Short description of the contract or purchase(s)

Structural engineering consultancy services. The University of Liverpool is seeking to fully redevelop its residential, commercial and sports facility at its Greenbank site. The site occupies 8.4 hectares set in the Sefton Park conservation area approximately 2.5 miles to the South of the main city centre campus. This development will involve a mixture of demolition and new build as well as refurbishment. One of the buildings to be refurbished is Grade 2* listed and the other building whilst not listed for all intent and purposes should be treated as if it was listed due to its architectural merit and current sensitivity highlighted in the Heritage assessment. The works must be phased to allow continuous use of the existing catering provision currently located at the site. A heritage assessment has been completed and agreed with LCC and a previous feasibility study was undertaken but since the brief has been re-developed this information should be used as guidance in relation to limitations on mass and scale. The appointment will be to undertake the require design services to develop the project brief into design proposals within the available build budgets and to secure the required consents. All appointments will be for the full delivery of the scheme to be delivered under (but not limited to) JCT form of contract. The construction budgets are New Build circa GBP 50 m, Refurbishment circa GBP 4 m and sports/recreation facilities circa GBP 4 m, these are subject to the total number of students accommodated on the site.
