II.2.4. Description of the procurement

Scope

Based on the available statistics and previous consumption, the total value of the framework agreement is estimated to be between NOK 15 and 30 million.

The contracting authority intends to increase internal reuse of furniture that the contracting authority already owns, in addition to establishing separate framework agreements for repair and upgrade services for the contracting authority's own furniture, and for the procurement of second-hand furniture. These can be used as alternatives to the framework agreement for the procurement of new furniture and will affect how much new furniture is procured.

We would like to enter into a framework agreement with a tenderer that can offer a broad selection of furniture and fixtures for workplaces, meeting rooms, and communal areas. Tenderers must have a clear environmental profile that is reflected in the production and transport of furniture.

The tenderer must be able to assist the contracting authorities with planning furnishings when new furniture is procured, and for combinations of existing and new furniture. The assistance will be required in both the current and new premises.

The framework agreement will be valid for two years, with an option to extend for 1 + 1 year. Exception for second-hand furniture.

The contracting authority is free to procure second-hand furniture outside the framework agreements for new furniture, and the contracting authority intends to establish a separate framework agreement for the procurement of second-hand furniture. As the procurement of new furniture has a large climate footprint, the contracting authority will actively work to encourage entities to procure second-hand furniture in cases where second-hand furniture is suitable and can fulfil the entities' needs. The procurement of second-hand furniture can affect the volume of new furniture that is procured. The volume can make up NOK 2 — 5 million a year.
