendor's cloud "marketplace") services and general PaaS and SaaS services available in the marketplace and running in customer tenancies, may be included but these must be a direct consequence of the usage of IaaS services.

One of the main objectives of the OCRE project is to create and further stimulate demand for IaaS+ services in Europe. For this specific objective the EC has made funds available that are to be distributed via the frameworks following this tender. Because of the current absence of demand for IaaS+ services in many Lots of this tender it is difficult to predict contract volumes over a period of 4 years, especially since the stimulation of demand in one of the main drivers behind this tender procedure. At the time of publication it is not known in which countries the EC adoption funds are to be spend.

Therefore it is hard to estimate the total spend for this Lot. The estimated spend is therefore an estimate only. No rights can be derived from the indicated estimated value.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 5 000 000,00 EUR

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
yes

Identification of the project: This tender is part of the OCRE project. For more information see: <https://www.ocre-project.eu> The adoption funds are made available to the OCRE project by the European Commission under grant number 824079

II.2.14. Additional information

II.2. Description

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds: yes

Identification of the project: This tender is part of the OCRE project. For more information see: <https://www.ocre-project.eu> The adoption funds are made available to the OCRE project by the European Commission under grant number 824079

II.2.14. Additional information

II.2. Description

II.2.1. Title

Moldova

Lot No: 25

II.2.2. Additional CPV code(s)

72000000 IT services: consulting, software development, Internet and support

II.2.3. Place of performance

NUTS code: 00 Other or Not Specified

II.2.4. Description of the procurement

For this lot GEANT searches for providers who are able to offer and deliver the following solutions consisting of:

IaaS Infrastructure as a Service

Where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, and deployed applications; and possibly limited control of select networking components (e.g., host firewalls)

Note: This definition of compute may include server and serverless computing for example virtual machines, FGPA's, etc.

This IaaS(+) solution or Solution may (optionally) also offer:

PaaS (Platform as a Service)

The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary Software services utilising Bidders Public IaaS / PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the Bidders Public IaaS resources (CPU, memory, storage, networking).

Managed services or license based (e.g. VMs with applications pre-installed from a vendor's cloud "marketplace") services and general PaaS and SaaS services available in the marketplace and running in customer tenancies, may be included but these must be a direct consequence of the usage of IaaS services.

One of the main objectives of the OCRE project is to create and further stimulate demand for IaaS+ services in Europe. For this specific objective the EC has made funds available that are to be distributed via the frameworks following this tender. Because of the current absence of demand for IaaS+ services in many Lots of this tender it is difficult to predict contract volumes over a period of 4 years, especially since the stimulation of demand in one of the main drivers behind this tender procedure. At the time of publication it is not known in which countries the EC adoption funds are to be spend.

Therefore it is hard to estimate the total spend for this Lot. The estimated spend is therefore an estimate only. No rights can be derived from the indicated estimated value.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 5 000 000,00 EUR

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary Software services utilising Bidders Public IaaS / PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the Bidders Public IaaS resources (CPU, memory, storage, networking).

Managed services or license based (e.g. VMs with applications pre-installed from a vendor's cloud "marketplace") services and general PaaS and SaaS services available in the marketplace and running in customer tenancies, may be included but these must be a direct consequence of the usage of IaaS services.

One of the main objectives of the OCRE project is to create and further stimulate demand for IaaS+ services in Europe. For this specific objective the EC has made funds available that are to be distributed via the frameworks following this tender. Because of the current absence of demand for IaaS+ services in many Lots of this tender it is difficult to predict contract volumes over a period of 4 years, especially since the stimulation of demand in one of the main drivers behind this tender procedure. At the time of publication it is not known in which countries the EC adoption funds are to be spend.

Therefore it is hard to estimate the total spend for this Lot. The estimated spend is therefore an estimate only. No rights can be derived from the indicated estimated value.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 100 000 000,00 EUR

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds: yes

Identification of the project: This tender is part of the OCRE project. For more information see: <https://www.ocre-project.eu> The adoption funds are made available to the OCRE project by the European Commission under grant number 824079

II.2.14. Additional information

II.2. Description

II.2.1. Title

Sweden

Lot No: 35

II.2.2. Additional CPV code(s)

72000000 IT services: consulting, software development, Internet and support

II.2.3. Place of performance

NUTS code: SE Sverige

II.2.4. Description of the procurement

For this lot GEANT searches for providers who are able to offer and deliver the following solutions consisting of:

IaaS Infrastructure as a Service

Where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, and deployed applications; and possibly limited control of select networking components (e.g., host firewalls)

Note: This definition of compute may include server and serverless computing for example virtual machines, FGPA's, etc.

This IaaS(+) solution or Solution may (optionally) also offer:

PaaS (Platform as a Service)

The capability provided to the consumer is to deploy onto the cloud infrastructure consumer-created or acquired applications created using programming languages, libraries, services, and tools supported by the provider. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly configuration settings for the application-hosting environment.

SaaS (Software as a Service)

Complementary Software services utilising Bidders Public IaaS / PaaS resources These complementary software service offerings must utilize (or be based on or directly related to) the Bidders Public IaaS resources (CPU, memory, storage, networking).

II.2.14. Additional information

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.2. Economic and financial standing

Selection criteria as stated in the procurement documents

III.1.3. Technical and professional ability

Selection criteria as stated in the procurement documents

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Open procedure

IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with several operators Envisaged maximum number of participants to
the framework agreement: 15

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no

IV.2. Administrative information

IV.2.1. Previous publication concerning this procedure

Notice number in the OJ S: [2019/S 149-367131](#)

IV.2.2. Time limit for receipt of tenders or requests to participate

Date: 02/06/2020 Local time: 12:00

IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates

IV.2.4. Languages in which tenders or requests to participate may be submitted

English

IV.2.6. Minimum time frame during which the tenderer must maintain the tender

Duration in months: 6 (from the date stated for receipt of tender)

IV.2.7. Conditions for opening of tenders

Date: 02/06/2020 Local time: 12:00

Place:

Amsterdam, the Netherlands

Information about authorised persons and opening procedure: Tenders will be open in a digital environment. It is not possible to witness the opening to the received tenders.

Section VI: Complementary information

VI.1. Information about recurrence

This is a recurrent procurement: no

VI.2. Information about electronic workflows

Electronic ordering will be used

Electronic invoicing will be accepted

VI.3. Additional information
