II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)

II.1.4. Short description of the contract or purchase(s)

We would like to invest in a new macroscope/zoom microscope and a inverted microscope, both with a confocal scanner. We are willing to accept a solution with one confocal scanner that may be moved from 1 scope to the other. Such a solution is only acceptable if the

confocal scanner may be moved without complicated calibrations of the instrument. A good microscope/zoom microscope is an important tool at Nifes as we work a lot with fish embryos and fish larvae. We do also have a pressing need for an inverted microscope as the amount of work on cell lines and cultures is increasing.
