II.1.5. Short description of the contract or purchase(s)

Le marché concerne la fourniture de 2 chaudières vapeur 1 000 kg/h et de ses agrégats. Les chaudières seront installées dans une centrale de chauffe et seront alimentées en gaz. La vapeur produite (11 bars) sera ensuite amenée auprès des différents consommateurs via des conduites enterrées. Les consommateurs étant situés dans des bâtiments différents, chacun sera équipé d'un réservoir de collecte des condensats. Une paire de pompes renvoie ensuite les condensats vers la centrale de chauffe, dans une bûche à condensat. Une paire de pompes alimente à nouveau les chaudières à partir de la bûche.

Une installation de traitement d'eau permet d'alimenter les chaudières avec de l'eau en provenance du réseau d'eau potable

Une régulation gère l'ensemble des chaudières, cascade, bûche d'alimentation et cuve de retour des condensats.

L'ensemble du matériel sera mis en place et raccordé par un chauffagiste. La mise en service est effectuée par le fournisseur des chaudières.
