#### **II.1.4. Short description**

In order to ensure effective, reliable and consistent monitoring and control of compliance with EU road transport legislation there must be an adequate enforcement mechanism in place. In recognition of the importance of law enforcement, the EU introduced certain minimum requirements for carrying out controls of compliance with the relevant rules during controls at roadside and checks at premises of the road transport undertaking. Despite developments made at national, European and international levels to step up enforcement, the complexity of the rules applicable to highly mobile road transport sector remains a huge challenge. The general objective of the project is to initiate the process of creating a regulatory and technological environment for for checking compliance with the EU road transport rules in the smartest and most efficient possible way, using the potential of the existing and emerging digitalisation, automation and communication technologies.
