Norway – Statistical services – 104-BYM-2025 Framework agreement for counts on the municipal road network 2026-2030.

OJ S 55/2026 19/03/2026

Contract or concession notice – standard regime - Change notice  
Services

### 1. Buyer

---

#### 1.1. Buyer

Official name: Oslo kommune v/ Bymiljøetaten

Email: [postmottak@bym.oslo.kommune.no](mailto:postmottak@bym.oslo.kommune.no)

Legal type of the buyer: Body governed by public law, controlled by a local authority

Activity of the contracting authority: General public services

### 2. Procedure

---

#### 2.1. Procedure

Title: 104-BYM-2025 Framework agreement for counts on the municipal road network 2026-2030.

Description: The aim of the procurement is to enter into framework agreement(s) for traffic registrations on the municipal road network in Oslo in the period 2026-2030, so that the municipality has obtained, quality assured and communicated the necessary traffic data in accordance with the road data regulations and internal/external needs. The scope is for the delivery of traffic data that covers both established needs (i.a. traffic volume, speed and longitudinal class) and new/expanded needs (i.a. counts for walking and cycling and more detailed data such as turning movements and driving patterns). In the work of facilitating a climate, environment and health-friendly transport system, good knowledge of high data quality on the existing traffic picture in the city, as well as consequences of changes, is very important. The agency thus needs to obtain traffic data for different road user groups and is hereby publishing traffic registrations on the municipal road network. There is continual development in methods for registering traffic and road user groups. As a result, the procurement is divided into two parts: Part A deals with the current situation and the need to operate and manage the current systems, including fixed counting points for vehicles and bicycles and temporary registrations in accordance with radar technology. Part B includes the agency's need for expanded insights into driving patterns, swing movements, road user shares, events and near-conflicts, liquidation, etc. The procurement is divided into two sub-contracts, sub-contract A covers the basic need and sub-contract B is open to systems that can provide more detailed traffic data, with separate award per sub-contract. Separate framework agreements will be signed per sub-contract (one tenderer per sub-contract). This framework agreement is valid for up to a maximum value of NOK 16 million. The estimate is only a guideline and is without obligation for the Contracting Authority. Sub-contract 1: \* Periodical traffic registrations with radar and other counting equipment \* Periodical cycling measurements with bicycle tubes \* Operation and maintenance of traffic registration stations for vehicles. \* Operation and maintenance of traffic registration stations for bicycles. Sub-contract 2: In addition to the needs mentioned in sub-contract A, the Agency for Urban Environment has traffic data needs that go beyond what we get from radar registrations and fixed counting points. Some of these needs are currently solved in part by radar

measurements (sub-contract A), whilst others do not. \* Case 1 – Cross sectioning two lanes \* Case 2 – Cross sectioning four to six lanes \* Case 3 – Junction count 35 x 35 m \* Case 4 – Junction count 50 x 50 m

Procedure identifier: acd65a7f-eb58-4eb3-9fe2-0e695d898613

Internal identifier: 3982

Type of procedure: Open

The procedure is accelerated: no

### 2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 79330000 Statistical services

Additional classification (cpv): 71311220 Highways engineering services, 63712700 Traffic control services, 71311200 Transport systems consultancy services, 71311210 Highways consultancy services, 71311300 Infrastructure works consultancy services, 71318000

Advisory and consultative engineering services, 79300000 Market and economic research; polling and statistics, 72000000 IT services: consulting, software development, Internet and support, 72300000 Data services, 72310000 Data-processing services, 72320000 Database services, 72330000 Content or data standardization and classification services, 72900000 Computer back-up and catalogue conversion services, 45310000 Electrical installation work, 45200000 Works for complete or part construction and civil engineering work

### 2.1.2. Place of performance

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

### 2.1.3. Value

Estimated value excluding VAT: 16 000 000,00 NOK

Maximum value of the framework agreement: 16 000 000,00 NOK

### 2.1.4. General information

**Legal basis:**

Directive 2014/24/EU

### 2.1.5. Terms of procurement

**Terms of submission:**

Maximum number of lots for which one tenderer can submit tenders: 2

**Terms of contract:**

Maximum number of lots for which contracts can be awarded to one tenderer: 2

### 2.1.6. Grounds for exclusion

Sources of grounds for exclusion: Notice

Analogous situation like bankruptcy, insolvency or arrangement with creditors under national law: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract. Bankruptcy: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

**Corruption:** Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a enforceable verdict has been convicted of corruption by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Corruption as defined in Article 3 of the Convention on Combating Corruption, Involving European Communities or European Union Member States (EUT C 195 of 25.6.1997, s. 1), and in Article 2, point 1, in the Council's framework decision 2003/568/RIA of 22 July 2003 on combating corruption in the private sector (EUT L 192 of 31.7.2003, p. 54). This rejection reason also includes corruption as defined in national law for the contracting authority or supplier.

**Arrangement with creditors:** Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

**Participation in a criminal organisation:** Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted verdict of participation in a criminal organisation by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Participation in a criminal organisation as defined in Article 2 of the Council's framework decision 2008/841/RIA of 24 October 2008 on combating organised crime (EUT L 300 of 11.11.2008, p. 42).

**Agreements with other economic operators aimed at distorting competition:** Has the tenderer entered into agreement(s) with other tenderers with the intention of turning the competition?

**Breaching of obligations in the fields of environmental law:** Is the tenderer aware of breaches of environmental provisions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

**Money laundering or terrorist financing:** Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of money laundering or financing terrorism by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Money laundering or financing terrorism As defined in Article 1 of the European Parliament and Council Directive 2005/60/EF of 26 October 2005 on preventive measures against the use of the financial system for money laundering and financing terrorism (EUT L 309 of 25.11.2005, p. 15).

**Fraud:** Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted of fraud has been convicted of fraud by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Fraud included in Article 1 of the Convention on protection of the Financial Interests of the European Communities (EFT C 316 of 27.11.1995, p. 48).

**Child labour and including other forms of trafficking in human beings:** Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of child labour and other forms of human trafficking by a verdict handed down no more than five years ago, or a rejection period determined directly in the judgement that still applies? Child labour and other forms of human trafficking as defined in

Article 2 of the European Parliament and council directive 2011/36/EU of 5. 1 April 2011 on the prevention and control of human trafficking and the protection of its victims and for compensation of the Council's framework decision 2002/629/RIA (EUT L 101 of 15.4.2011, p. 1).

Insolvency: Is the tenderer in an insolvency situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Breaching of obligations in the fields of labour law: Is the tenderer aware of breaches of provisions on working conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Assets being administered by liquidator: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Misrepresentation, withheld information, unable to provide required documents or obtained confidential information of this procedure: Has the tenderer: a) given grossly incorrect information with the notification of the information required to verify that there is no basis for rejection, or of the qualification requirements being fulfilled, b) failed to provide such information, c) made reservations immediately to present the supporting documents requested by the contracting authority, or d) improperly affected the contracting authority's decision process to acquire confidential information that could give this an unlawful advantage in connection with competition, or negligently has given misleading information that can have a significant influence on decisions on rejection, selection or award?

Conflict of interest due to its participation in the procurement procedure: Is the tenderer aware of a conflict of interest as stated in national law, the relevant notice or procurement documents?

Direct or indirect involvement in the preparation of this procurement procedure: Has the tenderer or an entity associated with the supplier advised the contracting authority or in another way been involved in the planning of the competition?

Grave professional misconduct: Has the tenderer committed serious errors in professional practice? If relevant, see the definitions in national law, the relevant notice or procurement documents.

Early termination, damages, or other comparable sanctions: Has the tenderer committed significant breaches of contract in connection with the fulfilment of a previous public contract, a previous contract with a public contracting authority or a previous concession contract, where the breach has led to the cancellation of the contract, compensation or other similar sanctions?

Breaching of obligations in the fields of social law: Is the tenderer aware of breaches of provisions on social conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching obligation relating to payment of social security contributions: Have tenderers failed to fulfil all their social security obligations in the country where they are established and in their member state, if this is a different country than what he is established in?

Business activities are suspended: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Breaching obligation relating to payment of taxes: Has the tenderer not fulfilled all of his tax and duty obligations in both the country where he is established and in the contracting authority's member state, if this is a different country than what he is established in?

Terrorist offences or offences linked to terrorist activities: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of acts of terrorism or criminal acts connected to terrorist activities by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Acts of terrorism or criminal acts relating to terrorist activity as defined in Article 1 and 3 of the Council's framework decision 2002/475/RIA of 13 June 2002 on combating terrorism (EFT L 164, af 22.6.2002, p. 3). This rejection reason also includes incitement to, participation or attempts to commit such actions as included in Article 4 in the mentioned framework decision.

Offence concerning its professional conduct in the domain of defence procurement: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, have been legally convicted of offences regarding professional behaviour in defence procurements?

Lack of reliability to exclude risks to the security of the country: Is the tenderer assessed to lack reliability that is necessary to exclude the risk of national security?

Breaching of obligations set under purely national exclusion grounds: The contracting authority shall state that in Norway there are national rejection reasons. These shall be described in the procurement documents. Tenderers must respond to whether they are in one or more of the situations described in the national rejection reasons.

## 5. Lot

---

### 5.1. Lot: LOT-0001

Title: Sub-contract A: Traffic registrations - basic need

Description: Periodical traffic registrations with radar and other counting equipment. The aim is to register the number of vehicles and the speed of an average along the road with the use of its own current radar equipment and any future counting equipment that the Agency for Urban Environment can procure, such as future procurement of video recording equipment. This is both to use the rest of the life cycle of the equipment and to be able to carry out comparable measurements that have been previously carried out. The registrations are carried out year round, with minor activity during school holidays (winter and autumn holidays, weeks 8 and 40 respectively), July/communal holidays and winter months December-February, depending on snow amounts. The standard length of the radar measurements is 7 full days, i.e. at least 168 hours. Tasks: \* Assemble/disassemble radar/other counting equipment in accordance with orders \* Report to the contracting authority when the radar is mounted \* Sending raw data files from the measurements to the contracting authority \* Storage and maintenance of radars (charging batteries, cleaning, etc.) Periodical cycling measurements with bicycle tubes The aim is to register the number of cyclists who pass a count section by using eco-tubes.

Normally executed outside winter season. The standard length of the cycle measurements is 7 full days, i.e. at least 168 hours. Tasks: \* The hoses are fastened in asphalt in accordance with the procedure and connected to a computer unit that is stuck on the pavement. \* Device connects to the Eco-Visio cloud service, which logs data from recordings \* Disassembly of measuring equipment \* Storage and maintenance of equipment (including cleaning etc.) Operation and maintenance of traffic registration stations for vehicles. The contracting authority owns 13 traffic registration stations where measuring equipment is connected to

inductive loops that are milled down in the roadway. The measuring equipment (Datarec Loop monitor) communicates with the "Traffic Data Portal" (trafikdata.no) to the Norwegian Public Roads Administration. Tasks: \* Locate errors and report to the contracting authority (breaches of counting loops, electricity supply, damage to control cabinets, cables, etc.) \* Does not include troubleshooting of measuring equipment and laying of inductive loops on asphalt \* Annual audit of counters \* Revision of equipment in accordance with the agreed checkpoints, includes all external and internal equipment such as locks, fasteners, batteries, connections, electricity supply, cables, modems, insulation, cleaning, lubrication, etc. See the assignment description for a list of the counting points. Operation and maintenance of traffic registration stations for bicycles. The Agency for Urban Environment owns 36 bicycle registration stations that register bicycles on the municipal road network in Oslo. The equipment consists of inductive loops milled down in the asphalt that are connected to a cycle counter/controller (Eco-Counter UZelt as of November 2025). The control unit is located together with the battery mainly in a manhole. It is generally not relevant to connect a counting point to fixed current. Sensors are installed in both roadways, cycle lanes and on cycle paths. The drives are connected to the Eco-Visio cloud service, which the Contracting Authority can download traffic data. Eco-Visio also enables operational monitoring. Tasks \* Monitoring the counters and updating the status of the counters to the Contracting Authority. \* Troubleshooting, including replacing the battery, re-establishment of counting stations etc. \* Establishment of inductive loops is not included in the assignments \* Annual audits in accordance with the agreed checkpoints. See the assignment description for a list of the counting points. Accessibility Requirements BYM orders counts throughout the entire year, with lower activity in case of heavy snowfall or in periods with staff holidays (weeks 8 and 40, Easter, July/August, Christmas holidays, holiday days in May), and higher in normal months such as March/April /June/September/October (except week 40)/November. Describe which resources you have available to carry out counts and possibly how you ensure deliveries to orders during periods of high activity despite any absence from key resources at your home (e.g. sickness).  
Internal identifier: 5955

### 5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 79330000 Statistical services

Additional classification (cpv): 71311220 Highways engineering services, 63712700 Traffic control services, 71311200 Transport systems consultancy services, 71311210 Highways consultancy services, 71311300 Infrastructure works consultancy services, 71318000 Advisory and consultative engineering services, 79300000 Market and economic research; polling and statistics, 72000000 IT services: consulting, software development, Internet and support, 72300000 Data services, 72310000 Data-processing services, 72320000 Database services, 72330000 Content or data standardization and classification services, 72900000 Computer back-up and catalogue conversion services, 45310000 Electrical installation work, 45200000 Works for complete or part construction and civil engineering work

#### Options:

Description of the options: The contracting authority has an option to extend the contract for up to 1+1 years on unchanged terms. The option will be taken up automatically, unless the contracting authority notifies the tenderer that the option should not be taken up.

### 5.1.2. Place of performance

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

### 5.1.3. Estimated duration

Duration: 48 Months

#### **5.1.6. General information**

##### **Reserved participation:**

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

#### **5.1.9. Selection criteria**

Sources of selection criteria: Notice

Criterion: Enrolment in a trade register

Description of selection criterion: The tenderer shall be a legally established company.

Documentation requirements: Norwegian companies: Company Registration Certificate.

Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the company is established.

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers must have sufficient economic and financial capacity to be able to fulfil the contract. Documentation requirements: The company's last Annual Financial Statements including notes, the Board's Annual Report and Audit Report, as well as new information of relevance to the company's fiscal numbers. The contracting authority reserves the right to obtain credit appraisal on its own initiative. If the tenderer has a justifiable reason (e.g. a recently started company) for not submitting the documentation required by the Contracting Authority, he can document his economic and financial capacity with any other document that the Contracting Authority deems suitable.

Criterion: Environmental management measures

Description of selection criterion: Tenderers are required to have implemented environmental management measures that ensure that the tenderer is suitable to fulfil the contract's environmental provisions. This means that the tenderer has methods for working actively and systematically to reduce negative environmental impact from activities connected to the execution of this Contract. Documentation requirements: A description of the tenderer's environmental management measures. If a tenderer has certificates from independent bodies that document the environmental management system, they can be presented as documentation. Refer to the EU Scheme for Environmental Management and Environmental Audit (EMAS), other recognised environmental management systems in Regulation (EF) no. 1221/2009 article 45, or equivalent, and other environmental management standards based on relevant European or international standards from accredited bodies such as ISO 14001 or equivalent.

Criterion: Measures for ensuring quality

Description of selection criterion: Tenderers shall have a relevant quality assurance system for the content of the contract. Documentation requirements: A description of the tenderer's quality assurance methods. Alternatively: Certificate for the company's quality assurance system issued by independent bodies that confirms the tenderer fulfils certain quality assurance standards, for example ISO 9001:2015.

Criterion: Supply chain management

Description of selection criterion: Tenderers shall be suitable for fulfilment of contractual requirements for due diligence assessments for responsible businesses. This means that the

Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as to prevent environmental degradation and corruption. Documentation requirements: A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall include: \* Formal policies/policies that cover an obligation to comply with the requirements of responsible businesses.

Criterion: References on specified deliveries

Description of selection criterion: Tenderers shall have good experience from equivalent assignments. By equivalent assignments we mean the execution of traffic registrations along the road for other private or public actors. Documentation requirements: Short description of the tenderer's three most relevant assignments during the last three years, including information on the contract's value, date of delivery as well as the name of the contracting authority and a description of the assignment's content.

Criterion: Average yearly manpower

Description of selection criterion: The tenderer shall have sufficient capacity to fulfil the contract. Documentation requirements: A description of the tenderer's overall organisation and the number of employees with core competence with connection to the delivery.

#### 5.1.10. Award criteria

**Criterion:**

Type: Price

Description: Combined evaluation price

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 40

**Criterion:**

Type: Quality

Description: Assignment comprehension and competence.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 60

**Criterion:**

Type: Quality

Description: Both climate footprint and environmental impact are considered to be limited in this procurement. The contract is for the execution of traffic registrations on the municipal road network, and the largest climate and environmental impact will be assessed for transport in connection with deployment, operation, moving and rigging down of registration equipment, as well as any site inspections and service assignments. Oslo municipality has implemented a standard requirement for the use of zero emission vehicles from 01.01.2025. As this will be an absolute requirement for the tenderers, and in addition there are qualification requirements that are related to climate and the environment, our assessment is that the use of these requirements actually contributes to reducing environmental risk to a greater degree compared to setting an award criterion on climate and the environment. By setting environmental requirements for the delivery and the tenderer, incentives are given to deliver as binding and environmentally friendly tender as possible within the framework for this service. This is considered to ensure the best climate footprint and environmental impact of the procurement. Setting such requirements as a minimum requirement will, according to the contracting authority's assessment, clearly give a better climate and environmental effect than considering other climate and environmental considerations in this procurement. Based on the above

assessment, the contracting authority will use the exclusion provisions in the procurement regulations §7-9 fourth paragraph. The contracting authority is exempt from the obligations to weight the environment 30% or to prioritise the environment among the three highest prioritised award criteria in this procurement.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 0

#### **5.1.11. Procurement documents**

Access to certain procurement documents is restricted

Information about restricted documents is available at: <https://app.artifik.no/procurements/3982>

##### **Ad hoc communication channel:**

Name: e-Tendering

#### **5.1.12. Terms of procurement**

##### **Terms of submission:**

Electronic submission: Required

Address for submission: <https://app.artifik.no/procurements/3982>

Languages in which tenders or requests to participate may be submitted: English, Norwegian

Electronic catalogue: Not allowed

Deadline for receipt of tenders: 25/03/2026 11:00:00 (UTC+00:00) Western European Time, GMT

Duration during which the tender must remain valid: 3 Months

##### **Terms of contract:**

The execution of the contract must be performed within the framework of sheltered employment programmes: No

Conditions relating to the performance of the contract: N/A

Electronic invoicing: Required

Electronic ordering will be used: yes

Electronic payment will be used: yes

Financial arrangement: N/A

#### **5.1.15. Techniques**

##### **Framework agreement:**

Framework agreement, without reopening of competition

Maximum number of participants: 1

##### **Information about the dynamic purchasing system:**

No dynamic purchase system

#### **5.1.16. Further information, mediation and review**

Review organisation: Oslo tingrett

Organisation providing additional information about the procurement procedure: Oslo kommune v/ Bymiljøetaten

Organisation providing more information on the review procedures: Oslo kommune v/ Bymiljøetaten

Organisation receiving requests to participate: Artifik AS

#### **5.1. Lot: LOT-0002**

Title: Sub-contract B: Traffic registrations - extended/detailed data (case based ordering).

Description: In addition to the needs mentioned in sub-contract A, the Agency for Urban Environment has traffic data needs that go beyond what we get from radar registrations and fixed counting points. Some of these needs are currently solved in part by radar measurements (sub-contract A), whilst others do not. We have described some typical cases

we would like to resolve. For each case, we have described some data we need to obtain (equivalent "must-requirement") and someone we would like to get out (equivalent "ought-requirement"). These are the points we evaluate. The ought requirements are divided into two importance categories, where category 1 is more important need than category 2 and therefore weighs heavier in the evaluation of the tender offer. The agency invites tenderers to submit a tender describing how they would solve the needs in each case and what such an implementation would cost. This part B does not include the procurement of equipment, and it is therefore a prerequisite that the tender includes the use of the tenderer's own equipment. As in sub-contract A, we need the tenderer to assemble and disassemble the equipment itself and provide the necessary guidance for use on assignments from the Agency for Urban Environment. Assembly/disassembly and any post-work (e.g. extractions and sending of data files, video analysis, other quality assurance, etc.) is therefore requested to be included in the tender. We have tried to take into account that different equipment has different marginal costs per day. For each case we have therefore estimated the number of identical orders for different periods: 24 hours, 72 hours, 1 week and 2 weeks. Some registrations may be relevant to carry out in shorter periods, without us asking for tender offers on it specifically. About subscriptions If any of the equipment or analyses require subscriptions, or would like to be less expensive when purchasing a subscription, the annual price for this is added to a separate column in the price form. The subscription price will only be added once per subscription; If the same subscription is used to solve multiple cases, do not type the same price for multiple cases, then the subscription cost will be summed up several times. However, if the subscription is offered at multiple levels, any additional costs required to reach the correct level to resolve a case must be included. For example, if step 1 holds to resolve case 1, the cost of step 1 is included in case 1. If you need step 2 to solve case 2, the additional cost for acquiring step 2 is to be added to the tender offer on case 2. If step 1 can be used to solve both cases, the entire cost will be added to case 1 and nothing on case 2. The offered prices per duration are to be filled in the attached price form sub-contract B. It will be the sum of the orders that will be seen as the offered price for sub-contract B.

Case 1 - Cross sectioning two lanes We need to register traffic at Jens Bjelkes gate 35, in front of Vahl School. The road has two lanes with two-sided cycle lanes and two-sided pavements. There are torch and sign posts along the stretch. Westwards there is a short distance to a signal regulated junction, and the queue must be expected to stretch from the junction past the registration section for parts of the period. The number of vehicles in each direction- Vehicle distribution in the categories light/heavy or short/long Speed of vehicles in each direction, preferably per vehicle, possibly averages/median/85 percentile per aggregated ten-minutes /quarters/hour. See the assignment description for categories. Estimated number of orders per annum: 24 hours: 10, 72 hours: 25, 7 days: 40, 2 weeks: 5.

Case 2 - Cross sectioning four to six lanes We need to carry out an average of approx. at Økernveien 97, along with Hasle T. The road has five lanes with a mid-discount and a two-sided pavement. There are lampposts on the inside of the pavement. The average is approx. between two signal regulated junctions, and some queue past the registration section must be expected. With the exception of registrations in cycle lanes, our registration requirements are the same as in case 1. Estimated number of orders per annum: 24 hours: 10, 72 hours: 10, 7 days: 15, 2 weeks: 5.

Case 3 - Junction count 35 x 35 m The Agency for Urban Environment needs to carry out a crossing count at the junction of Grenseveien x Økernveien. The crossing is asymmetrical, and the longest distance required (between the pedestrian crossings that cross økernveien) is measured at approx. 35 metres. See the assignment description for categories. Estimated number of orders per annum: 24 hours: 15, 72 hours: 20, 7 days: 5, 2 weeks: 3.

Case 4 - Junction count 50 x 50 m The Agency for Urban Environment needs to register traffic in the roundabout in Ytre Ringvei x Strømsveien at Alna centre. In order to include all pedestrian

crossings, we need to cover an area of approx. 50 x 50 m. With the exception of the size and lack of cycle lanes, we have the same requirements as in Case 3. Estimated number of orders per annum: 24 hours: 5, 72 hours: 10, 7 days 3 2 weeks: 0.

Internal identifier: 5956

#### **5.1.1. Purpose**

Main nature of the contract: Services

Main classification (cpv): 79330000 Statistical services

Additional classification (cpv): 71311220 Highways engineering services, 63712700 Traffic control services, 71311200 Transport systems consultancy services, 71311210 Highways consultancy services, 71311300 Infrastructure works consultancy services, 71318000 Advisory and consultative engineering services, 79300000 Market and economic research; polling and statistics, 72000000 IT services: consulting, software development, Internet and support, 72300000 Data services, 72310000 Data-processing services, 72320000 Database services, 72330000 Content or data standardization and classification services, 72900000 Computer back-up and catalogue conversion services, 45310000 Electrical installation work, 45200000 Works for complete or part construction and civil engineering work

#### **Options:**

Description of the options: The contracting authority has an option to extend the contract for up to 1+1 years on unchanged terms. The option will be taken up automatically, unless the contracting authority notifies the tenderer that the option should not be taken up.

#### **5.1.2. Place of performance**

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

#### **5.1.3. Estimated duration**

Duration: 48 Months

#### **5.1.6. General information**

##### **Reserved participation:**

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

#### **5.1.9. Selection criteria**

Sources of selection criteria: Notice

Criterion: Enrolment in a trade register

Description of selection criterion: The tenderer shall be a legally established company.

Documentation requirements: Norwegian companies: Company Registration Certificate.

Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the company is established.

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers must have sufficient economic and financial capacity to be able to fulfil the contract. Documentation requirements: The company's last Annual Financial Statements including notes, the Board's Annual Report and Audit Report, as well as new information of relevance to the company's fiscal numbers. The contracting authority reserves the right to obtain credit appraisal on its own initiative. If the tenderer has a justifiable reason (e.g. a recently started company) for not submitting the documentation required by the Contracting Authority, he can document his economic and financial capacity with any other document that the Contracting Authority deems suitable.

Criterion: Environmental management measures

Description of selection criterion: Tenderers are required to have implemented environmental management measures that ensure that the tenderer is suitable to fulfil the contract's environmental provisions. This means that the tenderer has methods for working actively and systematically to reduce negative environmental impact from activities connected to the execution of this contract. Documentation requirements: A description of the tenderer's environmental management measures. If a tenderer has certificates from independent bodies that document the environmental management system, they can be presented as documentation. Refer to the EU Scheme for Environmental Management and Environmental Audit (EMAS), other recognised environmental management systems in Regulation (EF) no. 1221/2009 article 45, or equivalent, and other environmental management standards based on relevant European or international standards from accredited bodies such as ISO 14001 or equivalent.

Criterion: Measures for ensuring quality

Description of selection criterion: Tenderers shall have a relevant quality assurance system for the content of the contract. Documentation requirements: A description of the tenderer's quality assurance methods. Alternatively: Certificate for the company's quality assurance system issued by independent bodies that confirms the tenderer fulfils certain quality assurance standards, for example ISO 9001:2015.

Criterion: Supply chain management

Description of selection criterion: Tenderers shall be suitable for fulfilment of contractual requirements for due diligence assessments for responsible businesses. This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as to prevent environmental degradation and corruption. Documentation requirements: A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall include: \* Formal policies/policies that cover an obligation to comply with the requirements of responsible businesses.

Criterion: References on specified deliveries

Description of selection criterion: Tenderers shall have good experience from equivalent assignments. By equivalent assignments we mean the execution of traffic registrations along the road for other private or public actors. Documentation requirements: Short description of the tenderer's three most relevant assignments during the last three years, including information on the contract's value, date of delivery as well as the name of the contracting authority and a description of the assignment's content.

Criterion: Average yearly manpower

Description of selection criterion: Tenderers must have sufficient capacity to fulfil the contract. Documentation requirements: A description of the tenderer's overall organisation and the number of employees with core competence with connection to the delivery.

#### **5.1.10. Award criteria**

**Criterion:**

Type: Price

Description: Combined evaluation price

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 40

**Criterion:**

Type: Quality

Description: Assignment comprehension and answers to case orders and competence.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 60

**Criterion:**

Type: Quality

Description: Both climate footprint and environmental impact are considered to be limited in this procurement. The contract is for the execution of traffic registrations on the municipal road network, and the largest climate and environmental impact will be assessed for transport in connection with deployment, operation, moving and rigging down of registration equipment, as well as any site inspections and service assignments. Oslo municipality has implemented a standard requirement for the use of zero emission vehicles from 01.01.2025. As this will be an absolute requirement for the tenderers, and in addition there are qualification requirements that are related to climate and the environment, our assessment is that the use of these requirements actually contributes to reducing environmental risk to a greater degree compared to setting an award criterion on climate and the environment. By setting environmental requirements for the delivery and the tenderer, incentives are given to deliver as binding and environmentally friendly tender as possible within the framework for this service. This is considered to ensure the best climate footprint and environmental impact of the procurement. Setting such requirements as a minimum requirement will, according to the contracting authority's assessment, clearly give a better climate and environmental effect than considering other climate and environmental considerations in this procurement. Based on the above assessment, the contracting authority will use the exclusion provisions in the procurement regulations §7-9 fourth paragraph. The contracting authority is exempt from the obligations to weight the environment 30% or to prioritise the environment among the three highest prioritised award criteria in this procurement.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 0

**5.1.11. Procurement documents**

Access to certain procurement documents is restricted

Information about restricted documents is available at: <https://app.artifik.no/procurements/3982>

**Ad hoc communication channel:**

Name: e-Tendering

**5.1.12. Terms of procurement**

**Terms of submission:**

Electronic submission: Required

Address for submission: <https://app.artifik.no/procurements/3982>

Languages in which tenders or requests to participate may be submitted: English, Norwegian

Electronic catalogue: Not allowed

Deadline for receipt of tenders: 25/03/2026 11:00:00 (UTC+00:00) Western European Time, GMT

Duration during which the tender must remain valid: 3 Months

**Terms of contract:**

The execution of the contract must be performed within the framework of sheltered employment programmes: No

Conditions relating to the performance of the contract: N/A

Electronic invoicing: Required

Electronic ordering will be used: yes

Electronic payment will be used: yes

Financial arrangement: N/A

#### 5.1.15. Techniques

##### **Framework agreement:**

Framework agreement, without reopening of competition

Maximum number of participants: 1

##### **Information about the dynamic purchasing system:**

No dynamic purchase system

#### 5.1.16. Further information, mediation and review

Review organisation: Oslo tingrett

Organisation providing additional information about the procurement procedure: Oslo kommune v/ Bymiljøetaten

Organisation providing more information on the review procedures: Oslo kommune v/ Bymiljøetaten

Organisation receiving requests to participate: Artifik AS

## 8. Organisations
